Please indicate what constitutes an assessment for MFP versus any other transition program.

An assessment for the MFP Program consists of a consumer specific review of the MFP eligibility criteria as well as a review of the Informed Consent document. The consumer (if there is no appointed guardian) decides whether or not to enroll in MFP. The IDT, in consultation with the guardian (if applicable) will make a recommendation for enrollment into MFP.

Please describe your difficulties for each target population.

ID/DD: projected transition numbers were based on the closure of Vineland DC. Due to the opposition of the closure, on August 25, 2011, the Governor of NJ issued a bill to establish a Task Force on the Closure of State Developmental Centers. Pending the Task Force's formation and report, staff at Vineland Developmental Center continued to work with families of these residents to move them from the institutional setting to a community placement as appropriate. As a result of the creation of the Closure Task Force, some families chose to not move forward with their transition plans. The Task Force evaluated the number of developmental centers that should be subject to closure and the timeframe for closure. Among the factors discussed was the system-wide declining census, the number of residents in each center whose Inter-disciplinary teams have recommended a move to community, and the readiness of provider agencies in each region to expand the community-based residential infrastructure to support residents leaving developmental centers. Recognizing that the Department of Human Services had previously identified the closure of Vineland Developmental Center, the Task Force expressed concern that the provider infrastructure in that region was not as robust as in the northern part of the state and that closing Vineland

may have a significant adverse impact on the local economy in Cumberland County, where the unemployment rate is already the highest in the State. Following this deliberative process, on July 23, 2012, by a majority vote of 4-0-1, the Task Force recommended the closure of North Jersey Developmental Center followed by Woodbridge Developmental Center within the next five years. The Department of Human Services is now tasked by law with executing these recommendations as soon as practicable, in accordance with a schedule that considers, first, the residents of the developmental centers identified for closure and. then, any appropriate operational concerns of the developmental centers and the community services system. With the change in closure from Vineland DC to 2 other DC's in the northern part of the state, change in the transition case manager infrastructure was required; decreasing the number of transition case managers at Vineland and adding new transition case managers at North Jersey and Woodbridge DC's. Of the 2318 individuals currently residing in NJ's 7 developmental centers, 707 individuals and/or their families are in agreement to transition to a community setting. ELD/PD: During the first half of the year, the MFP Nurse Liaisons spent a majority of their time in the field providing in-services to nursing facilities (over 300), county welfare agencies and the ADRC's in all 21 counties in the state. During this reporting period, the MFP Nurse Liaisons were able to fully focus on transitions but due to the overall lack of affordable and accessible housing, transition numbers for the elderly were difficult to meet. Secondly, due to MCO contracting issues with the current care management sites, some sites are no longer accepting new cases until the MCO's decide if they will be contracting with the already existing care management sites. Individuals cannot be transitioned without an assigned care manager. Thirdly, one care management site was closed due to legal issues. On a positive note, NJ was able to transition 803 individuals from institutions to community settings in CY 2012. 275 of those individuals met the MFP eligibility criteria.

[] N	lc
-------	----

11. Does your state have other nursing home transition programs that currently operate alongside the MFP program?

[x] Yes

Please approximate the number of individuals who transitioned through other transition programs during this reporting period

338

Please explain how these other transition programs differ from MFP, e.g. eligibility criteria.

The NJ Division of Aging Services (DoAS)operates a nursing home transition program through the Office of Community Choice Options (OCCO). There is no minimum residency requirement in an institution to transition to a community setting. An individual is not required to enroll in a HCBS waiver program in order to receive services in their home. Moreover, individuals may transition to an Assisted Living facility, which is not considered eligible community housing within the MFP Program.

[] No

12. Does your state have an ICF-MR transition program that currently operates alongside the MFP program?

View/Print Report

[x]	Yes
:	Please approximate the number of individuals who transitioned through other transition programs during this reporting period
	41
	Please explain how these other transition programs differ from MFP e.g. eligibility criteria.
	The NJ Division of Developmental Disabilities (DDD)transitions individuals from all 7 developemntal centers under the Olmstead Initiative. There is no minimum residency requirement nor ICF/MR eligibility requirement to transition to a community setting. Moreover, individuals may transition to a group home with 5 or more individuals which is not considered a qualified residence under MFP. Of the 65 transitions that occurred this reporting period, 54 were eligible for MFP.
[]	No
	intend to seek CMS approval to amend your annual or total Demonstration period transition arks in your approved OP?
Fw1	V
[x]	Yes
	Please explain the proposed changes to your transition benchmarks.
:	
	ID/DD: As a result of the change in the closure of the developmental centers, DDD must reduce its transition numbers from 229-147 for CY 2013 due to the pace and cost of the
	development of housing in the northern part of the state. NJ's MFP Program is utilizing
	rebalancing fund dollars for capital costs for the aquisition of or rehab of 4 person group
	home for individuals that meet the MFP eligibility criteria in an effort to increase housing
	stock in the that part of the state. The Community Living Education Project (CLEP) continue
:	to work with families who have family memebers in the DC's to educate them on the benefits of community living. Seeking Ways Out Together (SWOT) also continues to work with the DC
:	residents to educate and encourage them on transitioning to the community.

. Qualif	ied HCBS Expenditures
irant Repo	-
······································	equire modifying the Actual Level of Spending for last period?
[x]	Yes
	Please describe why the changes were necessary.

View/Print Report Page 11 of 63

The reports necessary to determine the actual level of spending for the last period were not received until after the Semi-Annual report needed to be submitted.

[] No

Qualified expenditures are total Medicaid HCBS expenditures (federal and state funds) for all Medicaid recipients (not just MFP participants), including: expenditures for all 1915c waiver programs, home health services, and personal care if provided as a State Plan optional service, as well as HCBS spending on MFP participants (qualified, demonstration and supplemental services), and HCBS capitated rate programs to the extent that HCBS spending can be separated from the total capitated rate.

Qualified HCBS Expenditure

Qualified HCBS Expenditures: Actual level of spending for each Calendar Year (CY) or State Fiscal Year (SFY) (column 4) is the sum of:

- 1) HCBS expenditures for all 1915c waivers and state plan HCBS services -- from CMS 64 data and
- 2) MFP expenditures -- from MFP Financial Reporting Forms A and B.

