RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION

NO. PC4-20-16

TITLE: Approving With Conditions an Application for Public Development (Application Number 1989-0023.015)

Commissioner Lohbauer moves and Commissioner Jannarone seconds the motion that:

WHEREAS, the Pinelands Commission has reviewed the Public Development Application Report and the recommendation of the Executive Director that the following application for Public Development be approved with conditions:

1989-0023.015
Applicant: Joe Darlington c/o Joseph J. White, Inc.
Municipality: Pemberton Township
Management Area: Pinelands Preservation Area District
Date of Report: May 19, 2020
Proposed Development: Planting of nine acres for wildlife management on leased land in Brendan T. Byrne State Forest.

WHEREAS, no request for a hearing before the Office of Administrative Law concerning the Executive Director’s recommendation has been received for this application; and

WHEREAS, the Pinelands Commission hereby adopts the Conclusion of the Executive Director for the proposed development; and

WHEREAS, the Pinelands Commission hereby determines that the proposed public development conforms to the standards for approving an application for public development set forth in N.J.A.C. 7:50-4.57 if the conditions recommended by the Executive Director are imposed; and

WHEREAS, pursuant to N.J.S.A. 13A-5h, no action authorized by the Commission shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of the minutes of the meeting of the Commission has been delivered to the Governor for review, unless prior to expiration of the review period and Governor shall approve same, in which case the action shall become effective upon such approval.

NOW, THEREFORE BE IT RESOLVED that Application Number 1989-0023.015 for public development is hereby approved subject to the conditions recommended by the Executive Director.

Re: Application # 1989-0023.015
Block 897, Lot 1.01
Pemberton Township

Dear Mr. Darlington:

The Commission staff has completed its review of this application for planting of nine acres with native grasses and forbs for wildlife management. The parcel is owned by the New Jersey Department of Environmental Protection, Division of Parks and Forestry and is leased by the applicant. Enclosed is a copy of a Public Development Application Report. On behalf of the Commission’s Executive Director, I am recommending that the Pinelands Commission approve the application with conditions at its June 12, 2020 meeting.

Any interested party may appeal this recommendation in accordance with the appeal procedure attached to this document. If no appeal is received, the Pinelands Commission may either approve the recommendation of the Executive Director or refer the application to the New Jersey Office of Administrative Law for a hearing.

Prior to any development, the applicant shall obtain any other necessary permits and approvals.

Sincerely,

Charles M. Horner, P.P.
Director of Regulatory Programs

Enc: Appeal Procedure
c: Secretary, Pemberton Township Planning Board (via email)
Pemberton Township Construction Code Official (via email)
Pemberton Township Environmental Commission (via email)
Secretary, Burlington County Planning Board (via email)
David Robbins (via email)
John Parke (via email)
This application proposes planting of nine acres with native grasses and forbs for wildlife management located on the above referenced 1,183 acre parcel in Pemberton Township. The parcel is owned by the New Jersey Department of Environmental Protection, Division of Parks and Forestry and is leased by the applicant.

The proposed plantings will occur within eleven sites located immediately adjacent to existing cranberry bogs. The areas proposed to be planted are currently barren or sparsely vegetated land. The proposed planting are intended to provide habitat for Northern Bobwhite quail.

**STANDARDS**

The Commission staff has reviewed the proposed plantings for consistency with all standards of the Pinelands Comprehensive Management Plan (CMP). The following reviews the CMP standards that are relevant to this application:

**Land Use (N.J.A.C. 7:50-5.22(a)5)**

The parcel is located within the Pinelands Preservation Area District. The CMP defines fish and wildlife management as the changing of the characteristics and interactions of fish and wildlife populations and their habitats in order to promote, protect and enhance the ecological integrity of those populations. Fish and wildlife management activities are permitted in the Pinelands Preservation Area District.

**Wetlands Standards (N.J.A.C. 7:50-6.6)**

There are wetlands located on the parcel. The proposed native Pinelands grasses and forbs will not be located in wetlands. The proposed plantings will be located within 300 feet of wetlands. The proposed planting will not result in a significant adverse impact on wetlands.
Vegetation Management Standards (N.J.A.C. 7:50-6.23 & 6.26)

The proposed plantings will be located within barren and sparsely vegetated areas. The proposed soil disturbance is limited to that which is necessary to accommodate the proposed plantings.

The Landscaping and Revegetation guidelines of the CMP recommend the use of grasses that are tolerant of droughty, nutrient poor conditions. The applicant proposes to utilize a seed mixture of native Pinelands grasses and forbs.

Threatened and Endangered Species Standards (N.J.A.C. 7:50-6.27 & 6.33)

The Commission has records of American chaffseed, a threatened or endangered plant species, in the vicinity of the proposed plantings. To avoid potential impacts to the local population of American chaffseed, the applicant eliminated three planting sites located in proximity to the known population and revised the proposed seed mixture to only include species that are native to the Pinelands to avoid the introduction of plants with invasive qualities.

PUBLIC COMMENT

The applicant has provided the requisite public notices. Newspaper public notice was completed on March 13, 2020. Notice to required land owners within 200 feet of the above referenced parcel was completed on November 20, 2019. The application was designated as complete on the Commission’s website on March 16, 2020. The Commission’s public comment period closed on May 8, 2020. No public comment was submitted to the Commission regarding this application.

CONDITIONS

1. Except as modified by the below conditions, the proposed development shall adhere to the plan titled Quail Habitat Creation Brendan T. Byrne SF LMR and submitted on March 16, 2020.

2. Prior to any development, the applicant shall obtain any other necessary permits and approvals.

CONCLUSION

As the proposed development conforms to the standards set forth in N.J.A.C. 7:50-4.57, it is recommended that the Pinelands Commission APPROVE the proposed development subject to the above conditions.
The Pinelands Comprehensive Management Plan (N.J.A.C. 7:50-4.91) provides an interested party the right to appeal any determination made by the Executive Director to the Commission in accordance with N.J.A.C. 7:50-4.91. An interested party is someone who has a specific property interest sufficient to require a hearing on constitutional or statutory grounds. Only appeal requests submitted by someone meeting the definition of an interested party will be transmitted to the New Jersey Office of Administrative Law for a hearing. Any such appeal must be made in writing to the Commission and received by the Commission’s office no later than 5:00 PM on June 8, 2020 and include the following information:

1. the name and address of the person requesting the appeal;
2. the application number;
3. the date on which the determination to be appealed was made;
4. a brief statement of the basis for the appeal; and
5. a certificate of service (a notarized statement) indicating that service of the notice has been made, by certified mail, on the clerk of the county, municipal planning board and environmental commission with jurisdiction over the property which is subject of this decision.

Within 15 days following receipt of a notice of valid appeal, the Executive Director shall initiate the procedures for assignment of an Administrative Law Judge to preside at the hearing pursuant to the Administrative Procedures Act, N.J.S.A. 52:14B-1 et seq., and the procedures established by the Office of Administrative Law. The time, date and location of such hearing shall be designated by the Office of Administrative Law.
RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION

NO. PC4-20-16

TITLE: Approving With Conditions an Application for Public Development (Application Number 1989-0023.015)

Commissioner Lohbauer moves and Commissioner Jannarone seconds the motion that:

WHEREAS, the Pinelands Commission has reviewed the Public Development Application Report and the recommendation of the Executive Director that the following application for Public Development be approved with conditions:

1989-0023.015
Applicant: Joe Darlington c/o Joseph J. White, Inc.
Municipality: Pemberton Township
Management Area: Pinelands Preservation Area District
Date of Report: May 19, 2020
Proposed Development: Planting of nine acres for wildlife management on leased land in Brendan T. Byrne State Forest.

WHEREAS, no request for a hearing before the Office of Administrative Law concerning the Executive Director’s recommendation has been received for this application; and

WHEREAS, the Pinelands Commission hereby adopts the Conclusion of the Executive Director for the proposed development; and

WHEREAS, the Pinelands Commission hereby determines that the proposed public development conforms to the standards for approving an application for public development set forth in N.J.A.C. 7:50-4.57 if the conditions recommended by the Executive Director are imposed; and

WHEREAS, pursuant to N.J.S.A. 13A-5h, no action authorized by the Commission shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of the minutes of the meeting of the Commission has been delivered to the Governor for review, unless prior to expiration of the review period and Governor shall approve same, in which case the action shall become effective upon such approval.

NOW, THEREFORE BE IT RESOLVED that Application Number 1989-0023.015 for public development is hereby approved subject to the conditions recommended by the Executive Director.
RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION

NO. PC4-20-17

TITLE: Approving With Conditions an Application for Public Development (Application Number 2000-0088.006)

Commissioner Pikolycky moves and Commissioner Lohbauer seconds the motion that:

APPLICATION No.: 1989-0023.015
Block 897, Lot 1.01
Pemberton Township

This application proposes planting of nine acres with native grasses and forbs for wildlife management located on the above referenced 1,183 acre parcel in Pemberton Township. The parcel is owned by the New Jersey Department of Environmental Protection, Division of Parks and Forestry and is leased by the applicant.

The proposed plantings will occur within eleven sites located immediately adjacent to existing cranberry bogs. The areas proposed to be planted are currently barren or sparsely vegetated land. The proposed planting are intended to provide habitat for Northern Bobwhite quail.

STANDARDS

The Commission staff has reviewed the proposed plantings for consistency with all standards of the Pinelands Comprehensive Management Plan (CMP). The following reviews the CMP standards that are relevant to this application:

Land Use (N.J.A.C. 7:50-5.22(a)5)

The parcel is located within the Pinelands Preservation Area District. The CMP defines fish and wildlife management as the changing of the characteristics and interactions of fish and wildlife populations and their habitats in order to promote, protect and enhance the ecological integrity of those populations. Fish and wildlife management activities are permitted in the Pinelands Preservation Area District.

Wetlands Standards (N.J.A.C. 7:50-6.6)

There are wetlands located on the parcel. The proposed native Pinelands grasses and forbs will not be located in wetlands. The proposed plantings will be located within 300 feet of wetlands. The proposed planting will not result in a significant adverse impact on wetlands.
Vegetation Management Standards (N.J.A.C. 7:50-6.23 & 6.26)

The proposed plantings will be located within barren and sparsely vegetated areas. The proposed soil disturbance is limited to that which is necessary to accommodate the proposed plantings.

