How to Use This Guide

This guide gives workforce and education policymakers key information about local industries to enable informed decision making.

New hires – Estimated number of workers that started a job that lasted at least one full quarter with a given employer. This number includes new hires for new and replacement jobs. This is important to consider, because despite negative overall growth in many industries, there are still many job opportunities available in some industries due to turnover.

Total number of jobs – Estimate of stable jobs, i.e., the number of jobs that are held on both the first and last day of the quarter with the same employer. This helps you to understand which private sector industries dominate your local economy and provide the largest numbers of jobs both full and part time, overall.

Source: U.S. Census Bureau's Local Employment Dynamics program. This Federal and State partnership integrates existing data from state-supplied administrative records on workers and employers with existing censuses, surveys, and other administrative records.

Education Requirements by Key Industry Cluster (Statewide)

Minimum Educational requirements for all jobs – based on statewide-level data, this chart gives an indication of the level of education employers are requiring for potential job openings in the industry. This can be a useful tool for deciding which industries to target if your goal is to assist workers who have a particular level of education.
