- **The Patient Safety Reporting System**

Collects electronic data on serious preventable adverse events and associated RCAs from state licensed health care facilities and produces annual summary reports.

<http://www.nj.gov/health/healthcarequality/health-care-professionals/patient-safety-reporting-system/>

- **Quality Indicators**

This includes inpatient Quality Indicators (IQI), Prevention Quality Indicators (PQIs) and Patient Safety Indicators derived from hospital discharge data. IQIs provide information on inpatient mortality for certain procedures and medical conditions; utilization of selected procedures for which there are questions of overuse, underuse, and misuse; and volume of procedures for which there is some evidence that a higher volume of procedures is associated with lower mortality. PQI's identify "ambulatory care sensitive conditions", which are conditions that can be effectively treated in an outpatient setting, potentially preventing the need for inpatient hospital admissions. PSIs provide information on in hospital complications and adverse events following surgeries, procedures, and childbirth.