The Landscaping and Revegetation guidelines of the CMP recommend the use of grasses that are tolerant of droughty, nutrient poor conditions. The applicant proposes to utilize a seed mixture of native Pinelands grasses and forbs.

Threatened and Endangered Species Standards (N.J.A.C. 7:50-6.27 & 6.33)

The Commission has records of American chaffseed, a threatened or endangered plant species, in the vicinity of the proposed plantings. To avoid potential impacts to the local population of American chaffseed, the applicant eliminated three planting sites located in proximity to the known population and revised the proposed seed mixture to only include species that are native to the Pinelands to avoid the introduction of plants with invasive qualities.

PUBLIC COMMENT

The applicant has provided the requisite public notices. Newspaper public notice was completed on March 13, 2020. Notice to required land owners within 200 feet of the above referenced parcel was completed on November 20, 2019. The application was designated as complete on the Commission’s website on March 16, 2020. The Commission’s public comment period closed on May 8, 2020. No public comment was submitted to the Commission regarding this application.

CONDITIONS

1. Except as modified by the below conditions, the proposed development shall adhere to the plan titled Quail Habitat Creation Brendan T. Byrne SF LMR and submitted on March 16, 2020.

2. Prior to any development, the applicant shall obtain any other necessary permits and approvals.

CONCLUSION

As the proposed development conforms to the standards set forth in N.J.A.C. 7:50-4.57, it is recommended that the Pinelands Commission APPROVE the proposed development subject to the above conditions.
The Pinelands Comprehensive Management Plan (N.J.A.C. 7:50-4.91) provides an interested party the right to appeal any determination made by the Executive Director to the Commission in accordance with N.J.A.C. 7:50-4.91. An interested party is someone who has a specific property interest sufficient to require a hearing on constitutional or statutory grounds. Only appeal requests submitted by someone meeting the definition of an interested party will be transmitted to the New Jersey Office of Administrative Law for a hearing. Any such appeal must be made in writing to the Commission and received by the Commission’s office no later than 5:00 PM on June 8, 2020 and include the following information:

1. the name and address of the person requesting the appeal;
2. the application number;
3. the date on which the determination to be appealed was made;
4. a brief statement of the basis for the appeal; and
5. a certificate of service (a notarized statement) indicating that service of the notice has been made, by certified mail, on the clerk of the county, municipal planning board and environmental commission with jurisdiction over the property which is subject of this decision.

Within 15 days following receipt of a notice of valid appeal, the Executive Director shall initiate the procedures for assignment of an Administrative Law Judge to preside at the hearing pursuant to the Administrative Procedures Act, N.J.S.A. 52:14B-1 et seq., and the procedures established by the Office of Administrative Law. The time, date and location of such hearing shall be designated by the Office of Administrative Law.
RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION

NO. PC4-20-17  

TITLE:  Approving With Conditions an Application for Public Development (Application Number 2000-0088.006)

Commissioner Pikolycky moves and Commissioner Lohbauer seconds the motion that:

WHEREAS, the Pinelands Commission has reviewed the Public Development Application Report and the recommendation of the Executive Director that the following application for Public Development be approved with conditions:

2000-0088.006
Applicant: Hammonton Board of Education
Municipality: Town of Hammonton
Management Area: Pinelands Town
Date of Report: May 21, 2020
Proposed Development: Installation of two synthetic turf athletic fields at Hammonton High School

WHEREAS, no request for a hearing before the Office of Administrative Law concerning the Executive Director’s recommendation has been received for this application; and

WHEREAS, the Pinelands Commission hereby adopts the Conclusion of the Executive Director for the proposed development; and

WHEREAS, the Pinelands Commission hereby determines that the proposed public development conforms to the standards for approving an application for public development set forth in N.J.A.C. 7:50-4.57 if the conditions recommended by the Executive Director are imposed; and

WHEREAS, pursuant to N.J.S.A. 13A-5h, no action authorized by the Commission shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of the minutes of the meeting of the Commission has been delivered to the Governor for review, unless prior to expiration of the review period and Governor shall approve same, in which case the action shall become effective upon such approval.

NOW, THEREFORE BE IT RESOLVED that Application Number 2000-0088.006 for public development is hereby approved subject to the conditions recommended by the Executive Director.

Re: Application # 2000-0088.006
Block 2301, Lots 37, 41 & 43
Town of Hammonton

Dear Ms. Prettyman:

The Commission staff has completed its review of this application for installation of two synthetic turf athletic fields at Hammonton High School. Enclosed is a copy of a Public Development Application Report. On behalf of the Commission’s Executive Director, I am recommending that the Pinelands Commission approve the application with conditions at its June 12, 2020 meeting.

Any interested party may appeal this recommendation in accordance with the appeal procedure attached to this document. If no appeal is received, the Pinelands Commission may either approve the recommendation of the Executive Director or refer the application to the New Jersey Office of Administrative Law for a hearing.

Prior to any development, the applicant shall obtain any other necessary permits and approvals.

May 21, 2020

Barbara S. Prettyman, Business Administrator/Board Secretary (via email)
Hammonton Board of Education
566 Old Forks Road
Hammonton, NJ 08037

Application No.: 2000-0088.006
Block 2301, Lots 37, 41 & 43
Town of Hammonton

This application proposes the installation of two synthetic turf athletic fields at Hammonton High School located on the above referenced 115 acre parcel in the Town of Hammonton.

The application proposes to replace two existing grassed athletic fields with two synthetic turf athletic fields. Each synthetic turf athletic field is 91,911 square feet. The replacement athletic fields will be in the same location as the existing athletic fields.

STANDARDS

The Commission staff has reviewed the proposed development for consistency with all standards of the Pinelands Comprehensive Management Plan (CMP). The following reviews the CMP standards that are relevant to this application:

Land Use (N.J.A.C. 7:50-5.27)

The parcel is located in the Pinelands Town of Hammonton. Intensive recreational facilities are a permitted use in a Pinelands Town.

Wetlands Standards (N.J.A.C. 7:50-6.6)

There are wetlands located on the above referenced parcel. The proposed synthetic turf athletic fields will be located greater than 300 feet from wetlands.

Vegetation Management Standards (N.J.A.C. 7:50-6.23 & 6.26)

The proposed development will be located within the limits of the existing grass athletic fields. The proposed soil disturbance is limited to that which is necessary to accommodate the proposed development.
The Landscaping and Revegetation guidelines of the CMP recommend the use of grasses that are tolerant of droughty, nutrient poor conditions. To stabilize the disturbed areas beyond the limits of the proposed synthetic turf athletic fields, the application proposes to utilize a seed mixture which meets that recommendation.

**Stormwater Management Standards (N.J.A.C.7:50-6.84(a)6)**

The applicant has demonstrated that the proposed development is consistent with the stormwater management standards of the CMP. To meet the stormwater management standards, the application proposes to construct a subsurface stormwater infiltration system.

**PUBLIC COMMENT**

The applicant has provided the requisite public notices. Notice to required land owners within 200 feet of the above referenced parcel was completed on August 13, 2019. Newspaper public notice was completed on August 21, 2019. The application was designated as complete on the Commission’s website on April 14, 2020. The Commission’s public comment period closed on May 8, 2020. No public comment was submitted to the Commission regarding this application.

**CONDITIONS**

1. Except as modified by the below conditions, the proposed development shall adhere to the plan, consisting of 11 sheets, prepared by Adams, Rehmann & Heggan and dated as follows:
   
   Sheet 1 - April 1, 2020  
   Sheets 2, 3 & 7-10 - July 2019; last revised February 7, 2020  
   Sheets 4-6 - July 2019; last revised April 1, 2020  
   Sheet 11 - July 2019; last revised April 20, 2020

2. Disposal of any construction debris or excess fill may only occur at an appropriately licensed facility.

3. Any proposed revegetation shall adhere to the "Vegetation" standards of the CMP. Where appropriate, the applicant is encouraged to utilize the following Pinelands native grasses for revegetation: Switch grass, Little bluestem and Broom-sedge.

4. Prior to any development, the applicant shall obtain any other necessary permits and approvals.

**CONCLUSION**

As the proposed development conforms to the standards set forth in N.J.A.C. 7:50-4.57, it is recommended that the Pinelands Commission **APPROVE** the proposed development subject to the above conditions.
The Pinelands Comprehensive Management Plan (N.J.A.C. 7:50-4.91) provides an interested party the right to appeal any determination made by the Executive Director to the Commission in accordance with N.J.A.C. 7:50-4.91. An interested party is someone who has a specific property interest sufficient to require a hearing on constitutional or statutory grounds. Only appeal requests submitted by someone meeting the definition of an interested party will be transmitted to the New Jersey Office of Administrative Law for a hearing. Any such appeal must be made in writing to the Commission and received by the Commission’s office no later than 5:00 PM on June 8, 2020 and include the following information:

1. the name and address of the person requesting the appeal;
2. the application number;
3. the date on which the determination to be appealed was made;
4. a brief statement of the basis for the appeal; and
5. a certificate of service (a notarized statement) indicating that service of the notice has been made, by certified mail, on the clerk of the county, municipal planning board and environmental commission with jurisdiction over the property which is subject of this decision.

Within 15 days following receipt of a notice of valid appeal, the Executive Director shall initiate the procedures for assignment of an Administrative Law Judge to preside at the hearing pursuant to the Administrative Procedures Act, N.J.S.A. 52:14B-1 et seq., and the procedures established by the Office of Administrative Law. The time, date and location of such hearing shall be designated by the Office of Administrative Law.
RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION

NO. PC4-20- 18

TITLE: Approving With Conditions an Application for Public Development (Application Number 2007-0304.001)

Commissioner Pikolycky moves and Commissioner Avery seconds the motion that:

WHEREAS, the Pinelands Commission has reviewed the Public Development Application Report and the recommendation of the Executive Director that the following application for Public Development be approved with conditions:

2007-0304.001
Applicant: Dennis Township
Municipality: Dennis Township
Management Area: Pinelands Village
Date of Report: May 21, 2020
Proposed Development: Construction of a municipal recreation facility.