Grantees should enter total annual spending once each year. When making updates or corrections to actual spending amounts reported for the previous year, please check the 'yes' box at the top of this page to flag such changes.

Year	Target Level of Spending	% Annual Growth Projected	Total spending for the Calendar Year	% Annual Change (from Previous Year)	% of Target Reached

2016	\$1,336,939,843.00	2.00	\$0.00	0.00%	0.00%

Please explain your Year End rate of progress:

Source: Home Health and Personal Care Services are from the CMS-64 report and exclude costs for the 1915B and 1115 Personal Preference Waivers. Home and Community Based Services for the 1915(c) waivers are also from the CMS-64 report (1915C waiver pages). The DDD/CCW amounts are from a Shared Data Warehouse (SDW) query based on claims by date of service instead of the CMS-64 which is based on date of payment. Due to the retrospective reimbursement process for this waiver, the CMS-64, DDD waiver amount may spike when claims are adjusted for the final rates for prior periods. Under NJ's newly approved Comprehensive Medicaid Waiver, NJ will further amend its existing managed care organization (MCO) contracts to require management of all long-term care (LTC) services including Home and Community Based Services and Nursing Facility services for seniors and individuals with physical disabilities. This move to managed care is motivated by a desire to contain costs and reduce inefficiencies in the LTC system.

Do you intend to seek CMS approval to amend your annual benchmarks for Qualified HCBS Expenditures in your approved OP?

3. Please specify the period (CY or SFY) and the dates of your SFY here.

NJ's MFP Program is based upon calendar year. NJ's state fiscal year is from July 1st to June 30th.

4. Use this box to explain missing, incomplete, or other qualifications to the data reported on this page.

D. 1. Additional Benchmarks

Grant Report: 2012 Second Period (July - December) - NJ12SA02, New Jersey

Benchmark #1

Increases in an available and trained community workforce (i.e., direct interventions, undertaken by the State, to increase the quality, the quantity and the empowerment of direct care workers).

Measure #1

The number of agencies offering continuing education through use of the College of Direct Support will increase by at least 10 agencies per year from 2012 through 2016.

Please explain your Year End rate of progress:

The New Jersey Division of Developmental Disabilities has been making great progress with expanding workforce development efforts. The College of Direct Support has been an available DSP training option for provider agencies supporting individuals through the Community Care Waiver (CCW), NJ's Home and Community Based Services Waiver (HCBS) since January 2011. The CDS was piloted from 2008 - 2010. In the last quarter (July — September 2012) nearly 60 providers actively used the online training system to educate its staff with more than 20,000 lessons assigned. The Elizabeth M. Boggs Center on Developmental Disabilities continues to provide workshops to agencies on how to develop effective organization training plans that emphasizes the role of classroom and

View/Print Report

online training, mentoring, and career paths. Over the past several months the NJ Statewide Training and Advisory Committee developed a plan to make the CDS an available option for provider organizations to use in meeting employee Pre-Service Training requirements. The committee selected College of Direct Support Lessons, developed an online NJ Specific Lesson, and created a method of face-to-face follow-up discussion to be used by agencies to meet Overview of DD and Preventing Abuse & Neglect training mandates. The Division announced that effective January 1, 2013 provider agencies across the state would be able to use the CDS combined with face-toface competency-based discussion in lieu of the existing Pre-Service classroom training. This summer Thomas Edison State College conducted an Academic Program Review of the NJ Career Path for Direct Support Professionals, and approved it for up to 7 credits toward a bachelor's degree in Human Services, Social Sciences, or Psychology. Thomas Edison is currently in the process of developing a webpage to advertise this opportunity and provide information on enrollment, financial aid, transferring credit, and other tips to prospective students. Implementation of the College of Direct Support online training curriculum has also been very successful at the Developmental Centers, Training through the CDS was made available to DC staff to help develop competency and skills needed to support people with disabilities to successfully transition into the community and to prepare staff for future jobs in community-based settings. There are currently 391 staff assigned modules in the CDS. These staff have the option to take individual modules of interest or pursue the NJ Career Path which can lead to college credit. To further promote the CDS the DCs have developed posters to be placed around campus to inform staff of the training opportunities. In addition to the training of frontline workers and supervisors, DDD has started to implement use of the CDS College of Frontline Supervision and Management in the training of Case Manager Supervisors. A model combining online learning with group discussion during supervisor meetings was piloted with great success. It is anticipated that this will be rolled out across the state in the coming year.

Benchmark #2

Improvements in quality management systems (i.e., direct interventions undertaken by the State to ensure the health and welfare of participants is protected while also maintaining consumer choice).

Measure #1

Risk assessments will be completed for 100% of MFP Participants. Risk factors will be documented in the Health and Safety Risk Summary. As part of annual service planning, DDD will complete risk assessments on all projected MFP transitions.

Please explain your Year End rate of progress:

An individual cannot transition to the community without an Adaptive Behavior Summary/Health Safety, Risk (ABS/HSRS) assessment being completed. An ABS/HSRS was completed for 100% of the individuals that transitioned to the community from a DC during this reporting period. Risk assessments for nursing facility transitions are done at the IDT meeting where the health and safety of the participant is addressed. The Plan of Care, developed by the care manager, has risks identified as well as a back-up plan for the participant.

Measure #2

Each year a targeted number of on-site reviews of case management files will be assessed for compliance with quality assurance requirements. MFP cases will be included in audit.

2016	366.00	0.00	0.00	0.00	0.00%	0.00%	0.00%

Please explain your Year End rate of progress:

A round of QA visits consists of all care management sites in the 21 counties in NJ. A round takes approximately 18 months to complete. A perentage of the files are audited according to the number of participants being supported by that particular care management site. Round 4 ended in April 2012. From January 2012 to April 2012, 130 files were audited. Round 5 remains on hold until it can be determined who the care management sites will be as Medicaid in NJ, including the 1915c waivers, will be managed by Managed Care Organizations. Face to face interviews were not done with the participants in the latest QA visits as CMS felt that they are not valid as the participant may feel uncomfortable with a State official and the care manager present. The Division of Aging QA unit has found that the satisfaction survey sent to the participant is an accurate way to determine consumer satisfaction with the delivery of services.

