Attached is a report of private sector wage changes compiled by the New Jersey Department of Labor and Workforce Development ("NJLWD"). The first table shows changes in average wages in employment for major industry groups in New Jersey between 2008 and 2009. The calculations were made by dividing total wages paid by covered private sector employers in particular industry groups by the number of jobs reported by those employers at their work sites. Table one also shows changes in the average wages of state and local government jobs covered under the State's unemployment insurance system, as well as changes in the average wages of federal government jobs in New Jersey covered by the federal unemployment insurance system.

The second table shows changes in the average wages of private sector jobs covered under the State's unemployment insurance system between 2008 and 2009. Statistics are broken down by county and include a statewide average. These calculations were made by dividing total wages paid by covered private sector employers by the number of jobs reported by those employers at their work sites.

As was the case last year, the first table in this report uses the North American Industry Classification System (NAICS) to assign and tabulate economic data by industry. Prior NJLWD Reports had used the 1987 Standard Industrial Classification (SIC) system to assign and tabulate such data. The attached document from the NJLWD website describes NAICS and explains the major differences. Also attached is a document explaining "covered employment" for purposes of the New Jersey Unemployment Compensation Law.

Further information compiled by NJLWD can be obtained at its website: www.state.nj.us/labor.