WHEREAS, a recreation facility was developed on the parcel without application to, and approval by, the Commission and constitutes a violation of the application requirements of the Pinelands Comprehensive Management Plan (CMP); and

WHEREAS, the applicant proposes to remove certain recreational improvements that were developed on the parcel without application to the Commission; and

WHEREAS, the applicant has completed this application with the Pinelands Commission for both recreational improvements that have already been developed on the parcel that will remain and for additional recreational improvements; and

WHEREAS, no request for a hearing before the Office of Administrative Law concerning the Executive Director’s recommendation has been received for this application; and

WHEREAS, the Pinelands Commission hereby adopts the Conclusion of the Executive Director for the proposed development; and

WHEREAS, the Pinelands Commission hereby determines that the proposed public development conforms to the standards for approving an application for public development set forth in N.J.A.C. 7:50-4.57 if the conditions recommended by the Executive Director are imposed; and

WHEREAS, pursuant to N.J.S.A. 13A-5h, no action authorized by the Commission shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of the minutes of the meeting of the Commission has been delivered to the Governor for review, unless prior to expiration of the review period Governor shall approve same, in which case the action shall become effective upon such approval.

NOW, THEREFORE BE IT RESOLVED that Application Number 2007-0304.001 for public development is hereby approved subject to the conditions recommended by the Executive Director.

Re: Application # 2007-0304.001
Block 31, Lot 13
Dennis Township

Dear Ms. Justice:

The Commission staff has completed its review of this application for construction of a municipal recreation facility. Enclosed is a copy of a Public Development Application Report. On behalf of the Commission’s Executive Director, I am recommending that the Pinelands Commission approve the application with conditions at its June 12, 2020 meeting.

A recreation facility was developed on the parcel without application to the Commission. Recreational improvements that were developed on the parcel without application to the Commission include two concession buildings, two irrigation wells, an 820 square foot garage, gravel and paved parking areas and athletic fields. This development constitutes a violation of the application requirements of the Pinelands Comprehensive Management Plan (CMP). Completion of this application is intended to address the violation.

Any interested party may appeal this recommendation in accordance with the appeal procedure attached to this document. If no appeal is received, the Pinelands Commission may either approve the recommendation of the Executive Director or refer the application to the New Jersey Office of Administrative Law for a hearing.

Prior to any development, the applicant shall obtain any other necessary permits and approvals.

Sincerely,

Charles M. Horner, P.P.
Director of Regulatory Programs

PUBLIC DEVELOPMENT APPLICATION REPORT

May 21, 2020

Jacqueline Justice, RMC (via email)
Dennis Township
571 Petersburg Road
P.O. Box 204
Dennisville, NJ 08214

Application No.: 2007-0304.001
Block 31, Lot 13
Dennis Township

This application proposes development of a municipal recreation facility on the above referenced 11.97 acre parcel in Dennis Township.

This application proposes the construction of a 2,570 square foot recreational building, a 1,804 square foot playground area, a 5,265 square foot basketball court and installation of a potable water well.

This application also includes recreational facilities that were developed on the parcel without application to the Commission. Specifically, this application includes an 820 square foot garage, two concession buildings (1,102 square feet and 1,368 square feet), two irrigation wells, a 52 space gravel parking area, an 11 space paved parking area, a 153 space paved parking area and grassed athletic fields.

The applicant proposes to remove certain recreational facilities that were developed on the parcel without application to the Commission. Specifically, the applicant proposes to remove a well shed, a basketball court and three play areas by November 30, 2020.

The existing recreational facilities that were developed on the parcel without application to the Commission constitute a violation of the application requirements of the Pinelands Comprehensive Management Plan (CMP). Completion of this application is intended to address the violation.

STANDARDS

The Commission staff has reviewed the proposed development for consistency with all standards of the CMP. The following reviews the CMP standards that are relevant to this application:

Land Use (N.J.A.C. 7:50-5.27)

The parcel is located in the Pinelands Village of Belleplain. The proposed recreation facility is a permitted land use in a Pinelands Village Management Area.
Vegetation Management Standards (N.J.A.C. 7:50-6.23 & 6.26)

The proposed development will be located over existing developed and maintained grassed areas. The proposed soil disturbance is limited to that which is necessary to accommodate the development.

The Landscaping and Revegetation guidelines of the CMP recommend the use of grasses that are tolerant of droughty, nutrient poor conditions. The applicant proposes to utilize a seed mixture which meets that recommendation.

Water Quality Standard (N.J.A.C. 7:50-6.84(a)4ii)

The recreation facility will be serviced by an on-site septic system. The applicant has demonstrated that the proposed uses on the parcel will be consistent with the groundwater quality (septic dilution) standard of the CMP.

Stormwater Management Standards (N.J.A.C. 7:50-6.84(a)6)

The applicant has demonstrated that the development is consistent with the stormwater management standards of the CMP. To meet the stormwater management standards, the application proposes to construct two stormwater infiltration basins.

Water Management Standards (N.J.A.C. 7:50-6.86)

The irrigation and potable water wells will be located in the Kirkwood-Cohansey aquifer and will result in a diversion of less than 100,000 gallons per day. As required by the CMP, the applicant has demonstrated that the proposed wells are designed and located so as to minimize impacts on wetlands and surface water. The proposed water withdrawal is consistent with the water management standards of the CMP.

PUBLIC COMMENT

The applicant has provided the requisite public notices. Notice to required land owners within 200 feet of the above referenced parcel was completed on August 9, 2018. Newspaper public notice was completed on August 15, 2018. The application was designated as complete on the Commission’s website on April 27, 2020. The Commission’s public comment period closed on May 8, 2020. No public comment was submitted to the Commission regarding this application.

CONDITIONS

1. Except as modified by the below conditions, the proposed development shall adhere to the plan, consisting of ten sheets, prepared by DeBlasio and Associates and dated as follows:

   Sheet C-1 dated 9/12/19, revised 4/02/20
   Sheets C-2 and C-4 through C-9 dated 9/12/19
   Sheet C-3 dated 9/12/19, revised 2/10/20
   Sheet S-1 dated 2/10/20, revised 4/02/20
2. Disposal of any construction debris or excess fill may only occur at an appropriately licensed facility.

3. Any proposed revegetation shall adhere to the "Vegetation" standards of the CMP. Where appropriate, the applicant is encouraged to utilize the following Pinelands native grasses for revegetation: Switch grass, Little bluestem and Broom-sedge.

4. Prior to any development, the applicant shall obtain any other necessary permits and approvals.

5. Each septic system shall be located where the seasonal high water table is at least five feet below the natural ground surface.

6. The well shed, basketball court, and three play areas that were developed without application to the Pinelands Commission shall be removed from the parcel by November 30, 2020.

CONCLUSION

As the proposed development conforms to the standards set forth in N.J.A.C. 7:50-4.57, it is recommended that the Pinelands Commission APPROVE the proposed development subject to the above conditions.
The Pinelands Comprehensive Management Plan (N.J.A.C. 7:50-4.91) provides an interested party the right to appeal any determination made by the Executive Director to the Commission in accordance with N.J.A.C. 7:50-4.91. An interested party is someone who has a specific property interest sufficient to require a hearing on constitutional or statutory grounds. Only appeal requests submitted by someone meeting the definition of an interested party will be transmitted to the New Jersey Office of Administrative Law for a hearing. Any such appeal must be made in writing to the Commission and received by the Commission’s office no later than 5:00 PM on June 8, 2020 and include the following information:

1. the name and address of the person requesting the appeal;
2. the application number;
3. the date on which the determination to be appealed was made;
4. a brief statement of the basis for the appeal; and
5. a certificate of service (a notarized statement) indicating that service of the notice has been made, by certified mail, on the clerk of the county, municipal planning board and environmental commission with jurisdiction over the property which is subject of this decision.

Within 15 days following receipt of a notice of valid appeal, the Executive Director shall initiate the procedures for assignment of an Administrative Law Judge to preside at the hearing pursuant to the Administrative Procedures Act, N.J.S.A. 52:14B-1 et seq., and the procedures established by the Office of Administrative Law. The time, date and location of such hearing shall be designated by the Office of Administrative Law.
RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION

NO. PC4-20-19

TITLE: To Authorize the Executive Director to Propose Amendments to the Comprehensive Management Plan in Accordance with the Administrative Procedure Act (Water Quality; Alternate Design Wastewater Treatment Systems Pilot Program)

Commissioner Lohbauer moves and Commissioner Avery seconds the motion that:

WHEREAS, on May 10, 2002, the Pinelands Commission adopted amendments to the Comprehensive Management Plan that established the Alternate Design Treatment Systems Pilot Program; and

WHEREAS, these Comprehensive Management Plan amendments took effect on August 5, 2002; and

WHEREAS, pursuant to N.J.A.C. 7:50-10.23, the Executive Director reviewed this Pilot Program and reported on its implementation to the Commission in November 2006, November 2009, November 2012 and November 2017; and

WHEREAS, based on the Executive Director’s recommendations, the Commission previously adopted amendments to the Alternate Design Treatment Systems Pilot Program to, among other things, allow for continued installation and monitoring of alternate design wastewater treatment systems, recognize the successful performance of three technologies by authorizing them for use on a permanent basis, remove two technologies from the Pilot Program due to non-participation and inability to meet Comprehensive Management Plan standards, and provide an opportunity for new technologies to participate in the Pilot Program; and

WHEREAS, as required by N.J.A.C. 7:50-10.23, the Executive Director again reviewed the Pilot Program and reported on its implementation to the Commission in a report dated November 2019; and

WHEREAS, the 2019 Implementation Report recommends extension of the Pilot Program to at least 2025, authorization of one technology on a permanent basis in recognition of its demonstrated success in meeting Comprehensive Management Plan water quality standards, removal of other technologies from the pilot program due to their inability to meet Comprehensive Management Plan water quality standards or lack of installation in the Pinelands Area and recruitment of new technologies into the pilot program in 2020; and

WHEREAS, these recommendations, the full Implementation Report and proposed Comprehensive Management Plan amendments were discussed with the Commission’s CMP Policy & Implementation Committee on February 28, 2020; and

WHEREAS, the proposed amendments to the Comprehensive Management Plan have been reviewed by the Pinelands Commission; and

WHEREAS, the Pinelands Commission wishes to formally consider the amendments to the Comprehensive Management Plan set forth in the attachment hereto, dated May 29, 2020; and

WHEREAS, the Administrative Procedure Act of 1968, as amended, and the Office of Administrative Law implementing regulations set forth a detailed procedure governing proposed rulemaking; and

WHEREAS, the Pinelands Commission also wishes to obtain the comments of the public, governmental agencies and the Pinelands Municipal Council on the proposed amendments, in accordance with the Pinelands Protection Act and Subchapter 7 of the Comprehensive Management Plan; and

WHEREAS, pursuant to N.J.S.A. 13:18A-5h, no action authorized by the Commission shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of the minutes of the meeting of the Commission has been delivered to the Governor for review, unless prior to expiration of the review period the Governor shall approve same, in which case the action shall become effective upon such approval.
NOW, THEREFORE, BE IT RESOLVED that:

1. The Commission hereby authorizes the Executive Director to submit the proposed amendments to the Comprehensive Management Plan, attached hereto and dated May 29, 2020, and the required supporting documentation to the Office of Administrative Law for publication as proposed regulations;

2. The Executive Director shall transmit the proposed amendments to all Pinelands municipalities and counties and the Pinelands Municipal Council for review;

3. The public comment period on the proposed amendments shall extend 60 days from the date of publication of the proposal in the New Jersey Register and the Executive Director shall affix the date of a public hearing to receive comments on the proposed amendments; and

4. Subsequent to the comment period, the Executive Director shall expeditiously prepare proposed final amendments, with any pertinent changes to these amendments, for review by the Commission’s CMP Policy and Implementation Committee, and shall submit same to the Commission for final action.

