

# MATERNAL & INFANT HEALTH INNOVATION CENTER

NJMIHIA is working to establish a Trenton-based Maternal and Infant Health Innovation Center (MIHIC) in partnership with with NJEDA, the Office of First Lady Tammy Murphy and the Office of Governor Phil Murphy. NJMIHIA will oversee the day-to-day operations of MIHIC, which will be a hub for innovation, workforce development, social services supports and clinical best practices.

The NJEDA Board approved three anchor tenants to lead the MIHIC in Trenton. These entities, will work collaboratively to provide services focused on addressing a myriad of issues around maternal and infant health in Trenton and across New Jersey, including pre- and post-natal clinical services; education programs to cultivate the perinatal workforce; and social and wrap-around services.

The Trenton community has informed the development of the MIHIC ensuring that it becomes a beacon of hope and change for Trenton, the state, the nation, and ultimately the world. NJMIHIA has worked to foster innovation and support the resident experience through its partnership with the NJEDA. The continued presence of community voice ensures we maintain the perspective of those with lived experience.

NJMIHIA's work to support the building of the MIHIC continues. In December 2024, NJEDA's board approved a Memorandum of Understanding with the Trenton Board of Education and the New Jersey Schools Development Authority to purchase property in downtown Trenton as the future home of the MIHIC, this is a critical step in its establishment.

## Site Plan

The Maternal and Infant Health Innovation Center site is located off Pennington Avenue and Warren Street, situated across from the Battle Monument in Trenton, NJ. This area is widely accessible to Trenton community members.

In 2025, the construction process for the MIHIC will commence. NJMIHIA is working closely with NJEDA and its architects and engineers to expedite this process.

The MIHIC will serve as a hub for a myriad of services, fostering partnerships with experts in innovation, clinical best practices in maternal and infant health, academic institutions, as well as collaborations with philanthropic organizations, businesses, and faith communities.