Benchmark #3

Interagency and public/private collaboration (i.e., direct interventions undertaken by the State to achieve a higher level of collaboration with the private entities, consumer and advocacy organizations, and the institutional providers needed to achieve a rebalanced long-term care system).

View/Print Report Page 15 of 63

Measure #1

MFP Statewide Housing Coordinator will meet with at least 15 PHAs per year.

Please explain your Year End rate of progress:

NJ's MFP Employment Specialist was hired in September 2012. Upon hire she immediately began to work on developing the Employment Resource Packets and had them completed by November 2012. In each Employment Packet is an Employment Survey that is designed as an initial assessment to help determine the best way to approach the employment concerns of each individual. Prior to the development of the Employment Resource Packets, the MFP Employment Specialist contacted any individual that expressed an interest in work/volunteerism via questions 31 and 32 of their Quality of Life survey. At present, there are 30 individuals that expressed an interest in work/volunteerism and all 30 individuals have now received an Employment Resource Packet as well as an Employment Questionnaire. Beginning in 2013, the MFP Employment Specialist will meet with individuals expressing an interest in work/volunteerism in the nursing facility prior to discharge to discuss their employment options. Peer mentors will be utilized to also assist in encouraging transitioning individuals to explore the world of work/volunteerism by working one day per week in a specified nursing facility; one in the northern part of the state and one in the southern part of the state. As an "Employment First" state, NJ believes competitive employment in the general workforce is the first and preferred post education outcome for people with any type of disability. "Employment First" creates an expectation that people with disabilities, like everyone else, will have to "opt out" of employment rather than "opt in"; it presumes that all people with disabilities

ID/DD: projected number of transitions were based on the closure of Vineland DC. Due to public opposition to the closure of this DC, the Governor of NJ issued a conditional veto and a bill to estblish a Task force to investigate the closure of state developmental centers. As a result of the development of this Task Force, some families chose not to move forward with their plans to transition their family members until the final report from the Task force was issued. Due to the opposition of the closure, on August 25, 2011, the Governor of NJ issued a bill to establish a Task Force on the Closure of State Developmental Centers. The Task Force evaluated the number of developmental centers that should be subject to closure and the timeframe for closure. Among the factors discussed was the system-wide declining census, the number of residents in each center whose Inter-disciplinary teams have recommended a move to community, and the readiness of provider agencies in each region to expand the community-based residential infrastructure to support residents leaving developmental centers. Recognizing that the Department of Human Services had previously identified the closure of Vineland Developmental Center, the Task Force expressed concern that the provider infrastructure in that region was not as robust as in the northern part of the state and that closing Vineland may have a significant adverse impact on the local economy in Cumberland County, where the unemployment rate is already the highest in the State. Following this deliberative process, on July 23, 2012, by a majority vote of 4-0-1, the Task Force recommended the closure of North Jersey Developmental Center followed by Woodbridge Developmental Center within the next five years. The Department of Human Services is now tasked by law with executing these recommendations as soon as practicable, in accordance with a schedule that considers, first, the residents of the developmental centers identified for closure and, then, any appropriate operational concerns of the developmental centers and the community services system. ELD/PD: Due to the overall lack of affordable and accessible housing, transition numbers for the elderly were difficult to meet. Secondly, due to MCO contracting issues with the current care management sites, some sites are no longer accepting new cases until the MCO's decide if they will be

contracting with the already existing care management sites. Individuals cannot be transitioned without an assigned care manager. Thirdly, one care management site was closed due to legal issues.

What are you doing to address the challenges?

Family challenges: DDD continues to partner with the Community Living Education Project (CLEP) to educate families about the benefits of community living and highlighting transition success stories. DDD also continues to partner with Seeking Ways Out Together (SWOT), a peer group that educates and encourages DC residents to transiton to the community based upon peer experiences and knowledge. Housing Challenges: DDD is soliciting Letters of Interest from qualified providers for the development of housing for individuals with developmental disabilities. Letters will be accepted from private not-for-profit or for-profit qualified provider agencies, for the development of barrier-free group homes. Each housing unit will have a maximum level of service of four (4) individuals. Up to \$250,000 may be awarded through this RLI towards capital costs for development of each group home. Care Management Challenges: Division of Aging is working with the current care management sites and the MCO's to resolve this issue.

Of the MDS 3.0 Section Q referrals ever received by the MFP program, number of individuals who subsequently enrolled in MFP and transitioned to the community during this reporting period. Total 9 11. What types of activities were supported by ADRC/MFP Supplemental Funding Opportunity C grant funds during this reporting period, awarded in 2010 to 25 MFP grantee states to support activities that help to expand the capacity of ADRCs to assist with MFP transition efforts, and partner in utilizing the revised Minimum Data Set (MDS) 3.0 Section Q referrals? Choose from the list below. Check "Not Applicable" if your State did not receive this grant. [] Develop or improve Section Q referral tracking systems—electronic or other [] Education and outreach to nursing facility or other LTC system staff to generate referrals to MFP or other transition programs [x] Develop or expand options counseling or transition planning and assistance [] Train current or new ADRC staff to do transition planning in MFP or other transition programs [x] Expansion of ADRC program in State Other activities – please describe in text box Not applicable – state did not receive this grant 12. Please describe progress in implementing the activities identified in Question # 11 during this past reporting period, and how they have helped your state achieve MFP goals. In addition, describe the results or outcomes of these activities; if you specified numerical targets in your grant proposal, please provide counts during the reporting period. In NJ, the responsibility of transitioning individuals from nursing facilities to community settings is the sole function of the Division of Aging Services within the Office of Community Choice Options (OCCO). ADRC's are not the local contact

