We continue to be proactive in our response to Coronavirus (COVID-19). Due to this public health emergency our equipment is experiencing blockages from “flushable” and disinfectant wipes.

With the increased use of wipes (“flushable”, wet, baby, anti-bacterial, disinfectant) and paper towels, we are reminding all residents to **PLEASE make sure you put these items IN THE TRASH and DO NOT FLUSH them down the toilet!**

**DO NOT FLUSH:**
- Wet wipes
- Baby wipes
- Anti-bacterial wipes
- Disinfectant wipes
- Paper towels

**YOU CAN HELP**
Do your part to prevent costly and time consuming equipment blockages or breakdowns and aid in preventing sewer backups.
We continue to be proactive in our response to Coronavirus (COVID-19). Due to this public health emergency our equipment is experiencing blockages from “flushable” and disinfectant wipes.

With the increased use of wipes (“flushable”, wet, baby, anti-bacterial, disinfectant) and paper towels, we are reminding all residents to **PLEASE make sure you put these items IN THE TRASH and DO NOT FLUSH them down the toilet!**

**THE “FLUSHABLE” WIPES MYTH**

- Flushable wipes are often marketed as an alternative to toilet paper and claim to be “flushable” and “sewer safe.”
- These wipes DO NOT break down when flushed in both private household plumbing and the public sewer system.
- Serious blockages resulting in septic and sewer backups may occur.
- Disposable wipes, even those labeled ‘flushable’ should be disposed of in the trash, not flushed down the toilet.

**DO NOT FLUSH:**
- Wet wipes
- Baby wipes
- Anti-bacterial wipes
- Disinfectant wipes
- Paper towels

**3 P’S of FLUSHING**
- Pee
- Paper
- Poo

Safely flush human waste and toilet paper which easily dissolves in water!
