DATE: July 8, 2011

SUBJECT: Enhanced Digital Driver License (EDDL)

The New Jersey Motor Vehicle Commission (MVC) is notifying its law enforcement partners of a minor discrepancy related to the security features of its newly produced Enhanced Digital Driver License (EDDL). In several of the MVC's law enforcement training sessions, an overlapping customer signature featured on the license was incorrectly identified as an overt security feature. Please note that the overlapping signature is not a security feature of the new driver license.

We ask that you please share this information with your law enforcement colleagues.