agency. The NJ MFP team has partnered with the ADRC's and work closely with the I&A staff to better serve the individuals who have transitioned to the community through the MFP Program in an effort to prevent reinstitutionalization. New Jersey's ADRC has been awarded \$118,000 by the U.S. Department of Health and Human Services. The funding will standardize 'options counseling' to ensure that consumers get the guidance they need in selecting appropriate programs or services. The federal funding will be used to instruct counselors in the ADRCs who help individuals and their caregivers identify and access long term services and supports. Staff will undergo training that meets national performance standards to achieve certification requirements. The ADRC in NJ is a joint initiative between the Department of Human Services and the county Area Agencies on Aging - in partnership with other state and local governmental and nonprofit agencies. This past May, the ADRC became operational in each of the state's 21 counties, which created a ready-resource for aging residents and individuals with disabilities to seek information or referrals and inquire about services, such as personal care, home delivered meals and prescription assistance. The ADRCs provide consumers with immediate access to community programs such as meals-on-wheels, housekeeping, specialized transportation, assisted living and nursing home care. It also connects seniors and adults with disabilities with work and volunteer opportunities, insurance program options, financial services, health promotion and disease prevention programs, housing, crisis intervention, and other home and community-based programs. The ADRC website - www.adrcnj.org - has thousands of national, state and local resources, and other consumer-friendly tools including Google translation and mapping features. The site is Section 508 compliant for improved access to individuals with vision impairments.

13. Please describe any barriers or challenges in implementing the activities proposed in your grant application and the steps you are taking to resolve them.

ID/DD: As a result of the change in the closure of the developmental centers, DDD must reduce its transition numbers from 229-147 for CY 2013 due to the pace and cost of the development of housing in the northern part of the state. NJ's MFP Program is utilizing rebalancing fund dollars for capital costs for the aquisition of or rehab of 4 person group home for individuals that meet the MFP eligibility criteria in an effort to increase housing stock in that part of the state. The Community Living Education Project (CLEP) continue to work with families who have family memebers in the DC's to educate them on the benefits of community living. Seeking Ways Out Together (SWOT) also continues to work with the DC residents to educate and encourage them on transitioning to the community.

[x]	[]	[]	[x]	[]

NJ's MFP Program continues its partnership with the Ombudsman Office (OOIE) to implement an education and marketing plan for current nursing home residents and their families. This marketing campaign will focus on "A Nursing Home is not Your Only Option". This will be accomplished by implementing a comprehensive, multi-layered marketing and outreach plan that features strategies for facility-based marketing and education as well as focused messaging for the larger community. This will be accomplished in the first half of 2013.

[x] Implementation of statewide media campaign

Populations Affected

Elderly	MR/DD	MI	PD	NA
[x]	[]	[]	[x]	[]

In NJ's MFP budget, funding has been set aside for web and publication design costs to develop an interactive web page to support the MFP Program such as a bulletin board/discussion forum for MFP participants and their families. Funding is also set aside for a video production of a PSA. Newspaper and radio advertising are also being considered. The statewide media campaign will begin in earnest beginning in 2013.

- [] Involvement of stakeholder state agencies in outreach and marketing

	- 1	NONE

- 2. What significant challenges did your program experience in conducting outreach, marketing, and education activities during the reporting period?
 - [] Development of print materials

- [] Implementation of a localized / targeted media campaign
- [x] Implementation of a statewide media campaign

Populations Affected

Elderly	MR/DD	MI	PD	NA
[x]	[]	[]	[x]	[]

Please describe by target population

OOIE received permission to hire their MFP staff during this reporting period. Now that staff have been hired, the statewide media campaign can begin to be developed and implemented.

What are you doing to address the challenges?

OOIE has received permission to hire the needed staff to work on implementing the statewide media campaign.

Current Issue Status: Resolved

How was it resolved?

Permission granted by the Department of Treasury to hire OOIE staff.

- [] Involvement of stakeholder state agencies in outreach and marketing
- [x] Involvement of discharge staff at facilities

Populations Affected

Elderly MR/DD		MI	PD	NA NA	
[x]	[x]	[]	[x]	[]	

Please describe by target population

ELD/PD: At times nursing facility staff are not receptive to residents receiving information about community choice options. ID/DD: At times staff at the DC's are not totally onboard with individuals transitioning to the community due to their health and safety needs. They become very attached to the individuals they have supported and known for years.

What are you doing to address the challenges?

ELD/PD: NJ's MFP Program continues to partner with OOIE to ensure information about community choice options is made available to all nursing facility residents. ID/DD: DDD continues to partner with and fund the Community Living Education Project (CLEP). Since 1991 CLEP has educated hundreds of individuals with developmental disabilities, families, and staff about community living.

Current Issue Status: In Progress

Please explain the nature of consumers' and families' involvement in MFP during this period and how it contributed to MFP goals and benchmarks, or informed MFP and LTC policies

Consumers and families continue to participant in the Olmstead Advisory Council 4 times per year. Approximaely 95% of the Olmstead transitons are eligible for MFP. The Seeking Ways Out Together (SWOT) team, formed in 1994, continues to provide information and peer support and to use their unique life experiences to help individuals prepare for community living. SWOT has provided community information and peer support and counseling during the proposed closure of Vineland DC to 90 residents from 5/2011 to 9/2012. The SWOT Team has begun to prepare to provide services to residents during the closure of North Jersey DC. The Director of SWOT remains a member of NJ's MFP Partnership Group. NJ's MFP Partnership Group also includes 2 family members of individuals who have participated in MFP. They have contributed ideas regarding the execution of the QoL survey as well as the value of the MFP Program.

Please explain the nature of others' (non-consumers) involvement in MFP during this period and how it contributed to MFP goals and benchmarks, or informed MFP and LTC policies.

NJ's MFP Partnership Group does not meet during the summer months and therefore met in September and October. At the October meeting, the group chose 2 Co-Chairs who are responsible for setting the agenda and conducting the meeting. One of the Co-Chairs is an Executive Director of a RIL and the other Co-Chair is a consumer/advocate. Also at the October meeting, the members reviewed 3 new Partnership Group applications and decided to approve 2 individuals for membership in the group and decided the 3rd individual needed to come before the group to be interviewed. The interview will occur at the January meeting. The group did not meet during the month of November due to the aftermath of Hurricane Sandy, 4 state holidays and the MFP Project Director's meeting in Baltimore. The group also did not meet in December as a meeting date where everyone could attend could not be obtained. The next scheduled meeting date for the group is January 25, 2013. The MFP Partnership Group continues to accept applications for membership.

