4 th Qtr				

Formula: $\frac{\text{Influent} - \text{Effluent}}{\text{Influent}} \times 100 = \% \text{ Recovery}$

Example: If you are using Silver Test Papers with a scale of 0 to 10, first take a reading of the influent (the untreated waste water), then take the reading of the effluent (the treated waste water). Use those numbers in the % recovery formula.