The name and mailing address of the commenter must be submitted with all public comments. Commenters who do not wish their names and affiliations to be published in any notice of adoption subsequently prepared by the Commission should so indicate when they submit their comments.

The agency proposal follows:

**Summary**

The New Jersey Pinelands Commission (Commission) proposes to amend subchapter 5, Minimum Standards for Land Uses and Intensities; subchapter 6, Management Programs and Minimum Standards; and subchapter 10, Pilot Programs, of the Pinelands Comprehensive Management Plan (CMP). The CMP has been guiding land use and development activities in the Pinelands since it took effect on January 14, 1981. The CMP has been amended many times, most recently in October 2018 through a set of amendments related to the Pilot Program for Alternate Design Wastewater Treatment Systems (see 50 N.J.R. 2327(b)).

Amendments related to the Pilot Program for Alternate Design Wastewater Treatment Systems (“Pilot Program” or “Program”) are again being proposed to extend the Program, authorize a piloted technology for permanent use, remove two piloted technologies from the Program, revise manufacturer reporting and certification requirements, and clarify certain requirements. Amendments are also being proposed to eliminate inconsistencies among certain sections of subchapters 5, 6 and 10 and to modify reporting requirements in subchapter 6. A more detailed description of the Pilot Program and proposed amendments follows.
The Commission created the Pilot Program in 2002 to test advanced septic system technologies for residential development. An ad hoc committee convened earlier by the Commission had concluded that advanced technologies could be more effective at meeting the water quality standards of the CMP than conventional septic systems for residential development on lots smaller than 3.2 acres. This finding was significant, as there are many lots in the Pinelands zoned for residential use, but which do not meet the CMP’s 3.2 acre minimum lot size requirement for residential development served by conventional septic systems. This left many landowners unable to build houses on these smaller lots.

Based on the committee’s recommendations, the Commission formally established the Pilot Program by amending the CMP to allow five specific alternate waste water treatment technologies to be installed for residential development in the Pinelands (see 34 N.J.R. 2804(b); N.J.A.C. 7:50-10, Part IV). The Pilot Program was designed to test whether the alternate treatment systems could be maintained and operated to meet the water quality standards of the CMP in a manner that a homeowner could reasonably be expected to follow.

The CMP water quality standards, N.J.A.C. 7:50-6, Part VIII, control the amount of nitrogen that can enter the environment, as nitrogen is a significant pollutant that often serves as an indicator of changes in overall water quality. Unlike conventional septic systems, which control nitrogen by diluting the waste water on larger parcels of land, as is required in the Pinelands Area, alternate technologies treat the waste water to reduce nitrogen levels rather than relying solely on the dilution of nitrogen. This allows for more effective waste water treatment on smaller parcels in the Pinelands Area that are zoned for residential development. All the technologies accepted into the Pilot Program utilize proven biological nutrient removal processes to reduce nitrogen levels in treated wastewater.
The first Pilot Program treatment system was installed in 2004. As of May 1, 2020, a total of 346 Pilot Program systems have been installed to service single-family residential development in 28 Pinelands municipalities. The Pilot Program has given landowners the opportunity to build houses on smaller parcels of land that are zoned for residential development, but which do not meet the 3.2 acre minimum lot size for conventional septic systems.

The Pilot Program has evolved over the last 18 years in response to the continuous evaluation and assessment of technologies. Based on the recommendations of the Executive Director in program implementation reports issued in 2006, 2009, 2012, and 2017 (updated 2018), the Commission has periodically amended rules related to the Pilot Program. Links to all reports may be found on the Commission’s website at www.nj.gov/pinelands.

Of the original five technologies piloted, three were deemed successful and permanently approved by the Commission (Amphidrome and Bioclere for use on parcels of at least one acre; Fast for use on parcels of at least 1.4 acres) and two were removed from the program based on lack of sales or not meeting water quality standards (Ashco RSF III and Cromaglass). (see 42 N.J.R. 2422(a); 50 N.J.R. 969(a); 39 N.J.R. 5077(b); and 46 N.J.R. 1877(b)).

In addition to the actions taken on each of the five original piloted technologies, the Commission has also amended the CMP to expand and enhance the Program, including:

- Authorizing the Commission to accept additional prescreened technologies into the Program;
- Removing fixed deadlines for the installation of piloted technologies;
- Authorizing the Executive Director to impose an immediate suspension on all new installations of a Pilot Program technology that is not adhering to the requirements of the program or meeting CMP water quality standards;
- Allowing piloted technologies in all Pinelands municipalities;
- Removing limits on the amount of installed systems for a technology in the same residential development.

Amendments to the Pilot Program, including those discussed above, were adopted by the Commission in 2006, 2007, 2010, 2014, 2017 and 2018 and can be found at 38 N.J.R. 1829(b), 39 N.J.R. 5077(b), 42 N.J.R. 2422(a), 46 N.J.R. 1877(b), 50 N.J.R. 969(a) and 50 N.J.R. 2327(b).

The Executive Director issued the fifth implementation report in November 2019 (https://www.nj.gov/pinelands/landuse/current/altseptic/2019%20Pilot_Septic_Imlem_Rpt%20-%20FINAL.pdf), concluding that the continued use of advanced onsite treatment technologies is essential to the efficient use and orderly development of designated growth areas of the Pinelands as well as other areas in which residential development is permitted on lots smaller than 3.2 acres. The report addresses, among other things, the evaluation of four technologies added to the Pilot Program in 2011 pursuant to N.J.A.C. 7:50-10.23(b), and the continuation of the Program. The Executive Director made the following recommendations:

- Advance one of the four technologies that entered the Pilot Program in 2011, SeptiTech, beyond the piloting stage and authorize it for permanent use subject to N.J.A.C. 7:50-6.84(a)5iv(3);
- Remove the Busse GT and Hoot ANR technologies from the Pilot Program as neither technology has been installed in the Pinelands Area since being accepted into the Program in 2011;
• Remove the BioBarrier system from the Pilot Program as it has not been successful in meeting CMP water quality standards since being accepted into the Pilot Program in 2011;

• Invoke the Commission’s authority in N.J.A.C. 7:50-10.23(b) to add additional technologies to the Pilot Program by recruiting new NSF Standard 245 and/or USEPA ETV certified technologies to participate in the Pilot Program beginning in 2020, as adding new technologies to the program should lead to increased competition among the system vendors and may lead to continued price stability and potential cost reductions; and

• Extend the Pilot Program to 2025 by amending N.J.A.C. 7:50-10.23(c) and (d) to require the Executive Director’s next report on newly piloted technologies to be due in 2025, with a possible extension to 2027 if necessary.

The Commission is proposing amendments to the CMP in response to the findings and recommendations set forth in the 2019 Implementation Report, with the exception of the recommendation to remove the Hoot ANR technology. As this proposal was being prepared, the Commission received notice of the pending installation of the first Hoot ANR system in the Pinelands Area. The Commission is therefore retaining the Hoot ANR technology in the Pilot Program to give it more time for testing. The proposed amendments also update, correct, and clarify various provisions of the rules.

The proposed amendments and the 2019 Implementation Report on which they are based were discussed and reviewed at multiple public meetings of the Commission and the Commission’s CMP Policy & Implementation Committee in 2019 and 2020. If requested, Commission staff will also provide a presentation on the proposed amendments at a public
meeting of the Pinelands Municipal Council (PMC). The PMC, created by the Pinelands Protection Act (N.J.S.A. 13:18A-1 et seq.), is made up of the mayors of the 53 municipalities in the Pinelands Area or their designees. The Council is empowered to review and comment upon changes proposed by the Commission in the New Jersey Pinelands Comprehensive Management Plan and advises the Commission on matters of interest regarding the Pinelands.

A more detailed description of the proposed amendments follows.

**Subchapter 5**

The Commission is proposing to update subchapter 5 to clarify minimum lot sizes for nonresidential development in certain Pinelands management areas. This clarification is necessary to correct inconsistencies resulting from recent amendments to subchapter 6. In 2018, the Commission amended N.J.A.C. 7:50-6.84(a)5iii(2) to authorize the use of advanced wastewater treatment systems for preexisting nonresidential development in the Rural Development Area, Forest Area, Agricultural Production Area, and Preservation Area District. The 2018 amendments allow advanced wastewater treatment systems in these areas when the proposed nonresidential development constitutes an expansion of a nonresidential use that was in existence on January 14, 1981, the effective date of the CMP, or constitutes a change of an existing use to another permitted nonresidential use. (See: 50 N.J.R. 969(a); N.J.A.C. 7:50-6.84(a)5iii(2)). This change provided an opportunity to improve water quality while at the same time allowing for potential expansion of pre-existing commercial uses. There are some provisions in subchapter 5, however, that are inconsistent with the amended N.J.A.C. 7:50-6.84(a)5iii(2) and the Commission is proposing to update those provisions.
The provisions to be amended, N.J.A.C. 7:50-5.22(d), 5.23(d), 5.24(d), 5.26(d), and 5.27(d), prohibit nonresidential structures on parcels less than one acre in the Rural Development Area, Forest Area, Agricultural Production Area, and Preservation Area District, as conventional septic systems that service such structures require lots larger than one acre to meet the CMP septic dilution requirements in those areas. The 2018 amendments to N.J.A.C. 6.84(a)5iii(2), however, gave some landowners in these areas the ability to expand their existing businesses by converting to advanced waste water treatment systems. Because some of these businesses are located on lots smaller than one acre, they were still precluded from expanding, which was not the Commission’s intent. To correct this inconsistency, the Commission is proposing to update N.J.A.C. 7:50-5.22(d), 5.23(d), 5.24(d), 5.26(d), and 5.27(d) to recognize that the one-acre minimum lot size requirement in those provisions will not apply to a preexisting nonresidential use in the Rural Development Area, Forest Area, Agricultural Production Area, and Preservation Area District when the landowner is seeking to convert to an advanced technology treatment system from a conventional septic system in accordance with N.J.A.C. 7:50-6.84(a)5iii(2).