2.	On average,	how many	consumers,	families, a	and consumer	advocates	attended	each meeting	of the MFP

	program make any progress during the reporting period in building a collaborative relationship of the following housing agencies or organizations?
[x]	State agency that sets housing policies
	Please describe
	One of NJ's MFP partners, DDD, continues to maintain a relationship with the NJ Housing and Mortgage Finance Agency. Since DDD has provided housing for individuals with ID/DD for a long period of time, NJHMFA continues to be instrumental in assisting DDD with creating the funding needed to provide housing for individuals transitioning from DC's to the community.

Γ	1	State	housing	finance	agency
		Jui 10	110451114	THE COLUMN	agency

[x] Public housing agency(ies)

Please describe

The MFP Statewide Housing Coordinator has been visiting at least eight Public Housing Authorities every 6 months. As a result of these visits, relationships have been formed and a few have contacted the Coordinator when an opportunity arose within their PHA.

[X] Non-profit agencies involved in housing issues

Please describe

NJ's MFP Program continues to maintain a relationship with the Supportive Housing Association (SHA) of NJ. This is a statewide, nonprofit organization whose mission is to promote and maintain a strong supportive housing industry in NJ serving persons with special needs through strengthening the capacity member organizations to provide supportive housing services. The MFP Statewide Housing Coordinator attends the regularly scheduled SHA meetings to network and develop relationships with experts in the housing field. Starting in January, 2 SHA members respresenting housing developement organizations will become members of the MFP Partnership Group.

[x] Other housing organizations (such as landlords, realtors, lenders and mortgage brokers)

Please describe

The MFP Statewide Housing Coordinator continues to contact landlords throughout the state to maintain a spreadsheet of available, accessible and affordable rentals in the state of NJ. The spreadsheet is forwarded to the OCCO MFP Nurse Liaisons to share with the OCCO Community Choice Counselors who then share it with those individuals wishing to transition to the community from a nursing home setting. The MFP Statewide Housing Coordinator visited affordable developments in Monmouth, Ocean, Mercer, Burlington, Hunterdon, Somerset and Union Counties between 7/12-12/12. These visits gave her an opportunity to see affordable rentals in each county and learn what new developments may be coming. It also provides an opportunity to discuss MFP and the need for affordable, accessible rentals throughout NJ.

[] None

5. Has your program experienced significant challenges in building a collaborative relationship with any of the agencies involved in setting state housing policies, financing, or implementation of housing programs?

[x] Yes

Please describe

Dealing with housing authorities on the local level continues to be challenging. The local PHA's have wait lists that are often closed or the list has hundreads of names and are years long. Most local housing authorities have preferences already and often question the fairness of adding preference points to individuals leaving DC's or nursing facilities. PHA's have stated that there is already such a great need for housing as evidenced by long wait lists, making it

Page 34 of 63 View/Print Report

for the elde	difficult to justify changing preference points at this time. Affordable and accessible housin for the elderly and physically disabled in the state of NJ has been severly impacted due to the aftermath of Hurricane Sandy.

New Jersey's request for a new Medicaid section 1115(a)demonstration, entitled "New Jersey Comprehensive Waiver"(NJCW)was approved by the Centers for Medicare & Medicaid Services (CMS) effective from October 1, 2012 through June 30, 2017. Under this demonstration, New Jersey will operate a statewide health reform effort that will expand existing managed care programs to include managed long term services and supports (MLTSS) and expand home and community based services. This demonstration builds upon existing managed acute and primary care programs and established provider networks. The 1115 demonstration also combines, under a single demonstration, authority for several existing Medicaid waivers associated with NJ's MFP Program. In addition, it establishes a funding pool to promote health delivery system transformation. The following existing 1915 (c) Home and Community Based Services fee-for-service waivers associated with NJ's MFP Program will be transitioned to managed care: 1. Global Options (GO) (which serves Medicaid beneficiaries over the age of 21 who meet the nursing facility level of care for physical disabilities in the community); 2. Community Resources for People with Disabilities (CRPD) (which serves Medicaid beneficiaries of all ages who may require a nursing facility level of care and cannot complete at least 3 activities of daily living (ADL)); 3. Traumatic Brain Injury (TBI) (which serves Medicaid beneficiaries ages 21 to 64 with traumatic brain injury who require assistance with at least 3 ADLs in the community); Effective January 2014 or a date thereafter (depending on readiness), the state will implement MLTSS by allowing the MCOs to manage HCBS and behavioral health services for enrollees in all of these programs. The new demonstration will also provide additional community support and coordination services for certain low income populations, including individuals eligible under the state plan between the ages of 6 and 21 who meet the ICF/MR institutional level of care; individuals with Pervasive Developmental Disorders including Medicaid children up to age 13; and individuals eligible under the state plan over the age of 21 with intellectual disabilities

View/Print Report Page 35 of 63

	who have completed their educational entitlement and meet the ICF/MR level of care. Und the demonstration the state will streamline eligibility requirements for long term care with goal of simplifying Medicaid eligibility requirements while assuring program integrity.

As of this reporting period, 111 agencies are utilizing the College of Direct Support curriculum. The rate of progress has been excellent. The pilot implementation showed an overall reduction in DSP turnover rate. Implementation of the College of Direct Support online training curriculum has also been very successful at the Developmental Centers. Training through the CDS was made available to DC staff to help develop competency and skills needed to support people with disabilities to successfully transition into community and to prepare staff for future jobs in community-based settings. There are currently 391 staff assigned modules in the CDS. These staff have the option to take individual modules of interest or pursue the NJ Career Path which can lead to college credit. To further promote the CDS the DCs have developed posters to be placed around campus to inform staff of the training opportunities.

 - [x] Insufficient supply of HCBS providers

Populations Affected

Elderiy	MR/DD	MI	PD	NA NA
[x]	[x]	[]	[x]	[]

Please describe by target population

There continues to be a lack of HCBS provider agencies in some counties in the state.

What are you doing to address the challenges?

