#### VI. PROJECT DEFINITION

#### A. BACKGROUND

Delaware and Raritan (D&R) Canal State Park is a linear park that's more than 70 miles long and is central New Jersey's most popular recreational corridor. When it opened in 1834, the Delaware and Raritan Canal provided a direct transportation link between the cities of Philadelphia and New York City. This new transportation corridor was a waterway connection that flowed through the heart of central New Jersey. What was once a thoroughfare for mule-powered canal boats, steam-powered vessels and pleasure boats of all kinds, is today a linear state park that offers a serene and surprising respite from the commotion of nearby highways and surrounding suburban communities. With more than 70 miles of flat, continuous path available for use, the D&R Canal State Park is a haven for cyclists, runners, hikers, and nature and history lovers of all kinds.

#### **Responsible Group Code Table**

The codes below are used in the schedule field "GRP" that identifies the group responsible for the activity. The table consists of groups in the Division of Property Management & Construction (DPMC), as well as groups outside of the DPMC that have responsibility for specific activities on a project that could delay the project if not completed in the time specified. For reporting purposes, the groups within the DPMC have been defined to the supervisory level of management (i.e., third level of management, the level below the Associate Director) to identify the "functional group" responsible for the activity.