Similarly, the Commission is proposing to update N.J.A.C. 7:50-5.27 and 5.28 to make these provisions consistent with N.J.A.C. 7:50-6.84(a)5iii(1), which has allowed the use of advanced waste water treatment systems to serve nonresidential development in Pinelands Villages, Pinelands Towns, and Regional Growth Areas since 1987. N.J.A.C. 7:50-5.27 and 5.28 currently require a minimum lot size of one acre for nonresidential uses in Pinelands Villages, Pinelands Towns, and Regional Growth Areas served by any type of septic system. To recognize that Pinelands water quality standards can be met on smaller lots when advanced treatment systems are used, the Commission proposes to add new N.J.A.C. 7:50-5.27(b)3 and 5.28(b)3 to remove the one acre lot size requirements for advanced waste water treatment systems that serve
new or existing nonresidential uses in Pinelands Villages and Towns and Regional Growth Areas, respectively. These three management areas represent the growth-oriented portions of the Pinelands, where new nonresidential development is encouraged. It should be noted that Pinelands municipalities will retain the ability to establish whatever area and yard requirements they deem appropriate for nonresidential uses in zoning districts within these management areas. The Commission is simply removing what has proven to be an unnecessary restriction on the use of advanced treatment systems in these areas.

The Commission is also proposing minor changes to existing N.J.A.C. 7:50-5.27(b)2 and 5.28(b)2, which address waste water treatment systems for residential development, to more clearly distinguish them from the requirements in proposed new N.J.A.C. 7:50-5.27(b)3 and 5.28(b)3, which address waste water treatment systems for nonresidential development.

Subchapter 6

The Commission is proposing to remove superfluous language from N.J.A.C. 7:50-6.84(a)2ii and make a minor grammatical correction to the same provision. N.J.A.C. 7:50-6.84(a)2 sets forth the criteria under which new waste water treatment facilities are permitted to serve existing development in the Pinelands Area where a public health problem has been identified. One of the criteria is that the facility is designed to accommodate waste water only from existing residential, commercial, and industrial development. The Commission is proposing to modify this limitation as it unintentionally excluded other types of nonresidential development, such as schools, churches and other institutional uses. Rather than attempting to list all possible types of development, N.J.A.C 7:50-6.84(a)2ii will now require that facilities be designed to accommodate waste water from existing development.
The Commission is proposing an amendment to N.J.A.C. 7:50-6.84(a)5 to release the SeptiTech technology from the Pilot Program and authorize its permanent use on residential development on parcels of at least one acre in the Pinelands Area. SeptiTech will join Amphidrome, Bioclere and Fast as a technology that the Commission has determined meets the CMP water quality standards and has authorized for permanent use. Installation of a SeptiTech system will be subject to a series of requirements imposed on all alternate waste water treatment technologies approved for permanent use, including: mandatory recording of deed notices, conveyance of an approved operation and maintenance manual to the homeowner, compliance with construction standards, as-built certifications, alarm requirements, system warranty requirements and renewable operation and maintenance service agreements. (see N.J.A.C. 7:50-6.84(a)5iv(2)(C) through (J)).

The Commission is also proposing to amend N.J.A.C. 7:50-6.84(a)5iv(2)(E) to require the manufacturer or engineer of an alternate design waste water treatment system to include the cost of the system in its certification to the Commission and local board of health. Although the systems regulated by this subchapter have “graduated” from the Pilot Program and been granted permanent status for residential use, the Commission continues to collect and monitor the cost of installing systems. Manufacturers and engineers have been routinely providing cost information for the approved systems, and the rule amendment will simply formalize that practice.

Subchapters 6 and 10 require manufacturers of waste water technologies to install warning systems and provide warranties and maintenance contracts for the treatment systems. The specific requirements vary between the two subchapters. To eliminate any confusion and to ensure uniformity among installations of alternate waste water technology systems, the
Commission is proposing minor changes to both subchapters to make them consistent when appropriate.

**Subchapter 10**

The Commission proposes to update and clarify N.J.A.C. 7:50-10.21, which sets forth the history of the Pilot Program and the status of alternate design treatment technologies in the Program. Language chronicling the piloted technologies between 2002 and 2016 will be moved from N.J.A.C. 7:50-10.21(a) and more succinctly summarized in new N.J.A.C. 7:50-10.21(e). This provision includes a summary of the original technologies accepted into the Pilot Program, removed from the Pilot Program, and authorized for permanent use in the Pinelands Area.

Language describing the Commission’s decision to expand the Pilot Program in 2010 and accept four additional technologies into the Pilot Program in 2011 is proposed to be moved from N.J.A.C. 7:50-10.21(a) to new N.J.A.C. 7:50-10.21(f). The Commission is also proposing in new N.J.A.C. 7:50-10.21(f) to authorize the SeptiTech technology, which was one of the four technologies accepted into the Pilot Program in 2011, for permanent residential use on residential parcels of at least one acre. Proposed amendments to N.J.A.C. 7:50-10.21(f) will also include notification that the Commission has removed two other technologies accepted into the Pilot Program in 2011 (BioBarrier and Busse GT) because the technology either failed to meet the Plan’s water quality standards or because no systems were installed in the Pinelands Area.

The Commission is proposing to change the reporting obligations in N.J.A.C. 7:50-10.22(a)4 to require the Executive Director to submit periodic reports to the Commission instead of annual reports. The Executive Director has submitted annual reports on the installation, maintenance, and performance data for each piloted technology since the Program’s inception in 2002. The Commission has determined that at this advanced stage of the Program, annual
reports are not as critical as they were when the Commission was initially testing new technologies. To that end, the Commission is proposing to eliminate the annual reporting requirement and require the Executive Director to submit periodic reports on installation, maintenance and performance data. Consistent with this more focused, flexible reporting, the Commission is also proposing to eliminate the interim reporting requirement in N.J.A.C. 7:50-10.22(a)4 and replace it with an ongoing obligation for the Executive Director to report to the Commission any significant issues with the installation, maintenance, or performance of any of the piloted technologies.

The Commission is proposing to eliminate the requirement in N.J.A.C. 7:50-10.22(a)5v that a manufacturer or engineer identify installation problems in their certification to the Commission and local board of health upon completion of an individual system. The Commission believes that the reporting obligation of N.J.A.C. 7:50-10.22(a)5xi, which requires manufacturers to identify and discuss installation problems in semi-annual reports to the Executive Director, is sufficient for reporting such problems. It should be noted that there have not been any reported installation problems in many years.

The Commission is also proposing to eliminate the requirement in N.J.A.C. 7:50-10.22(a)5viii for manufacturers to report necessary maintenance and repairs within 10 days to the Executive Director and local board of health. The Commission no longer needs this information on an immediate basis. Requiring manufacturers to include the information in a semi-annual report, as required by N.J.A.C. 10.22(a)5xi, sufficiently informs the Commission of any maintenance and repairs.

Minor, non-substantive changes are being proposed to update cross-references in N.J.A.C. 7:50-10.22(a)2ii and 3 and N.J.A.C. 7:50-10.22(c) as a result of amendments to
N.J.A.C. 7:50-10.22(a) in 2018. A minor, non-substantive change is being proposed to N.J.A.C. 7:50-10.22(a)vi to correct the cross-reference regarding a required sample deed notice. A minor, non-substantive change is being proposed to N.J.A.C. 7:50-10.22(a)5ix to correct the cross-reference to the technology manufacturer’s manual.

A minor change is being proposed to N.J.A.C. 7:50-10.22(a)5xi to clarify that a manufacturer is required to submit twice-yearly reports to the Executive Director by June 5 and December 5 of each year and not necessarily on those dates.

The Commission has extended the Pilot Program many times since its inception in 2002 and is proposing to further extend it by amending N.J.A.C. 7:50-10.23(c). The Program has been very successful in identifying alternate septic system technologies that better meet the water quality standards of the CMP. Identifying more advanced technologies on residential lots smaller than 3.2 acres will serve to promote better water quality in the Pinelands Area. In addition, landowners in the Pinelands Area will benefit from an extension, as additional technologies entering the Program will expand consumer choice and stabilize prices. The Commission is proposing to extend the Program to August 2025, at which time the Executive Director will conduct a review and provide a status report to the Commission. The Commission is also proposing to amend N.J.A.C. 7:50-10.23(d) to provide the opportunity for an additional extension of the Pilot Program to 2027 in the event there is insufficient data on the piloted technologies at the time of the required review in 2025. The criteria for reviewing the piloted technologies remain unchanged, but a minor, non-substantive change is proposed to N.J.A.C. 7:50-10.23(c)2 to correct an incorrect cross-reference.

Social Impact
No adverse social impact is anticipated from the adoption of the proposed amendments. Society as a whole benefits from the protection of the Pinelands, and the proposed amendments are designed to do just that. The Pilot Program has resulted in the identification and use of alternate waste water treatment systems that, if properly maintained, can more efficiently meet the water quality standards of the CMP than conventional septic systems for residential use. The proposed amendments authorize a piloted technology for permanent use and extend the Pilot Program for the testing of more technologies until at least 2025. These amendments will have a positive social impact by expanding consumer choice, stabilizing prices, and furthering the protection of the Pinelands.

For nonresidential uses, the amendments recognize that the use of advanced treatment systems may allow certain businesses to be developed or expanded in conformance with CMP water quality standards on lots of less than one acre in size. In the Preservation Area District, Forest, Agricultural Production, and Rural Development Areas, qualifying businesses will be those that have been in operation for decades. In the Regional Growth Area, Pinelands Towns and Pinelands Villages, the amendments will provide a greater opportunity for nonresidential development in commercial and industrial zones that have long been zoned for such uses. The result will be a continuation of existing land use patterns and fulfillment of municipal zoning plans in a manner than meets all CMP environmental standards. The rule amendments will result in more efficient use of developable land in the Pinelands Area and not cause any significant changes in land use patterns.

