Committee Chair Alstede opened the meeting at 11:01am.

Committee Chair Alstede reported that he is pleased to continue as chair of this committee and opened the meeting to staff's report.

Corey Piasecki, Principal Planner, referenced the memorandum the committee received in early September which provided a plan for the 2026 Monitoring Program and Recommendation Report (MPRR). Mr. Piasecki then provided a presentation which outlined:

James Humphries, Director of Planning, Science & GIS reported that Council staff anticipates providing a draft, unformatted, 2026 MPRR for the committee's review in March 2026.

Committee Member Van Abs commented on some potential recommendations noted in Council staff's memorandum.

There was also discussion regarding obtaining the most updated water supply and use data for the MPRR and Committee Member Van Abs noted that Steve Domber from the NJ Geological Survey is a valuable resource.

There was also discussion on funding the replacement of failing septic systems.

Committee Chair Alstede inquired about the committee's role.

Mr. Humphries responded that Council staff will provide written updates to committee members including draft documents as work progresses and noted that additional meetings for discussion may be necessary after the New Year. Mr. Humphries also noted that this MPRR will not be as intensive as 2018 since it is an update rather than a baseline review.

Committee Chair Alstede acknowledged and agreed with Member Van Abs' recommendations.

Committee Member Van Abs advised Council staff to send the committee the draft MPRR by indicator/category as they become available, rather than waiting to release the full report at once. Mr. Piasecki agreed.

In conclusion, Council Chair Richko complimented Mr. Piasecki on his report and looks forward to the updates.

The RMP Amendment Committee adjourned at 11:40am.