Through the Division of Aging Services, consumers are continued to be encouraged to hire Participant Employee Providers as well as HCBS providers. An ongoing opportunity still exists through the Division of Developmental Disabilities (DDD) to become a qualified provider of HCBS through the following initiatives: Individualized Community Supports and Services RFQ; Self-Directed Services Initiative. DDD has approximately 1100 qualified providers and programs authorized to render HCBS to those individuals eligible for DDD waiver services. ELD/PD: Division of Aging Services has an ongoing opportunity for providers to apply to become an approved HCBS provider.

Please describe by target population

DDD completes 30, 60, 90 180, 1yr, 2 yr and 3 yr reviews on all individuals discharged from the DC's. NJ's MFP Quality Assurance Specialist revised the current Olmstead Review and separated it into 2 different surveys: Self-Report and Observation. The Self-Report Survey is to be used if the individual is verbal or able to communicate through sign language or an augmentative device. If the individual is unable to answer the questions, then the Observation Survey is to be used. The Olmstead Review will address the following core indicators: home satisfaction, home staff satisfaction, day program satisfaction, day program staff satisfaction, making new friends, community participation, contact with friends and family, percentage of individuals that have identified issues that need resolving and the effectiveness of the newly developed Resource Teams. For those individuals transitioning from nursing facilities, NJ's MFP Program will re-institute face to face visits with these MFP participants who are receiving waiver services and tailor a version of DDD's Olmstead Review to be utilized for this population. Issues will be identified and the MFP QAS will track the issues until a resolution has occurred in an effort to deter re-institutionalization. NJ's MFP Program has received technical assistance from Jason Rachel from Truven in the development and review of these surveys.

Please describe by target population

NJ's MFP Program has just received approval from CMS to develop 3 Resource Teams whose primary goal will be to enhance overall support skill levels and reduce the risks of critical incidents and reinstitutionalizations for those individuals that meet the MFP eligibility criiteria. The 3 Resource Teams are as follows: Behavioral Team: its purpose is to provide behavioral/mental health services for individuals placed from institutional settings into community residences who may present behavioral challenges that could threaten their continued placement. Behavioral/mental health supports provided will focus primarily on proactive or preventive interventions but may also involve crisis response. Nutritional Management Team; its purpose is to provide specialized habilitation services for individuals being placed from institutional settings into community residences. These services include clinical assessment, development of treatment plans, training and monitoring for individuals experiencing significant problems in the areas of physical and/or nutritional management. Training Team: its purpose is to increase the competence of provider agency staff who will be serving individuals placed in community programs from institutional settings. Specific skill areas of competence to be enhanced are Physical/Nutritional Management and Behavioral Support with the primary goal of enhancing overall support skill levels and reducing the risks of critical incidents and reinstitutionalization. Service providers may request retraining anytime they feel it is needed. Further, through agreements with providers, the Training

Team may also provide some quality assurance like functions to assess if there is a need for refresher or additional training. This would involve observational visits to programs and an assessment of levels of competence being demonstrated in the target areas. Presentations may also be given to parents, guardians, and family members of individuals who are living in institutions and are considering community placement. The Training Team may also work with executive management of the Division of Developmental Disabilities and the community provider network to enhance current training requirements for service providers based on training outcomes assessed by the Team. Benchmarks are an integral part of evaluating the effectiveness/impact of these services. Examples of areas which the New Jersey Division of Developmental Disabilities could evaluate include, but are not limited to: • Number of unusual incident reports submitted pre/post implementation. • Number of individuals who experience re-institutionalization pre/post implementation. • Number of individuals/guardians who request community placement pre/post implementation. • Number of interactions with contracted crisis intervention services pre/post implementation.

[]	Enhanced a critical incident reporting and tracking system. A critical incident (e.g., abuse, neglect and exploitation) is an event that could bring harm, or create potential harm, to a waiver participant.

	ELD/PD: Division of Aging Services (DoAS) tracks critical incidents by aggregate numbers. There are no names attached to the critical incident reports; just the incident with a randomly selected, computer generated ID number. In order to obtain this information, the DoAS Quality Managment Unit would have to contact each care management site separately and inquire as to whether they submitted a critical incident during this reporting period. If so, the names would have to be obtained and cross referenced with the MFP participants that transitoned during this reporting period. The MFP team has been working with Mercer Consulting in writing contract language for the MCO's when they begin to render MLTSS. The contact language will include the capturing of this infoirmation for MFP participants.

E. 9. Housing for Participants

Grant Report: 2012 Second Period (July - December) - NJ12SA02, New Jersey

- **1.** What notable achievements in improving housing options for MFP participants did your program accomplish during the reporting period?
 - [x] Developed inventory of affordable and accessible housing

Populations Affected

Elderly	MR/DD	MI	PD	NA
[x]	[]	[]	[x]	[]

Please describe the achievements

The MFP Statewide Housing Coordinator continues to contact apartment complexes on a regular basis to update and maintain a spreadsheet of available, accessible and affordable rentals in the state of NJ. This spreadsheet is forwarded to the OCCO MFP Nurse Liaisons to share with the Community Choice Counselors in their regional offices. DDD Program Developers maintain an inventory of available housing and work closely with the Olmstead

Unit to find suitable housing for those individuals transitioning out of a developemental center based upon the individual's choice of residential location.

[x] Developed local or state coalitions of housing and human service organizations to identify needs and/or create housing-related initiatives

Populations Affected

Elderly	MR/DD	MI	PD	NA
[]	[x]	[]	[]	[]

Please describe the achievements

Under the Special Needs Housing Partnership Loan Program (SNHPLP), the New Jersey Housing and Mortgage Finance Agency (NJHMFA) and the New Jersey Department of Community Affairs (DCA), will provide financing to create permanent supportive housing and community residences for individuals with developmental disabilities. Loan proceeds may be used for the acquisition and rehabilitation of existing 3-4 bedroom single-family houses, first floor 3-4 bedroom condominiums as well as other types of housing arrangements, limited to up to four (4) individuals and be completed within six (6) months of mortgage closing. New construction while not encouraged will be considered on a case by case basis provided the Sponsor is able to meet the 6 month threshold requirement. This Partnership has been ramping up with 27 projects currently being developed with 105 beds being committed. There are 82 projects in the pipeline. 14 counties and 31 municipalities across NJ are participating in this Partnership.