**Economic Impact**

The proposed amendments will further the positive economic impacts of the Pilot Program on landowners seeking to develop residential parcels between one and 3.2 acres in
unsewered areas of the Pinelands Area. The CMP mandates a minimum residential lot size of 3.2 acres if the parcel is to be served by a conventional septic system. Some smaller parcels, however, are zoned for residential development in the CMP despite not meeting the 3.2 acre minimum for conventional septic systems, leaving landowners previously unable to develop those parcels. The Pilot Program has identified alternate design technologies that can meet the CMP’s water quality standards on parcels less than 3.2 acres, opening the door for residential development of parcels that are between one and 3.2 acres, and having a positive economic impact on landowners, the construction industry, and the region.

The proposed amendments will grant permanent approval of a piloted technology and extend the Pilot Program to at least 2025 so that the Commission can pilot more technologies. These changes will enhance consumer choice, improve competition, and potentially reduce costs to homeowners.

The elimination of the one acre minimum lot size for new nonresidential uses in the Regional Growth Area, Pinelands Towns and Pinelands Villages and the expansion of nonresidential uses in other management areas that utilize advanced treatment systems are expected to have a positive economic impact on property and business owners that can avail themselves of these changes. In addition, there could be a positive impact on municipalities who could see an increase in tax revenue from new or expanded businesses in areas zoned for commercial uses.

**Environmental Impact**

The proposed extension of the Pilot Program is expected to have a significant environmental benefit because alternate treatment systems, when properly maintained, can result in better water quality than conventional septic systems. The Commission will have the
opportunity to add alternate wastewater technologies to the Program, which will provide more data to evaluate and the potential to expand the list of permanently authorized technologies that can be utilized to improve water quality in the Pinelands.

**Federal Standards Statement**

Section 502 of the National Parks and Recreation Act of 1978 (16 U.S.C. §471i) called upon the State of New Jersey to develop a comprehensive management plan for the Pinelands National Reserve. The original plan adopted in 1980 was subject to the approval of the United States Secretary of the Interior, as are all amendments to the plan.

The Federal Pinelands legislation sets forth rigorous goals that the plan must meet, including the protection, preservation and enhancement of the land and water resources of the Pinelands. The proposed amendments are designed to meet those goals by allowing for the continued installation and monitoring of alternate design wastewater treatment systems for residential development through a highly successful pilot program.

There are no other Federal requirements that apply to the subject matter of these amendments.

**Jobs Impact**

The proposed extension of the Pilot Program provides a continued opportunity for new home construction on lots that are zoned for such use but are too small to support conventional septic systems and are not served by public sewerage infrastructure. The proposed amendments may therefore result in the creation of jobs associated with new home construction. Likewise, the proposed amendments may result in the creation of jobs associated with new business
construction because they provide a new opportunity for such development on lots less than one acre through the use of advanced treatment systems.

**Agriculture Industry Impact**

The proposed amendments to N.J.A.C. 7:50-5.24 will provide some agricultural operations in the Agricultural Production Area the potential to expand existing nonresidential uses on lots that they would otherwise not be able to expand due to lot size restrictions, if they convert to alternate waste water treatment systems from conventional septic systems.

The remaining proposed amendments are not expected to impact the agriculture industry in the Pinelands.

**Regulatory Flexibility Analysis**

The proposed amendments will extend the Pilot Program, allowing for the continued installation of alternate wastewater treatment technologies in the Pinelands Area. The Commission is also proposing to authorize the permanent use of a piloted technology. Manufacturers that install alternate design wastewater treatment systems in the Pinelands have to comply with reporting, recordkeeping and compliance requirements. It is believed that at least some of these manufacturers may be small businesses, as defined under the Regulatory Flexibility Act, N.J.S.A. 52:14B-16 et seq. These businesses may continue to incur costs to ensure compliance with the maintenance and monitoring requirements of N.J.A.C. 6:84(a)5iv(2) and N.J.A.C. 7:50-10.22(a)5. It is unlikely, however, that businesses will need to engage professional services to meet the requirements. Furthermore, the maintenance and monitoring requirements mostly involve providing manuals, maintenance guarantees and other documents...
that the manufacturers already have on hand, as well as the provision of resources for the collection and analysis of effluent sampling.

Some of the requirements may, however, involve more significant costs for the manufacturers, particularly the five-year renewable, non-cancellable maintenance contract required by N.J.A.C. 7:50-6.84(a)5iv(2), N.J.A.C. 6.85(b) and N.J.A.C. 7:50-10.22(a)5viii. However, these requirements are a critical part of the Pilot Program and the Commission would not be able to extend or expand the Program without them. It is likely that the associated costs will be passed on to the homeowner by the manufacturers, and they represent a relatively small price for the opportunity to develop lots that would otherwise not be developable.

The Commission is proposing to eliminate a certification and reporting requirement and impose an additional minor reporting requirement. N.J.A.C. 7:50-10.22(a)5xi requires manufacturers to identify and discuss installation problems in semi-annual reports to the Executive Director. To eliminate redundancy in reporting obligations, the Commission is proposing to eliminate an identical requirement in N.J.A.C. 7:50-10(a)5v, which mandates that manufacturers report installation problems in their certifications to the Commission and local board of health upon completion of an individual system.

The Commission is also proposing to add a requirement for manufacturers and engineers to include the cost of the installation of an alternate technology system in their certifications to the Commission and local board of health upon completion of the system. In practice, manufacturers and engineers have been routinely providing this information to the Commission, and the proposed amendment will merely formalize that practice. This requirement will not impose any financial burdens or have an adverse economic impact on manufacturers or engineers.
All other reporting, recordkeeping and compliance requirements for manufacturers and engineers of alternate design wastewater treatment systems participating in the Pilot Program remain unchanged. These requirements, including maintenance and monitoring, continue to be imposed on manufacturers of authorized technologies, regardless of business size. This is necessary to balance protection of Pinelands resources with the Commission’s desire to provide a continued opportunity for residential development on lots less than 3.2 acres in unsewered areas of the Pinelands. In fact, the Commission has identified proper system maintenance as the primary factor in ensuring that the alternate technologies will function in a manner that is consistent with CMP water quality standards. It is therefore critical that the requirements continue to be imposed on all manufacturers or their agents.

**Housing Affordability Impact Analysis**

The proposed amendments have the potential to reduce the cost of alternate design treatment systems for those landowners seeking to develop homes on lots between one and 3.2 acres in the unsewered portions of the Pinelands Area. By extending the Pilot Program to give the Commission the opportunity to add more technologies to the Program, and by authorizing one piloted technology for permanent use, the Commission is expanding the range of installation options for landowners. This could lead to increased competition among the vendors, resulting in decreased costs of the systems for homeowners.

While the proposed amendments may result in a decrease in the costs of alternate design treatment systems, and therefore a decrease in the average cost of housing utilizing such systems, it is important to note that these systems are being installed in the unsewered portions of the Pinelands Area and primarily in the Regional Growth Areas, Pinelands Villages and Pinelands
Towns. Permitted densities in the unsewered portions of these management areas are relatively low, ranging from one unit per acre to one unit per 3.2 acres. Housing units in the areas of the Pinelands Area where most affordable housing is targeted or anticipated would not be affected as such units are typically expected to be served by public sanitary sewer.

**Smart Growth Development Impact Analysis**

N.J.S.A. 52:14B-4 requires that proposed amendments be evaluated to determine their impacts, if any, on housing production in Planning Areas 1 or 2, or within designated centers, under the State Development and Redevelopment Plan (State Plan). Planning Areas 1 and 2 do not exist in the Pinelands Area. Likewise, the State Plan does not designate centers within the Pinelands Area. Instead, N.J.S.A. 52:18A-206.a provides that the State Plan shall rely on the Pinelands CMP for land use planning in the Pinelands. The Commission has evaluated the impact of the proposed amendments on Pinelands management areas designated by the CMP that are equivalent to Planning Areas 1 and 2 and designated centers, namely, the Regional Growth Areas, Pinelands Villages and Pinelands Towns.

The proposed amendments allow for the continued installation and monitoring of alternate design treatment systems for residential development in the Pinelands Area. These systems are used by landowners in the unsewered portions of the Pinelands Area that are zoned for residential development on lots of less than 3.2 acres in size. These areas are located primarily in Regional Growth Areas, Pinelands Villages and Pinelands Towns -- management areas designated for development by the CMP that are equivalent to designated centers under the State Plan. The proposed amendments do not increase the amount of permitted residential development in these management areas; rather, they provide a continued opportunity for the development of housing in accordance with
municipal zoning plans that were previously approved by the Commission. Thus, the proposed amendments are not expected to result in any changes in housing density within designated centers or in any other portions of the Pinelands Area.

There will be no effect on new construction in Planning Areas 1 and 2 as designated by the State Development and Redevelopment Plan as these State Planning Areas do not exist in the Pinelands Area.

Racial and Ethnic Community Criminal Justice and Public Safety Impact

The Commission has evaluated this rule proposal and determined that it will not have an impact on pretrial detention, sentencing, probation, or parole policies concerning adults and juveniles in the State. Accordingly, no further analysis is required.
Full text of the proposal follows (additions indicated with underlines thus; deletions indicated in brackets [thus]):

SUBCHAPTER 5. MINIMUM STANDARDS FOR LAND USES AND INTENSITIES

7:50-5.22 Minimum standards governing the distribution and intensity of development and land use in the Preservation Area District

(a)-(c) (No change).

(d) Minimum lot areas for non-residential structures shall be determined by application of the standards contained in N.J.A.C. 7:50-6.84(a)4 whether or not the lot is to be served by a centralized waste water treatment or collection facility pursuant to (b)4 above provided, however, that no such structure shall be located on a parcel of less than one acre. The requirements of this section shall not apply to a nonresidential use to be served by an individual on-site septic waste water treatment system in accordance with N.J.A.C. 7:50-6.84(a)5iii(2).

7:50-5.23 Minimum standards governing the distribution and intensity of development and land use in Forest Areas

(a)-(c) (No change).

(d) Minimum lot areas for non-residential structures shall be determined by application of the standards contained in N.J.A.C. 7:50-6.84(a)4 whether or not the lot is to be served by a centralized waste water treatment or collection facility pursuant to (b)12 above, provided, however, that no such structure shall be located on a parcel of less than one acre. The requirements of this section shall not apply to a nonresidential use to be served by an individual on-site septic waste water treatment system in accordance with N.J.A.C. 7:50-6.84(a)5iii(2).

