Between 2018 and 2024, transportation and warehousing saw the largest employment growth in Burlington County, increasing by 76.1%.

Transportation, warehousing, and utilities saw strong growth in New Jersey, expanding by 21.9% from 2018 to 2024.

Unemployment Trend

Burlington County vs. New Jersey

Source: Local Area Unemployment Statistics (LAUS), 2024

The Local Area Unemployment Statistics (LAUS) program produces monthly and annual employment, unemployment, and labor force data for Census regions and divisions, States, counties, metropolitan areas, and many cities, by place of residence.

Unemployment in Burlington County follows state trends but was slightly lower than the New Jersey average.

Occupational Employment and Wages

Burlington County vs. New Jersey

Source: 2024 National Occupational Employment and Wage Estimates (OEWS)

The Occupational Employment and Wage Statistics (OEWS) program produces employment, and wage estimates annually for approximately 830 occupations. These estimates are available for the nation, for individual states, and for metropolitan and nonmetropolitan areas; national occupational estimates for specific industries are also available.

22.5% of Burlington County's total employment is concentrated in the top 10 occupations.

Top 10 Occupations, Ranked by Employment Burlington County, 2024

An abstract geometric design on the left side of the slide. It features a dark purple triangle in the top-left corner with a small white circle. Below it is a light grey semi-circle next to a series of concentric blue circles. To the right of these is a blue square. Further down is a pink square with diagonal lines, and below that is a solid pink square. At the bottom left is a dark purple triangle. The background is a light beige color.

JOB POSTINGS

Job Postings

Burlington County vs. New Jersey

Source: Lightcast

Lightcast collect raw data on postings from more than 160,000 online sources, then synthesize and interpret those findings to provide meaningful insight in near real time. Job posting analytics can identify supply and demand for workers, skills, and jobs all over the world, as well as important contextual details like compensation trends.

Limitations: One job posting does not necessarily equal one actual job opening. Some companies may post jobs to signal growth to investors or advertise positions in multiple states. Additionally, a decline in job postings doesn't always indicate reduced demand; it could simply mean that companies have already filled their positions and are no longer actively recruiting. We treat this data as directional, offering insights into employer demand rather than exact measurements.

27% of job postings in Burlington County require a bachelor's degree or higher.

**Job Postings by Educational Attainment
Burlington County, 2024**

■ No education listed ■ High school or GED ■ Associate's degree ■ Bachelor's degree or higher

Note: Bachelor's degree or higher includes Bachelor's Degree, Master, Ph.D. or Professional Degree. While 41% of job postings did not specify educational attainment, this does not necessarily mean there are no requirements for it.

AI-related Job Postings

Burlington County vs. New Jersey

Source: Lightcast

To identify AI-related job postings, ORI-EDR compiled a curated list of 130 specific terms. A job listing is deemed AI-related if any of these terms appear in the skills section. A job listing is classified as AI-related if any of these terms are present in the skills section. This includes, but is not limited to, terms such as "AI/ML Inference," "Conversational AI," "Machine Learning Algorithms," "Supervised Learning," and "Deep Learning."

Limitations: One job posting does not necessarily equal one actual job opening. Some companies may post jobs to signal growth to investors or advertise positions in multiple states. Additionally, a decline in job postings doesn't always indicate reduced demand; it could simply mean that companies have already filled their positions and are no longer actively recruiting. We treat this data as directional, offering insights into employer demand rather than exact measurements.