[x] Developed statewide housing registry

Populations Affected

Elderly	MR/DD	MI	PD	NA NA
[x]	[x]	[x]	[]	[]

Please describe the achievements

The NJ Housing Resource Center is a partnership of the NJ Department of Community Affairs, Division of Disability Services and the NJ Housing and Mortgage Finance Agency. NJHRC provides an online tool for finding and listing affordable housing and helping individuals with disabilities find housing options. NJ's MFP Statewide Housing Coordinator has been in contact with the Coordinator of this site from NJHMFA. The Coordinator is willing to work with NJ's MFP Program and stakeholders to improve this online tool.

- [] Implemented new home ownership initiatives
- [x] Improved funding or resources for developing assistive technology related to housing

Please describe the achievements

Since July 2009, DDD has offered a process by which agencies can become qualified to provide housing and residential supports for individuals transitioning from a DC to a community setting through a Request for Qualification (RFQ) process entitled "Individualized Community Supports and Services" RFQ. This continues to be an ongoing opportunity within DDD. In January, DDD will be soliciting Letters of Interest from qualified providers for the development of housing for individuals with developmental disabilities. Letters will be accepted from private not-for-profit or for-profit qualified provider agencies, for the development of barrier-free group homes. Each housing unit will have a maximum level of service of four (4) individuals. Utilizing MFP rebalancing fund dollars, up to \$250,000 may be awarded through this RLI towards capital costs for development of each group home. Agencies may request funds to develop up to four homes, but no more than \$250,000 of funds available through this RLI may be used for any one home.

[x] Increased/Improved funding for home modifications

Please describe the challenges

NJ received 100 NED vouchers of which 90 individuals have been leased. More transitions could be accomplished if more vouchers were made available.

What are you doing to address the challenges?

The MFP Statewide Housing Coordinator continues to meet with PHA's on a regular basis to establish and maintain working relationships, monitor Wait Lists and identify affordable and accessible units.

Current Issue Status: In Progress

Please describe the challenges

MFP enrollees in nursing facilities have difficulty getting out to view the affordable and accessible apartments available to them due to lack of transportation. Even though the nursing facility social workers are responsible for assisting their residents in finding housing, that does not always happen and the individual must either rent the apartment sight unseen or rely on Internet pictures.

What are you doing to address the challenges?

CMS approved the hiring of an MFP Housing Specialist to assist the nursing facility residents to secure accessible and affordable housing by providing 1:1 support during their housing

4. Were there any other developments or progress this period toward increasing the availability of employment services and supports for MFP participants?

NJ's MFP Employment Specialist was hired in September 2012. Upon hire she immediately began to work on developing the Employment Resource Packets and had them completed by November 2012. In each Employment Packet is an Employment Survey that is designed as an initial assessment to help determine the best way to approach the employment concerns of each individual. Prior to the development of the Employment Resource Packets, the MFP Employment Specialist contacted any individual that expressed an interset in work/volunteerism via questions 31 and 32 of their Quality of Life survey. At present, there are 30 individuals that expressed an interest in work/volunteerism and all 30 individuals have now received an Employment Resource Packet as well as an Employment Questionnaire. Beginning in 2013, the MFP Employment Specialist will meet with individuals expressing an interest in work/volunteerism in the nursing facility prior to discharge to discuss their employment options. Peer mentors will be utilized to also assist in encouraging transitioning individuals to explore the world of work/volunteerism by working one day per week in a specified nursing facility; one in the northern part of the state and one in the southern part of the state. As an "Employment First" state. NJ believes competitive employment in the general workforce is the first and preferred post education outcome for people with any type of disability. "Employment First" creates an expectation that people with disabilities, like everyone else, will have to "opt out" of employment rather than "opt in"; it presumes that all people with disabilities can and should work in their communities and the benefits are the safety net that supplements employment, not the other way around. In addition, building upon a public/private initiative called "DiscoverAbility", the Departments of Human Services and Labor and Workforce Development, together with hundreds of businesses statewide, will intensify efforts to collaboratively provide the services and training necessary for individuals with disabilities to prepare for and find and retain employment.

- 2. What other new developments, policies, or programs (in your state's long-term care system) have occurred that are not MFP initiatives, but have affected the MFP demonstration program's transition efforts?
 - [x] Institutional closure/downsizing initiative

Please describe

On August 25, 2011, the Governor of NJ issued a bill to establish a Task Force on the Closure of State Developmental Centers. The Task Force evaluated the number of developmental centers that should be subject to closure and the timeframe for closure. Among the factors discussed was the system-wide declining census, the number of residents in each center whose Inter-disciplinary teams have recommended a move to community, and the readiness of provider agencies in each region to expand the community-based residential infrastructure to support residents leaving developmental centers. Recognizing that the Department of Human Services had previously identified the closure of Vineland Developmental Center, the Task Force expressed concern that the provider infrastructure in that region was not as robust as in the northern part of the state and that closing Vineland may have a significant adverse impact on the local economy in Cumberland County, where the unemployment rate is already the highest in the State. Following this deliberative process, on July 23, 2012, by a majority vote of 4-0-1, the Task Force recommended the closure of North Jersey Developmental Center followed by Woodbridge Developmental Center within the next five years. The Department of Human Services is now tasked by law with executing these recommendations as soon as practicable, in accordance with a schedule that considers, first, the residents of the developmental centers identified for closure and, then, any appropriate operational concerns of the developmental centers and the community services system. Of the 2318 individuals currently residing in NJ's 7 developmental centers, 707 individuals and/or their families are in agreement to transition to a community setting.

- [] New/revised CON policies for LTC institutions
- [] New or expanded nursing home diversion program
- [x] Expanded single point-of-entry/ADRC system

Please describe

New Jersey's ADRC has been awarded \$118,000 by the U.S. Department of Health and Human Services. The funding will standardize 'options counseling' to ensure that consumers get the guidance they need in selecting appropriate programs or services. The federal funding will be used to instruct counselors in the ADRCs who help individuals and their caregivers identify and access long term services and supports. Staff will undergo training that meets national performance standards to achieve certification requirements. The ADRC in NJ is a joint initiative between the Department of Human Services and the county Area Agencies on Aging - in partnership with other state and local governmental and nonprofit agencies. This past May, the ADRC became operational in each of the state's 21 counties, which created a ready-resource for aging residents and individuals with disabilities to seek information or referrals and inquire about services, such as personal care, home delivered meals and prescription assistance.

