Dear Reader:

New Jersey continues to rank as one of the safest states in the nation. There were 666 fatal crashes and 735 fatalities in 2003. The New Jersey State Police is committed in its effort, through enforcement and education of the motoring public, to reduce the number of people killed in motor vehicle accidents.

Our efforts in reducing motor vehicle deaths on our roadways must continue, as highway fatalities are still a leading cause of death in New Jersey and the nation. The nationwide death toll of 42,643 people represents an average of more than 116 deaths per day.

On the following pages you will find statistics of the fatal motor vehicle accident records compiled by the Fatal Accident Investigation Unit of the Division of State Police for 2003. This report constitutes a detailed look at the causes and results of fatal accidents throughout the state during 2003. Hopefully, the continued efforts and cooperation of the public, federal, state, and local agencies will help us maintain our traffic safety record in the years ahead.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph R. Fuentes".
