New Jersey Geographic Identification Codes

NOTES ON THE NJSDC

This report was prepared by the New Jersey State Data Center (NJSDC). The NJSDC is a cooperative project of the State of New Jersey and the US Bureau of the Census. Serving data users in the public, private, and academic sectors, the NJSDC has three main objectives:

- to expand access to and use of census and other statistics
- to provide technical assistance and analytical support in the use of these statistics
- to provide user training on timely, census-related topics.

The NJSDC consists of a network of almost 120 state, county, regional, and local agencies. The lead agency is housed within the Division of Labor Market and Demographic Research, New Jersey Department of Labor. For a complete list of NJSDC contacts, write to: New Jersey State Data Center, New Jersey Department of Labor, PO Box 388, Trenton, New Jersey 08625-0388 or visit our website listed below.

A variety of statistical reports from State and Federal agencies may be accessed through the NJSDC network. Most statistics are from the US Bureau of the Census' regular and special censuses and surveys. The NJSDC publishes New Jersey data from the 2000 Census as it becomes available. Data from the US Bureau of Labor Statistics, US Bureau of Economic Analysis and the New Jersey Department of Labor are also available through the NJSDC.

These data are made available in printed reports, on computer discs, diskettes, and/or through the Internet. The NJSDC web site can be found at: www.nj.gov/labor/lra/njsdc.htm or you can contact our office for more information at (609) 984-2595.

INTRODUCTION

Geographic codes are shown primarily in computer-readable data products, such as computer tape and CD-ROM/DVD media, including data tabulations and data tables associated with computer-readable boundary files, but they also are shown on some US Census Bureau maps.

The geographic codes in this manual represent standardized national and state codes for political and statistical subdivisions within New Jersey.

This publication contains two tables. Table 1 presents Federal Information Processing Standard (FIPS) codes for New Jersey, the metropolitan areas located at least partially in New Jersey and all New Jersey counties. Table 2 is organized by place within county subdivision within county. Two types of codes are presented in Table 2, one national code (FIPS code) and one state code. FIPS codes are given for Metropolitan Areas (MA), Counties (CNTY), Minor Civil Division (MCD) and Places (PLACES.)

The US Census Bureau no longer supports census codes used in previous censuses. They are, therefore, not included in this publication.

FEDERAL INFORMATION PROCESSING STANDARDS (FIPS) CODE

Federal Information Processing Standards (FIPS) Codes are assigned for a variety of geographic entities, including American Indian and Alaska Native area, Hawaiian home land, congressional district, county, county subdivision, metropolitan area, place and state. The structure, format, and meaning of FIPS codes used in the US Census Bureau data products appear in the appropriate technical documentation.

The objective of the FIPS codes is to improve the ability to use the data resources of the Federal Government and avoid unnecessary duplication and incompatibilities in the collection, processing and dissemination of data. The FIPS codes and FIPS codes documentation are available online at http://www.itl.nist.gov/fipspubs/index.htm. Further information about the FIPS publications is available from the Geography Division, US Census Bureau, Washington, DC 20233-7400, or by telephone at 301-457-1099.

STATE CODES

This manual also contains the standard identification codes for New Jersey counties and municipalities. These codes are the same as those issued on June 1, 1968 by Directive No. 3 from the State Treasury. That directive states, "that all units of state government will use these codes when providing information about New Jersey counties and municipalities to other units of state government or to the federal government, industry, or the public."

The state codes were developed through an interdepartmental statistical standardization committee and were approved by the executive departments of New Jersey state government. Development of the codes was the result of request from a number of agencies for a uniform state and municipality identification system to simplify the exchange of information being collected within state government.

The state codes are only for county and municipal political jurisdictions. They do not relate to regional units such as utilities, school districts, joint courts or non-municipal health districts unless the geographical jurisdiction is exactly the same as the political jurisdiction.

These codes are maintained in the Division of Local Government Services of the Department of Community Affairs. The Department of State reports all changes in boundary, name, and form of government to the Division of Local Government Services on a timely basis.