[]	
	New Medicaid State Plan options (DRA or other)
[x]	New managed LTC options (PACE, SNP, other), or mandatory enrollment in managed LTC
	Please describe
	Under NJ's Comprehensive Medicaid Waiver, on January 1, 2013, the state will further amend its existing managed care organization (MCO) contracts to require management of all long-term care (LTC) services including Home and Community Based Services and Nursing Facility services for seniors and individuals with physical disabilities. This move to managed care is motivated by a desire to contain costs and reduce inefficiencies in the LTC system. PACE: NJ received approval from its CMS Project Officer to add PACE to its MFP Program. Once NJ amends its existing managed care organization (MCO) contracts to require management of all long-term care (LTC) services including HCBS by the MCO's, NJ will begin to submit claims for an enhanced FMAP on a percentage of the PACE capitated rate that is attributed to HCBS.

Yes No -Specific Technical Assistance Port: 2012 Second Period (July - December) - NJ12SA02, New Jersey All Lessons & MFP-related LTC System Change

New Jersey remains committed to the success of the MFP Demonstration Project through its committed partners; Division Developmental Disabilites, Division of Aging Services, Division of Disability Services and the Office of the Ombudsman. This committment is emphasized by the increase in NJ's transition numbers for 2011 and 2012. Between 7/1/2008 and 12/31/2010, NJ transitioned 158 individuals. Between 1/1/2011 and 12/31/2012, NJ transitioned 468 individuals. 75% of NJ's transitons occurred during this time frame. With the hiring of dedicated MFP staff beginning in the fall of 2010, NJ is able to continue to execute the primary objectives of the MFP Demonstration Project as defined by CMS.

List of Technical Assistance Events for this Reporting Period

Date: 8/17/2012 12:00:00 AM

Type: Housing

Delivery Method: Group Teleconference

Describe the focus of MFP Statewide Houising Coordinator mentoring with Stephanie Mensch

the TA you received: and Ellen Speckman Randall

Usefulness: Very Useful

If useful, describe Clearer understanding of role

what changed as a result. - If not useful, explain why.

Date: 9/11/2012 12:00:00 AM

Type: Housing

Delivery Method: Group Teleconference

Describe the focus of Received TA from Martha Egan, Lisa Sloane and Ellen Speckman the TA you received: Randall regarding upcoming meeting with the Division of Aging Services

(MFP partner) to discuss the hiring of a Housing Specialist within their

Division.

Usefulness: Very Useful

If useful, describe Well prepared for discussion and Division of Aging did make offer to what changed as a someone from within their Division but this person turned down the result. - If not useful, offer. To date, Houisng Specialist has still not been hired.

explain why.

Date: 9/19/2012 12:00:00 AM

Type: Quality

Delivery Method: Group Teleconference

Describe the focus of TA received from Jason Rachel of Truven regarding DDD's QA tool for

the TA you received: individuals being discharged from developmental centers. Jason

reviewed the Olmstead Follow-up Review and made sugestions.

Usefulness: Very Useful

If useful, describe MFP Quality Assurance Specialist provided Jason' feedback to

what changed as a workgroup.

result. - If not useful, explain why.

Date: 10/10/2012 12:00:00 AM

Type: Quality

Delivery Method: Group Teleconference

Describe the focus of CC with Jason Rachel to discuss Olmstead Follow-up Review and the **the TA you received:** development of a similar tool to be utilized for the elderly and physically

disabled populations supported by care management sites affiliated with

the Division of Aging Services (MFP partner).

Usefulness: Very Useful

If useful, describe Olmstead Follow-up Review still in review and being revised

what changed as a result. - If not useful, explain why.

Date: 11/8/2012 12:00:00 AM **Type:** Other Programmatic

Delivery Method: Group Teleconference

Describe the focus of TA call with Kathryn DuPree and John Sorenson regarding NJ's TA

the TA you received: plan.

Usefulness: Very Useful

If useful, describe Revisions made to the TA plan.

what changed as a result. - If not useful, explain why.

Date: 11/28/2012 12:00:00 AM

Type: Other Programmatic **Delivery Method:** Group Teleconference

Describe the focus of Call with Kathryn DuPree and John Sorenson to discuss the

the TA you received: implementation of Resource Teams for MFP eligible individuals being

transitioned from Developmental Centers.

Usefulness: Very Useful

If useful, describe Resource Team proposal revised to meet TA suggestions and

what changed as a requests.

result. - If not useful, explain why.

Date: 12/10/2012 12:00:00 AM

Type: Other Programmatic **Delivery Method:** Group Teleconference

Describe the focus of Kathryn DuPree and John Sorenson: Discussed connecting with other

the TA you received: states who have developed small residential settings; PACE/MFP

discussion; discussed the 1115 waiver and the opportunities to

coordinate MFP activities and processes

Usefulness: Very Useful

If useful, describe MFP Project Director provided clarity with regard to DD populations

what changed as a involvement with managed care and the new 1115 waiver

result. - If not useful, explain why.

Date: 12/19/2012 12:00:00 AM

Type: Other Programmatic

Delivery Method: Group Teleconference

Describe the focus of Kathry DuPree, John Sorenson, Annette Shea, MFP Employment

the TA you received: Specialist: discussion about MFP and employment

View/Print Report Page 63 of 63

Usefulness: Very Useful

If useful, describe Implemented some of the ideas from the discussion: i.e. peer mentor what changed as a being stationed at nursing facility to discuss employment options with result. - If not useful, residents prior to discharge.

explain why.

Date: 12/21/2012 12:00:00 AM

Type: Quality

Delivery Method: Group Teleconference

Describe the focus of Call with Jason Rachel and MFP Quality Assurance Specialist to further

the TA you received: review Olmstead Follow-up Review tool as well as provide input

regarding Resource Team proposal

Usefulness: Very Useful

If useful, describe Added recommended Benchmarks to Resource Team Proposal.

what changed as a result. - If not useful, explain why.
