It includes a large purple triangle at the top left, a white circle with a black outline, a blue circle with a black outline, a blue square, a pink square with diagonal lines, a red square with diagonal lines, a grey square, a purple square, a maroon square with diagonal lines, and a grey square at the bottom left. The graphic is set against a light beige background.

JOB POSTINGS

Job Postings

Passaic County vs. New Jersey

Source: Lightcast

Lightcast collects raw data on postings from more than 160,000 online sources, then synthesizes and interprets those findings to provide meaningful insight in near real time. Job posting analytics can identify supply and demand for workers, skills, and jobs all over the world, as well as important contextual details like compensation trends.

Limitations: One job posting does not necessarily equal one actual job opening. Some companies may post jobs to signal growth to investors or advertise positions in multiple states. Additionally, a decline in job postings doesn't always indicate reduced demand; it could simply mean that companies have already filled their positions and are no longer actively recruiting. We treat this data as directional, offering insights into employer demand rather than exact measurements.

17% of job postings in Passaic County require a Bachelor's degree or higher.

Note: Bachelor's degree or higher includes Bachelor's Degree, Master. Ph.D. or Professional Degree. While 51% of job postings did not specify educational attainment, this does not necessarily mean there are no requirements for it.

AI-related Job Postings

Passaic County vs. New Jersey

Source: Lightcast

To identify AI-related job postings, ORI-EDR compiled a curated list of 130 specific terms. A job listing is deemed AI-related if any of these terms appear in the skills section. A job listing is classified as AI-related if any of these terms are present in the skills section. This includes, but is not limited to, terms such as "AI/ML Inference," "Conversational AI," "Machine Learning Algorithms," "Supervised Learning," and "Deep Learning."

Limitations: One job posting does not necessarily equal one actual job opening. Some companies may post jobs to signal growth to investors or advertise positions in multiple states. Additionally, a decline in job postings doesn't always indicate reduced demand; it could simply mean that companies have already filled their positions and are no longer actively recruiting. We treat this data as directional, offering insights into employer demand rather than exact measurements.

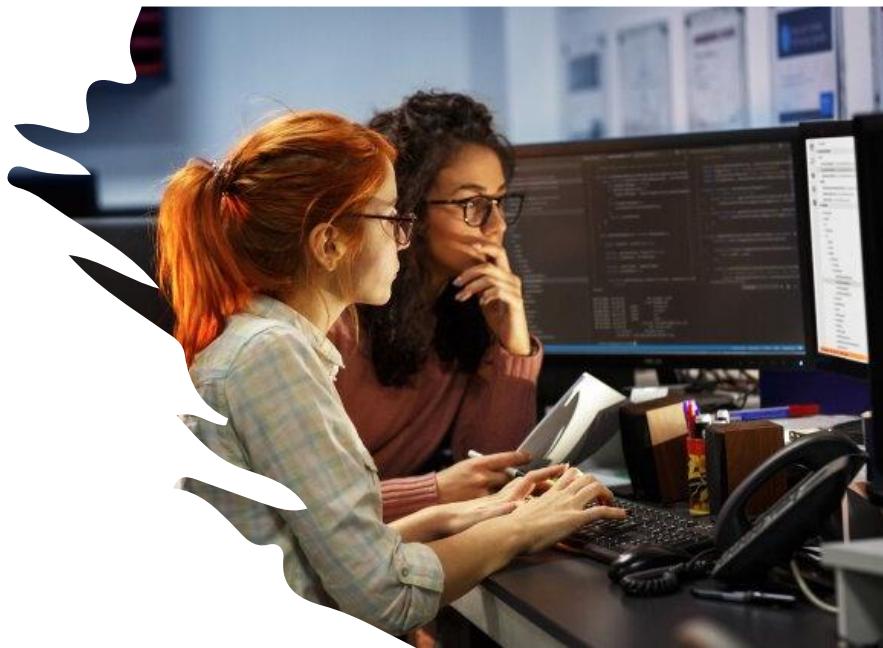

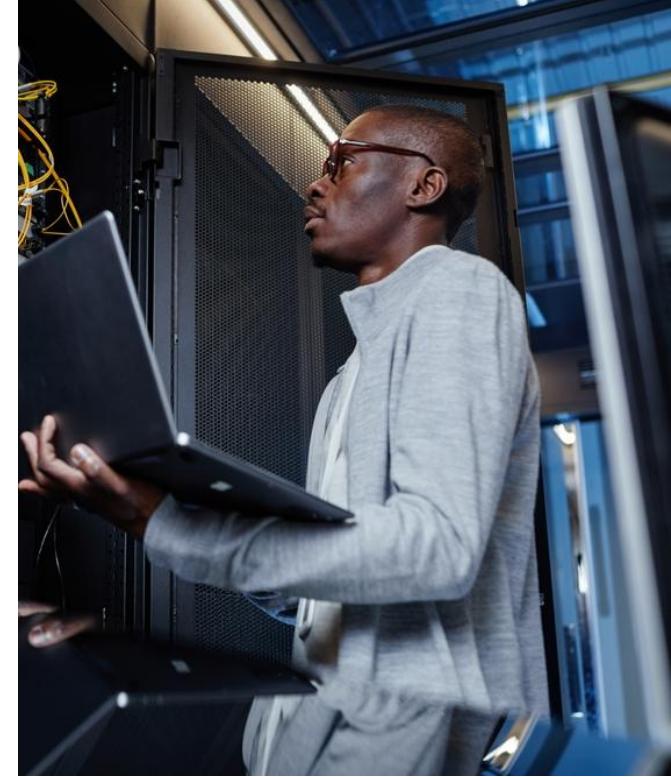

Top 5 AI-related Hiring Companies Passaic County, 2024
