§ 34:1B-23. Legislative findings and determinations

The Legislature finds and determines that the economy of the State of New Jersey has suffered considerably in recent years because of the inflation and employment problems confronting this Nation; that the development of a strong motion picture and television industry would contribute substantially to the improvement of the State's economy; that the development of a strong motion picture and television industry would contribute to the social well-being of the State and its people; that New Jersey offers outstanding and unique human and natural resources for the development of a strong motion picture and television industry; that New Jersey's efforts and programs in the production of motion picture and television enjoy great public support and encouragement; and that the State requires an agency to promote the development of a viable State motion picture.