Additional information on state standardized codes may be obtained from the Division of Local Government Services, Office of Local Government Research, New Jersey Department of Community Affairs at (609) 292-4584.

GEOGRAPHIC CLASSIFICATIONS

COUNTY (CNTY)

The primary legal divisions of most states are termed "counties." Each county is assigned a three-digit FIPS code that is unique within state. These codes are assigned in alphabetical order of county within State.

County governments cover all of New Jersey and every county is entirely covered by municipal governments. There are 21 counties in New Jersey (see Table 1.) In Table 2, County FIPS codes are given in the "CNTY" column.

COUNTY SUBDIVISION

County subdivisions are the primary subdivisions of counties for data presentation purposes. In New Jersey, county subdivisions are all minor civil divisions. New Jersey geography is unique in that there are no overlapping jurisdictions and there are no unincorporated areas in the state.

According to New Jersey state statute, there are 566 municipal governments in New Jersey, all at an equal level on the state governmental hierarchy. The statutes distinguish between "municipalities" (a term which applies to cities, towns, boroughs, and villages) of which there are 320, and "townships" of which there are 246. On the census data files, all 566 municipal governments are defined as Minor Civil Divisions (see Minor Civil Divisions below.) In addition, the census almost always defines the 320 cities, towns, boroughs and villages as places (see places below,) but seldom – if ever –defines townships as places.

There are a number of instances where a borough or town is the hole surrounded by the donut of a township; e.g. Mercer County's Hightstown borough is completely surrounded by East Windsor Township. As a result, in New Jersey, the MCD files tend to be more useful than the PLACE files, since only unincorporated census-designated "places" are omitted from these files.

Each county subdivision is assigned a five-digit FIPS code in alphabetical order within State.

MINOR CIVIL DIVISION (MCD)

In Table 2, the FIPS codes of Minor Civil Divisions are given in the "MCD" columns.

Minor Civil Divisions (MCDs) are the primary governmental or administrative divisions of a county. MCDs represent many different kinds of legal entities with a wide

variety of governmental and/or administrative functions. MCDs are variously designated as American Indian reservations, assessment districts, boroughs, charted townships, election districts, election precincts, gores, grants, locations, magisterial districts, parish governing authority districts, plantations, precincts, purchases, road districts, supervisors' districts, towns, and townships. The US Census Bureau recognizes MCDs in 28 states including New Jersey.

The MCDs in 12 selected states (Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin) also serve as general-purpose local governments that can perform the same governmental functions as incorporated places. The US Census Bureau presents data for these MCDs in all data products in which it provides data for places.

METROPOLITAN AREA (MA)

FIPS codes for Metropolitan Areas are listed in Table 1 and in the "CMSA" and "PMSA" columns of Table2.

The general concept of a metropolitan area (MA) is one of a large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some MAs are defined around two or more nuclei. New Jersey is covered completely by Metropolitan Areas. (See Table 1 for a list of New Jersey Metropolitan Areas.)

The MAs and the central cities within an MA are designated and defined by the federal Office of Management and Budget, following a set of official standards that are published in a Federal Register Notice. These standards were developed by the interagency Federal Executive Committee on Metropolitan Areas, with the aim of producing definitions that are as consistent as possible for all MAs nationwide.

Each MA must contain either a place with a minimum population of 50,000 or a U.S. Census Bureau-defined urbanized area and a total MA population of at least 100,000 (75,000 in New England.) An MA contains one or more central counties. An MA also may include one or more outlying counties that have close economic and social relationships with the central county. An outlying county must have a specified level of commuting to the central counties and also must meet certain standards regarding metropolitan character, such as population density, urban population, and population growth.

The territory, population, and housing units in MAs are referred to as "metropolitan." The metropolitan category is subdivided into "inside central city" and outside central city." The territory, population and housing units located outside designated "metropolitan" are referred to as "nonmetropolitan." The metropolitan and nonmetropolitan classification cuts across the other hierarchies; for example, generally

there are both urban and rural territory within both metropolitan and nonmetropolitan areas.

