Program Summary

This course is conducted in partnership with the National White Collar Crime Center under a grant from the Department of Justice. It will focus on the economic, health and safety issues surrounding the plethora of counterfeit products that are available on line and at flea markets, brick and mortar stores, and malls throughout the country. Participants will learn the importance of intellectual property and how it is protected through patent, trademark, copyright, and trade secrets through both federal and their own state laws. Experienced investigators will discuss best practices in investigating these crimes both locally and on social media, and emphasize the importance of working with brand owners and subject matter experts. Attendees will have the opportunity to view and handle counterfeit items and participate in a “Is it Real or is it Fake?” exercise. Investigators with the Department of Homeland Security will discuss partnering with local investigators and prosecutors on this issue. At the close of the training, attendees will break into small groups and examine a case study, working together to determine how their state laws could be used to investigate and prosecute an intellectual property theft case.

This program is only open to Assistant and Deputy Attorneys General in the Department of Law and Public Safety, assistant prosecutors, investigators, detectives and other members of law enforcement.
