Seventh Annual Pinelands Summer Short Course

June 23, 2023
Welcome PINELANDS FRIENDS
1808 TRAIL 2022 OCSJ TRAIL CREW
Turtle Trouble

- Habitat destruction and alteration
- Unsustainable harvest
- Increasing populations of predators
- Climate change
- Road mortality
Life...in the Slow Lane

- Turtles have what is sometimes called a "slow" life history
  - Long lived
  - Slow to mature; frequently even slower for females
  - No parental care
  - Most offspring don't survive to adulthood
  - Adults have few predators
  - Persistence of population depends on adult survival

Sea Turtles Can Live for Years
What's the Secret to a Long Life?

A Burden-Free Life

Mommy?

Nope
Turtle Trouble

- Habitat destruction and alteration
- Unsustainable harvest
- Increasing populations of predators
- Climate change
- Road mortality
ORCHID HABITAT

- Pine/Oak forests
- Sphagnum bogs
- Stream corridors
- Roadside ditches
- Savannas
- Meadows
- Cedar swamps
- Powerline cuts
Tap Roots: The Making of The Album

3D Sound and Binaural Recording:
The 3rd dimension of sound is location. By using a specialized field microphone, Tap Roots 3D contains binaural recordings of the NJ Pinelands from all 4 seasons. This method of recording creates a 3D effect when wearing headphones which brings to life the forest around you.

Science & Art:
Tap Roots blends relaxing, guitar-driven music with those 3D sounds of the Pinelands to create the ultimate musical journey. One that will transcend you through the seasons while slowly easing you from morning to night simultaneously soothing body and mind, inhibiting and re-centering your mind.