To meet the needs of various users, the standards provide for a flexible structure of metropolitan definitions that classify each MA either as a metropolitan statistical area (MSA) or as a consolidated metropolitan statistical area (CMSA) divided into primary metropolitan statistical areas (PMSAs.) (See definition below.) Documentation of the MA standards and how they are applied is available from the Population Distribution Branch, Population Division, U.S. Census Bureau, Washington DC 20233-8800. Telephone 301-457-2419.

If an area that qualified as a metropolitan area (MA) has 1 million people or more, two or more primary metropolitan statistical areas (PMSAs) may be defined within it. Each PMSA consists of a large urbanized county or cluster of counties that demonstrate very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSAs are established, the larger MA of which they are component parts is designated a consolidated metropolitan area (CMSA).

METROPOLITAN AREA TITLE AND CODE

The title of a metropolitan statistical area (MSA) contains the name of its largest central city and up to two additional central city names, provided that the additional places meet specified levels of population, employment, and commuting. Generally, a place with a population of 250,000 or more is in the title, regardless of other criteria.

The title of a primary metropolitan statistical area (PMSA) may contain up to three place names, as determined above, or up to three county names, sequenced in order of population size, from largest to smallest. A consolidated metropolitan statistical area (CMSA) title also may include up to three names, the first of which generally is the most populous central city in the area. The second name may be the first city or county name in the most populous remaining PMSA; the third name may be the first city or county name in the next most populous PMSA. A regional designation may be substituted for the second and/or third names in a CMSA title if local opinion support such a designation and the federal Office of Management and Budget deems it to be unambiguous and suitable.

The title for all metropolitan areas (MAs) also contain the U.S. Postal Service's abbreviation for the name of each state in which the MA is located. Each MA is assigned a four digit Federal Information Processing Standards (FIPS) code, in alphabetical order nationwide. If the fourth digit of the code is "2," it identifies a CMSA. Additionally, there is a separate set of two-digit FIPS codes for CMSAs, also assigned alphabetically.

PLACE

In Table 2, the FIPS codes for places are given in the "PLACE" column.

Places, for the reporting of decennial census data, include census designated places, consolidated cities, and incorporated places. Each place is assigned a five-digit Federal Information Processing Standards (FIPS) code, based on the alphabetical order of the place name within each state. If place names are duplicated within a state and they represent distinctly different areas, a separate code is assigned to each place name alphabetically by primary county in which each place is located, or if both places are in the same county, alphabetically by their legal description (for example, "city" before "village".)

CENSUS DESIGNATED PLACE (CDP)

Census designated places (CDPs) are delineated for each decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide census data for concentrations of population, housing, and commercial structures that are identifiable by name but are not within an incorporated place. CDP boundaries usually are defined in cooperation with state, local, and tribal officials. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or other legal entity boundary, have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary.

For Census 2000, for the first time, CDPs did not need to meet a minimum population threshold to qualify for tabulation of census data. For the 1990 census and earlier censuses, the U.S. Census Bureau required CDPs to qualify on the basis of various minimum population size criteria.

Beginning with the 1950 census, the U.S. Census Bureau, in cooperation with state and local governments (and American Indian tribal officials starting with the 1990 census,) identified and delineated boundaries and names for CDPs. In the data products issued in conjunction with Census 2000, the name of each such place is followed by "CDP," as was the case for the 1990 and 1980 censuses. In the data products issued in conjunction with the 1950, 1960, and 1970 censuses, these places were identified by "(U)," meaning "unincorporated place."

INCORPORATED PLACE

Incorporated places recognized in decennial census data products are those reported to the U.S. Census Bureau as legally in existence on January 1, 2000, under the laws of their respective states, as cities, boroughs, city and boroughs, municipalities, towns, and villages, with the following exceptions: The towns in the New England states, New York, and Wisconsin, and the boroughs in New York are recognized as minor civil divisions for decennial census purposes; the boroughs, city and boroughs (as in Juneau City and Borough,) and municipality (Anchorage) in Alaska are county equivalents for decennial census statistical presentation purposes.

All 566 incorporated municipalities in New Jersey are presented in Table 2.