7:50-5.24 Minimum standards governing the distribution and intensity of development and land use in Agricultural Production Areas

(a)-(c) (No change).

(d) Minimum lot areas for non-residential structures shall be determined by application of the standards contained in N.J.A.C. 7:50-6.84(a)4 whether or not the lot is to be served by a centralized waste water treatment or collection facility pursuant to (b)9 above, provided, however, that no such structure shall be located on a parcel of less than one acre. The requirements of this section shall not apply to a nonresidential use to be served by an individual on-site septic waste water treatment system in accordance with N.J.A.C. 7:50-6.84(a)5iii(2).
7:50-5.26 Minimum standards governing the distribution and intensity of development and land use in Rural Development Areas

(a)-(c) (No change).

(d) Minimum lot areas for non-residential structures shall be determined by application of the standards contained in N.J.A.C. 7:50-6.84(a)4 whether or not the lot is to be served by a centralized waste water treatment or collection facility pursuant to (b)10 above, provided, however, that no such structure shall be located on a parcel of less than one acre. The requirements of this section shall not apply to a nonresidential use to be served by an individual on-site septic waste water treatment system in accordance with N.J.A.C. 7:50-6.84(a)5iii(2).

7:50-5.27 Minimum standards governing the distribution and intensity of development and land use in Pinelands Villages and Towns

(a) (No change.)

(b) No residential dwelling unit or nonresidential use shall be located on a parcel of less than one acre unless served by either:

1. A centralized waste water treatment plant; [or]

2. For residential development, a [A] community on-site waste water treatment system serving two or more [residential] dwelling units [which] that meets the standards of N.J.A.C. 7:50-6.84(a)5 or 10.21 through 10.23, provided that the overall residential density on the parcel does not exceed one dwelling unit per acre[.]; or

3. For nonresidential development, an individual on-site septic waste water treatment system that meets the standards of N.J.A.C. 7:50-6.84(a)5.

(c) (No change.)

7:50-5.28 Minimum standards governing the distribution and intensity of development and land use in Regional Growth Areas

(a) (No change.)

(b) No residential dwelling unit or nonresidential use shall be located on a parcel of less than one acre unless served by either:

1. A centralized waste water treatment plant; [or]
2. For residential development, a [A] community on-site waste water treatment system serving two or more [residential] dwelling units that [which] meets the standards of N.J.A.C. 7:50-6.84(a)5 or 10.21 through 10.23, provided that the overall residential density on the parcel does not exceed one dwelling unit per acre[.]; or

3. For nonresidential development, an individual on-site septic waste water treatment system that meets the standards of N.J.A.C. 7:50-6.84(a)5.

SUBCHAPTER 6. MANAGEMENT PROGRAMS AND MINIMUM STANDARDS

7:50-6.84 Minimum standards for point and non-point source discharges

(a) The following point and non-point sources may be permitted in the Pinelands:

1. (No change.)

2. Development of new waste water treatment or collection facilities [which] that are designed to improve the level of nitrate/nitrogen attenuation of more than one existing on-site waste water treatment system where a public health problem has been identified may be exempted from the standards of (a)1ii above provided that:

   i. (No change.)

   ii. The facility is designed only to accommodate waste water from existing [residential, commercial, and industrial] development;

   iii.-iv. (No change.)

3.-4. (No change.)

5. Individual on-site septic waste water treatment systems that are intended to reduce the level of nitrate/nitrogen in the waste water, provided that the following standards are met:

   i.-iii. (No change.)

   iv. The design of the system and its discharge point, and the size of the entire contiguous parcel on which the system or systems is located, will ensure that ground water exiting from the entire contiguous parcel or entering a surface body of water will not exceed two parts per million nitrate/nitrogen calculated pursuant to the Pinelands dilution model dated December 1993, as amended, (Appendix A) subject to the following assumptions and requirements. For purposes of this section, the entire
contiguous parcel may include any contiguous lands to be dedicated as open space as part of the proposed development but may not include previously dedicated road rights-of-way or any contiguous lands that have been deed restricted pursuant to N.J.A.C. 7:50-5.30 or 5.47:

(1) (No change.)

(2) For Amphidrome, Bioclere, SeptiTech, and FAST systems:

(A) For residential development using the Amphidrome [or] Bioclere, or SeptiTech system, the system will be located on a parcel of at least one acre for each individual single-family dwelling unit or the system or systems for multi-family developments will be located on a parcel with an overall density equal to or greater than one residential unit per acre of land;

(B)-(D) (No change.)

(E) Prior to the local board of health’s issuance of a certification of compliance, or similar authorization to occupy the development and utilize the treatment system, the technology manufacturer or its agent and a New Jersey licensed professional engineer shall provide written certification, in a form acceptable to the Commission and the local board of health, that installation of each system, and all components and appurtenances, including, but not limited to, pumps, switches, blowers, micro-processors, and local audio/visual and service provider notification alarms have been performed properly and the system and all its components are operating properly. The manufacturer or its agent shall include in the certification the cost of the installation:

(F) The manufacturer or its agent shall provide to each owner an operation and maintenance manual; [and shall provide a five-year warranty consistent with the requirements of N.J.A.C. 7:50-10.22(a)5vii]

(G) Each system shall be equipped with a functioning warning system which will activate audible and visual alarms which can be readily seen and heard by occupants of the building served and which also provide immediate remote alarm notification to the system service provider. **Systems may be equipped with a telemetry control panel, attached to an Internet-based interface that provides continuous remote**
monitoring, information management and control of the advanced wastewater pretreatment device. Systems that do not have a telemetry control panel shall use an active phone line equipped with an auto dialer to notify the authorized service provider of alarm conditions, including if power to any of the system equipment is disconnected. The alarm and its switch shall not be on the same electrical circuit as the system pump(s), blower(s) and system component control switches. The alarm system shall periodically communicate with the authorized service provider's remote monitoring system to ensure against unauthorized alarm system disconnections [and shall be covered at all times by a renewable Operation and Maintenance Agreement in accordance with N.J.A.C. 7:50-6.85(b)];

(H)-(J)  (no change in text.)

(K)  Each system shall be covered by an initial five-year warranty and a renewable, minimum five-year maintenance contract that cannot be arbitrarily cancelled and which includes a provision requiring that the manufacturer or its agent inspect the system at least once a year and undertake any maintenance or repairs determined to be necessary during any such inspection or as a result of observations made at any other time, including during effluent monitoring. The warranty and maintenance contract shall be consistent with the sample warranty and maintenance contract approved pursuant to N.J.A.C. 7:50-10.22(a)2v.

(3)  (No change.)

v.-ix.  (No change.)

6.  (No change.)

7:50-6.85 Individual and non-individual onsite subsurface sewage disposal systems and petroleum tank maintenance

(a)  (no change.)

(b)  All Pinelands alternate design wastewater treatment systems in active use shall be equipped with a functioning alarm [dialing capability] system that conforms to the requirements of N.J.A.C. 7:50-6.84(a)5iv(2)(G) and shall be covered under a renewable operation and maintenance contract [agreement] that conforms to the requirements
of N.J.A.C. 7:50-6.84(a)5iv(2)(K) for as long as the system is in active use. [The operation and maintenance agreement shall, at minimum, provide for at least once annual service calls by a qualified service technician. The operation and maintenance agreement shall also provide for periodic onsite inspection and maintenance service visits that meet the minimum operation and maintenance requirements of the Pinelands alternate design wastewater treatment system manufacturer or vendor.]

(c)-(d) (no change.)

SUBCHAPTER 10 PILOT PROGRAMS
PART IV – ALTERNATE DESIGN TREATMENT SYSTEMS PILOT PROGRAMS

7:50-10.21 Purpose

(a)-(b) (No change.)

(c) In 2000, the Commission formed a special committee to investigate alternate septic system technologies that would better meet the water quality requirements of N.J.A.C. 7:50-6, Part VIII, for residential development on lots smaller than 3.2 acres where such lots are currently authorized by N.J.A.C. 7:50-5. After conducting extensive research, the Committee identified five technologies that can be expected to meet these water quality requirements for residential development. The Committee recommended that an interim program be developed for the approval, installation and monitoring of the five technologies for use under certain conditions and safeguards. [Based on the available information, the Committee recommended that the Ashco RFS III system be allowed on residential lots of at least 1.5 acres and the other four systems be allowed on residential lots of at least one acre. In November 2006, the Commission decided to remove the Ashco RFS III system from the Alternate Design Treatment Systems Pilot Program. The Commission made this decision due to the manufacturer’s failure to make systems commercially available in the Pinelands during the initial five-year period of the pilot program or to otherwise demonstrate the ability or intention for future participation in the program.] Residential development using any of the authorized systems would still have to conform to the lot size and density requirements contained in the municipal land use ordinances that have been certified by the Commission pursuant to N.J.A.C. 7:50-3. [In 2010, the Commission decided to release two of the original pilot program technologies (Amphidrome and Bioclere) from the pilot program and authorize them for permanent use, subject to the provisions of N.J.A.C 7:50-6.84(a)5iv(3). The Commission also decided to provide an opportunity for expansion of the pilot program to include certain other residential nutrient reducing onsite wastewater treatment technologies that have attained verification and/or certification through the United States Environmental Protection Agency Environmental Technology Verification (USEPA ETV) Program or the National Sanitation Foundation/ American National Standards Institute (NSF/ANSI) Standard 245 testing program. Information regarding the USEPA ETV Program is available from the United States Environmental Protection Agency website at: http://www.epa.gov/etv/vt-wqp.html#dwtt and http://www.epa.gov/etv/pubs/600s07004.pdf. Information regarding the NSF/ANSI
Standard 245 testing program is available from the National Sanitation Foundation website at:
http://www.nsf.org/business/wastewater_certification/standards.asp?program=WastewaterCert#245. In 2013, the Commission decided to remove the Cromaglass technology from the Alternate Design Treatment Systems Pilot Program. The Commission made this decision based on the Cromaglass technology’s inability to meet the water quality standards contained in N.J.A.C. 7:50-6, Part VIII. In 2016, the Commission decided to release the only remaining original pilot program technology (FAST) from the pilot program and authorize it for permanent use on parcels of at least 1.4 acres in size, subject to the provisions of N.J.A.C. 7:50-6.84(a)5iv(3).]

(d) (No change.)

