5. Waste material disposal manifests

PART 2 - DESCRIPTION OF THE WORK

2.1 SCOPE OF WORK

A. Base Bid A:

- The Contractor shall remove approximately 10,315 square feet of asbestos containing Floor Tile and 10,475 square feet of asbestos containing mastic (radiant heat and no odor aqueous mastic solvent). Contractor shall also remove approximately 480 square feet of asbestos containing stair tread using non-friable methods. The contractor shall remove and dispose of wood cabinetry as construction debris and dispose of prior to the commencement of VAT and mastic abatement. Approximate Locations and Quantities are listed below:

</table>
*Quantities listed are for reference purposes only. It is the responsibility of the Contractor to verify all quantities/locations within the facility. No cost adjustment shall be granted to the Contractor based on adjustments to quantities listed.

** The Contractor shall be subject to any Add/Deduct provisions set forth in contract documents related to this project.

*** With the approval of the Owner, Owner's Representative, and ASCM monitoring firm, the Contractor may elect to remove VAT and Mastic under full containment conditions using non-friable or friable methods where work coincides with full containment removal of asbestos containing popcorn ceiling coatings, as per NJAC 5:23-8, full containment for unoccupied conditions. All provisions of NJAC 5:23-8 shall apply.

- The Contractor shall remove approximately 2270 square feet asbestos containing composite laboratory table tops and approximately 177 square feet of asbestos containing composite window sills and 21 square feet (1 units of 21 square feet) of presumed asbestos containing vault doors using non-friable removal methods. Contractor shall remove approximately 1296 linear feet of expansion joint caulking using non-friable methods (if impacted), 5 square feet of asbestos containing plumbers paste, 280 square feet of transite laboratory fume hoods (7 locations).

*Quantities listed are for reference purposes only. It is the responsibility of the Contractor to verify all quantities/locations within the facility. No cost adjustment shall be granted to the Contractor based on adjustments to quantities listed. The Contractor shall be subject to any Add/Deduct provisions set forth in contract documents related to this project.

Contractor shall perform limited demolition of non-asbestos containing concrete masonry units within wet walls and remove non-asbestos suspended ceiling tile systems where indicated to access asbestos containing thermal systems insulation for removal via full or limited containment methods, unoccupied conditions, or non-friable "wrap and cut" removal methods as outlined in NJAC 5:23-8. Non-friable "wrap and cut" removal shall be at the discretion of the Owner/Owner's Representatives. The Contractor shall be subject to any Add/Deduct provisions set forth in Contract Documents related to this project. The estimated quantity of thermal systems insulation to be abated is 436 linear Feet of ACM fitting insulation associated with fiberglass lines.

Quantities listed are for reference purposes only. It is the responsibility of the Contractor to verify all quantities/locations within the facility. No cost adjustment shall be granted to the Contractor based on adjustments to quantities listed.

The Contractor shall be subject to any Add/Deduct provisions set forth in contract documents related to this project.

With the approval of the Owner, Owner’s Representative, and ASCM monitoring firm, the Contractor may elect to remove VAT and Mastic under full containment conditions using non-friable or friable methods where work coincides with full containment removal of asbestos containing popcorn ceiling coatings, as per NJAC 5:23-8, full containment for unoccupied conditions. All provisions of NJAC 5:23-8 shall apply.

- The Contractor shall remove approximately 2270 square feet asbestos containing composite laboratory table tops and approximately 177 square feet of asbestos containing composite window sills and 21 square feet (1 unit of 21 square feet) of presumed asbestos containing vault doors using non-friable removal methods. Contractor shall remove approximately 1296 linear feet of expansion joint caulk using non-friable methods (if impacted), 5 square feet of asbestos containing plumbers paste, 280 square feet of transite laboratory fume hoods (7 locations),

*Quantities listed are for reference purposes only. It is the responsibility of the Contractor to verify all quantities/locations within the facility. No cost adjustment shall be granted to the Contractor based on adjustments to quantities listed. The Contractor shall be subject to any Add/Deduct provisions set forth in contract documents related to this project.

Contractor shall perform limited demolition of non-asbestos containing concrete masonry units within wet walls and remove non-asbestos suspended ceiling tile systems where indicated to access asbestos containing thermal systems insulation for removal via full or limited containment methods, unoccupied conditions, or non-friable "wrap and cut" removal methods as outlined in NJAC 5:23-8. Non-friable "wrap and cut" removal shall be at the discretion of the Owner/Owner's Representatives. The Contractor shall be subject to any Add/Deduct provisions set forth in Contract Documents related to this project. The estimated quantity of thermal systems insulation to be abated is 436 linear Feet of ACM fitting insulation associated with fiberglass lines.
