The JOLTS (Job Opening and Labor Turnover Survey) reported monthly by the Bureau of Labor Statistics keeps track of job openings, hires, separations, and employed persons. Employment is defined as all people on payroll who worked or received pay for the pay period including the 12th of the month, Job openings are all positions that are not filled on the last business day of the month, Hires includes all additions to the payroll during the month, and separations includes all employees separated from the payroll during the month; this includes quits, layoffs and discharges, and other separations. More specific definitions are available on the BLS website.

The New Jersey State Data Center, along with the NJDOL's Office of Research and Information, prepared this report to provide labor market data, aiming to support public and private sectors in understanding and leveraging these statistics.