(e) Upon adoption of the Alternate Design Treatment Systems Pilot Program in 2002, the Commission authorized five technologies to be tested for residential use in the Pinelands Area: Amphidrome, Ashco RFS III, Bioclere, Cromaglass and FAST. In 2006, the Commission removed the Ashco RFS III technology from the pilot program due to the manufacturer’s failure to make systems commercially available in the Pinelands Area during the initial five-year period of the pilot program or to otherwise demonstrate the ability or intention for future participation in the program. In 2013, the Commission removed the Cromaglass technology from the pilot program due to its inability to meet the water quality standards in N.J.A.C. 7:50-6, Part VIII. The remaining three technologies successfully demonstrated their ability to meet the water quality standards of this Plan, and were released from the pilot program and authorized for permanent use in the Pinelands Area in accordance with N.J.A.C. 7:50-6.84(a)5iv. The Amphidrome and Bioclere technologies were released in 2010 and authorized for residential development on parcels of at least 1.0 acre. The FAST technology was released in 2016 and authorized for residential development on parcels of at least 1.4 acres.

(f) In 2010, amendments to this subchapter authorized the Commission to expand the pilot program and add more residential nutrient reducing onsite wastewater treatment technologies that have attained verification and/or certification through the United States Environmental Protection Agency Environmental Technology Verification (USEPA ETV) Program or the National Sanitation Foundation/American National Standards Institute (NSF/ANSI) Standard 245 testing program. Information regarding the USEPA ETV Program is available from the United States Environmental Protection Agency website at: http://www.epa.gov/etv/vt-wqp.html#dwtt and http://www.epa.gov/etv/pubs/600s07004.pdf Information regarding the NSF/ANSI Standard 245 testing program is available from the National Sanitation Foundation website at:
http://www.nsf.org/business/wastewater_certification/standards.asp?program=WastewaterCert#245. Four technologies were evaluated pursuant to N.J.A.C. 7:50-10.23(b) and accepted into the pilot program in 2011. In 2020, the Commission released one of those technologies, SeptiTech, from the pilot program in recognition of its ability to meet the water quality standards in N.J.A.C. 7:50-6, Part VIII, and authorized it for residential
development on parcels of at least 1.0 acre in accordance with N.J.A.C. 7:50-6.84(a)5iv. The Commission also removed two technologies from the pilot program in 2020: BioBarrier, which failed to meet the water quality standards in N.J.A.C. 7:50-6, Part VIII; and Busse GT, which could not be evaluated as the technology was never installed in the Pinelands Area after being accepted into the pilot program.

7:50-10.22 General standards

(a) Alternate design pilot program treatment systems shall be authorized for residential use in all municipalities provided that the following standards are met:

1. (No change.)

2. The manufacturer of the alternate design pilot program treatment system has submitted to the Executive Director and the Executive Director has approved:

   i. (No change.)

   ii. A description of the automatic dialing system required in (a)5ii [(a)6ii] below, and a description of how and when that system will function;

   iii.-v. (No change.)

   vi. A sample deed notice that is consistent with (a)5ix [(a)6viii] below.

3. Subject to being increased during the pilot program based on the results of a hearing conducted pursuant to (a)4 [(a)5] below, each USEPA ETV or NSF/ANSI Standard 245 technology approved by the Commission for participation in the pilot program pursuant to N.J.A.C. 7:50-10.23(b) shall be located on a parcel containing sufficient land area to comply with the two parts per million nitrogen requirement and the water quality standards contained in N.J.A.C. 7:50-6, Part VIII, as calculated using the Pinelands Septic Dilution Model and the expected effluent total nitrogen value for the technology based upon the findings of the USEPA ETV and/or NSF/ANSI Standard 245 test data.

4. The Executive Director shall periodically [submit an annual] report to the Commission on the [describing] installation, maintenance, and performance data for each technology. The Executive Director shall also [submit an interim] report to the Commission if he or she [it is] determines[d] there is a significant installation, maintenance, or performance issue with one or more technologies that needs to be addressed [before the issuance of the next annual report]. Copies of any report issued by the Executive Director [each annual and interim report] shall be provided to each manufacturer and agent of a technology that is discussed in that report. If the [it is determined in a] report determines either that a
manufacturer or its agent is not adhering to any of the requirements of this pilot program or that any one of the technologies, based on maintenance or installation issues or an evaluation of all the monitoring results for that technology under this pilot program, is not meeting the minimum water quality standards in N.J.A.C. 7:50-6.83 or the two parts per million total nitrogen requirement in (a)5xii [(a)5x] below on all lots smaller than 3.2 acres or on lots smaller than a particular size because the effluent existing the system is higher than was anticipated in establishing the lot sizes in (a)3 above:

i.-ii.  (No change.)

5. Conditions for use of alternate design pilot program treatment systems are as follows:

i.  (No change.)

ii. Each system shall be equipped with [automatic dialing capability] a functioning alarm system that conforms to the requirements of N.J.A.C. 7:50-6.84(a)5iv(2)(G) [to the manufacturer, or its agent, in the event of a mechanical malfunction]. The manufacturer or its agent shall report to the Executive Director each such malfunction within five days of its occurrence, describing the nature of the mechanical malfunction, the measures taken to correct the malfunction and the success of those measures. [Periodic dialing or some other fail safe mechanism shall be provided to ensure against unauthorized disconnections];

iii.-iv. (No change.)

v. The manufacturer or its agent and a New Jersey licensed professional engineer shall certify to the Commission and the local board of health that installation of each system has been properly completed and that the system and all of its components are operating properly. The manufacturer or its agent shall include in the certification the cost of the installation [and a description of any problem encountered during the installation];

vi.-vii. (No change.)

viii. Each system shall be covered by an initial five-year warranty and a renewable, minimum five-year maintenance contract that cannot be arbitrarily cancelled [and is renewable] and which includes a provision requiring that the manufacturer or its agent inspect the system at least once a year and undertake any maintenance or repairs determined to be necessary during any such inspection or as a result of observations made at any other time, including [when] during effluent monitoring [occurs or that is identified based on the results of any effluent monitoring]. Said
warranty and maintenance contract shall be consistent with the sample warranty and maintenance contract approved pursuant to (a)2v above. [In addition to complying with the reporting requirements of N.J.A.C. 7:9A-3.4(b) concerning system malfunctions, the manufacturer or agent shall report to the Executive Director and local board of health on all necessary maintenance and repairs within 10 days and shall report to the Executive Director and local board of health semi-annually as to the inspections conducted during the preceding six months including a description of any maintenance and repairs that were undertaken and the success of those measures and their costs];

viii. (No change.)

ix. The property owner shall record with the deed to the property a notice consistent with the sample deed notice approved pursuant to (a)2vi above that identifies the technology, acknowledges the owner’s responsibility to operate and maintain it in accordance with the manual required in (a)2vi [(a)6vi] above, and grants access, with reasonable notice, to the local board of health, the Commission and its agents for inspection and monitoring purposes. The recorded deed shall run with the property and shall ensure that the maintenance requirements are binding on any owner of the property during the life of the system and that the monitoring requirements are binding on any owner of the property during the time period the monitoring requirements apply pursuant to this pilot program or any subsequent regulations adopted by the Commission that apply to said system;

x. (No change.)

xi. By June 5 and December 5 of each calendar year, until the conclusion of the pilot program, each manufacturer or its agent shall submit to the Executive Director a report which includes the number of systems installed during the previous six months and since the beginning of the pilot program, a discussion of any installation problems and what has been done to address those problems, an analysis and evaluation of the monitoring results to date and a discussion of any operational or maintenance issues, including the number of systems requiring maintenance or repairs and the nature and success of such maintenance and repairs, and the number of times the automatic dialing system was set off and the reasons for each such occurrence;

xii.-xiii. (No change.)

(b) (No change.)
(c) The technology manufacturer or its agent shall troubleshoot and attempt to remediate substandard performance of any system that fails to meet effluent concentration targets after two consecutive sampling events by implementing measures including, but not limited to, homeowner education, process adjustments, and equipment retrofits. The technology manufacturer or its agent shall report to the Executive Director and local board of health semi-annually on all remedial measures undertaken, pursuant to (a)5viii [(a)6viii] above.

7:50-10.23 Pinelands Commission approval and evaluation

(a)-(b) (No change.)

(c) The Executive Director shall review this pilot program relative to any approved USEPA and NSF/ANSI Standard 245 treatment technologies no later than August 5, 2025 [August 5, 2017], and shall report to the Commission within three months of that date on its implementation. The Executive Director shall determine whether this pilot program is successful in accordance with the following criteria:

1. (No change.)

2. The maintenance required for each alternate design pilot program treatment system technology to meet the efficiency set forth in [(b)1] (c)1 above;

3.-6. (No change)

(d) If the Executive Director finds that the number of monitoring events for any approved USEPA and NSF/ANSI Standard 245 treatment technologies is not adequate to evaluate any of those technologies under this pilot program in accordance with (c) above, the Executive Director shall so inform the Commission and, upon receiving the Commission’s approval, initiate a second review to be completed no later than [August 5, 2019] August 5, 2027.

(e)-(g) (No change.)
RESOLUTION OF THE NEW JERSEY PINELANDS COMMISSION

NO. PC4-20–20

TITLE: To Authorize the Executive Director to Continue to Expend Funds for Fiscal Year 2021 at the Same Level of Expenditures as Fiscal Year 2020 until the Adoption of the Fiscal Year 2021

Commissioner Avery moves and Commissioner Lloyd seconds the motion that:

WHEREAS, pursuant to the Pinelands Protection Act, the Pinelands Commission is charged with continuing implementation and monitoring of the Pinelands Comprehensive Management Plan; and

WHEREAS, it is anticipated that the New Jersey Legislature will appropriate funds on July 1, 2020 for the first quarter of FY 2021 and the remainder on September 1, 2020 to support the Commission’s operations during Fiscal Year 2021; and

WHEREAS, pursuant to N.J.S.A 13:18A-5h, no action authorized by the Commission shall have force or effect until ten (10) days, Saturdays, Sundays and public holidays excepted, after a copy of the minutes of the meeting of the Commission has been delivered to the Governor for review, unless prior to expiration of the review period the Governor shall approve same, in which case the actions shall become effective upon such approval.

NOW, THEREFORE, BE IT RESOLVED that the Executive Director is authorized to continue to expend funds during Fiscal Year 2021 in accordance with guidance issued by the Department of Treasury until the Commission’s adoption of the Fiscal Year 2021 Budgets.
