Company Name:

REFRESCO US, INC.

Job Title:

Maintenance Mechanic

Minimum Experience Required:

No experience requirement provided.

Job Description:

Description Key responsibilities of the role: - Perform preventive maintenance on mechanical systems to include disassembly, cleaning, reassembly, and calibration. - Analyze test results, machine error messages, and information obtained from operators in order to diagnose equipment problems. - Clean, lubricate, and adjust parts, equipment, and machinery. - Disassemble machinery and equipment to remove parts and make repairs. - Examine parts for defects such as breakage and excessive wear. - Observe and test the operation of machinery and equipment in order to diagnose malfunctions, using voltmeters and other testing devices. - Operate newly repaired machinery and equipment to verify the adequacy of repairs. - Reassemble equipment after completion of inspections, testing, or repairs. - Repair and maintain the operating condition of industrial production and processing machinery and equipment. - Repair and replace broken or malfunctioning components of machinery and equipment. - Study blueprints and manufacturers' manuals to determine correct installation and operation of machinery. - Cut and weld metal to repair broken metal parts, fabricate new parts, and assemble new equipment. - Demonstrate equipment functions and features to machine operators. - Record parts and materials used, and order or requisition new parts and materials as necessary. - Record repairs and maintenance performed. - Enter codes and instructions to program computer-controlled machinery. - Sometimes repairs or modifications are performed when blueprints and manufactures specifications are unavailable or incomplete. - Applies a wide variety of methods, procedures & techniques to lay out, install, align, repair, overhaul, & maintain various types of machines encompassing mechanical, hydraulic, pneumatic, and electrical systems & operation principles. - Utilizes safety and security practices and procedures following established rules and regulations and maintains a safe, clean, and secure work environment. - Communicate with management, engineers, mechanics, and equipment operators to advise them if there are any potential mechanical hazards. - Execute the maintenance work schedule as provided by his/her supervisor. Proper execution of the work schedule will require strategic decisions to ensure the scheduled work will be completed within the period scheduled. This effort requires the Lead to be aware of CIP, sanitation and other periods of downtime. - Keep the assigned Lead informed of all issues which may affect the operational capability of the area processes and equipment. - Seek assistance from the Lead on the work priority when confusion or more tasks than manpower exists. - Examine jobs to be done and determine scope and best way to accomplish the work. Consult with requester, maintenance planner, and/or supervisor when necessary. - Obtain one-lines, drawings, instructional manuals and special procedures, as needed, from files or other sources. Make any additional sketches, diagrams, etc., necessary to clarify the intent of the work order. - Ensure the safety needs are given a top priority in operations support and work execution. Some examples are Arc Flash/Shock Hazard safety, confined space entry, LOTO, hazardous materials, hand tool safe use, etc. - Have complete knowledge of plant's processes and packaging systems. - Adhere to Good Manufacturing Practices (GMPs) in the execution of the work schedule and operational support. Ensure the shop is maintained in a safe and orderly fashion. - Protect the integrity and quality of product at all times. - Attend meetings and supports continuous improvement initiatives. - Recommend equipment to be included in preventive maint
