

## **Sparta Township Highlands Petition for Plan Conformance: RMP Updates and Map Adjustments**

- Sparta Township has identified the existence of mapping errors in Highlands Regional Master Plan data layers.
- These errors are particularly evident in the Highlands Parcel layer, where an estimated 1,200 parcels were not included.
- In addition to errors in the Highlands' parcel layer, the Public Community Water Systems layer is missing areas of the Township that have been served with water since the early 1990's.
- These and other mapping errors are currently being assessed as part of the Highlands Initial Assessment Report.
- The final version of this report will identify any map adjustments or Regional Master Plan updates. The anticipated completion date of this report is mid January.
