JOB POSTINGS

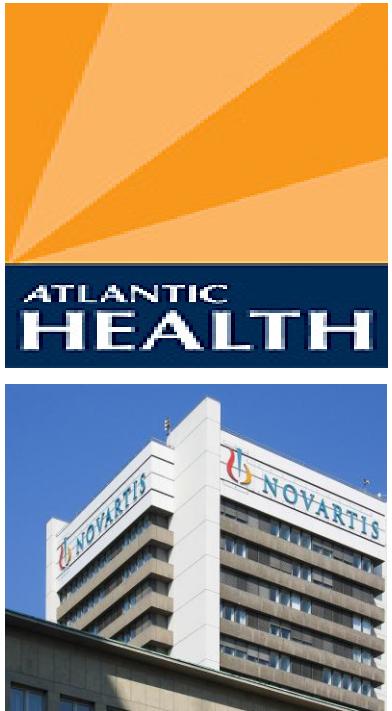

Job Postings

Morris County vs. New Jersey

Source: Lightcast

Lightcast collects raw data on postings from more than 160,000 online sources, then synthesizes and interprets those findings to provide meaningful insight in near real time. Job posting analytics can identify supply and demand for workers, skills, and jobs all over the world, as well as important contextual details like compensation trends.

Limitations: One job posting does not necessarily equal one actual job opening. Some companies may post jobs to signal growth to investors or advertise positions in multiple states. Additionally, a decline in job postings doesn't always indicate reduced demand; it could simply mean that companies have already filled their positions and are no longer actively recruiting. We treat this data as directional, offering insights into employer demand rather than exact measurements.
