

# SYNTHETIC MARIJUANA DANGEROUS AND DEADLY

## How dealers have changed tactics:

Hundreds of variants of synthetic marijuana are known to exist. The U.S. Drug Enforcement Administration banned the five most popular variants of the drug in March 2011, and New Jersey adopted the same ban in April 2011.

As a result, the dealers immediately began selling 18 new variants of the drug in New Jersey.

### Key:

- 18 New Variants of Synthetic Marijuana
- 5 Variants of Synthetic Marijuana banned by the U.S. D.E.A. on March 1, 2011
