

## RICHARD J. HUGHES JUSTICE COMPLEX

### ELEVATOR REPAIRS AND MODERNIZATION

The objective of this project is to make the necessary repairs to fourteen passenger and freight elevators within the Richard J. Hughes Justice Complex. The work will include upgrades to the existing system controller; disassembly, inspection and repairs to all braking systems, governors, hoist machines and car door components. The installation of new main and auxiliary car operating panels, ADA compliant hands free telephone, emergency recalls and lighting, in accordance with current codes and safety standards, are also included in this project.
