**I. INTRODUCTION**

1  
2 **Q. PLEASE STATE YOUR NAME, OCCUPATION AND BUSINESS**  
3 **ADDRESS.**

4 A. My name is David E. Peterson. I am the President of and a Senior Consultant  
5 with Chesapeake Regulatory Consultants, Inc. ("CRC"). My business address is  
6 10351 Southern Maryland Blvd., Suite 202, Dunkirk, Maryland 20754.

7  
8 **Q. WHAT IS YOUR EDUCATIONAL BACKGROUND AND EXPERIENCE**  
9 **IN THE PUBLIC UTILITY FIELD?**

10 A. I graduated with a Bachelor of Science degree in Economics from South Dakota  
11 State University in May of 1977. In 1983, I received a master's degree in  
12 Business Administration from the University of South Dakota. My graduate  
13 program included accounting and public utility courses at the University of  
14 Maryland.

15  
16 In September 1977, I joined the Staff of the Fixed Utilities Division of the South  
17 Dakota Public Utilities Commission as a rate analyst. My responsibilities at the  
18 South Dakota Commission included analyzing and testifying on ratemaking  
19 matters arising in rate proceedings involving electric, gas and telephone utilities.

20  
21 Since leaving the South Dakota Commission in 1980, I have continued  
22 performing cost of service and revenue requirement analyses as a consultant. In  
23 December 1980, I joined the public utility consulting firm of Hess & Lim, Inc. I  
24 remained with that firm until August 1991, when I joined CRC. Over the years, I  
25 have analyzed filings by electric, natural gas, propane, telephone, water,  
26 wastewater, and steam utilities in connection with utility rate and certificate

1 proceedings before federal and state regulatory commissions. A copy of my  
2 curriculum vitae is provided in Appendix A attached to my testimony.

3  
4 **Q. HAVE YOU PREVIOUSLY PRESENTED TESTIMONY IN PUBLIC**  
5 **UTILITY RATE PROCEEDINGS?**

6 A. Yes. I have presented testimony in 175 other proceedings before the state  
7 regulatory commissions in Alabama, Arkansas, California, Colorado,  
8 Connecticut, Delaware, Indiana, Kansas, Maine, Maryland, Montana, Nevada,  
9 New Jersey, New Mexico, New York, Pennsylvania, South Dakota, West  
10 Virginia, and Wyoming, and before the Federal Energy Regulatory Commission.  
11 Collectively, my testimonies have addressed the following topics: the appropriate  
12 test year, rate base, revenues, expenses, depreciation, taxes, capital structure,  
13 capital costs, rate of return, cost allocation, rate design, life-cycle analyses,  
14 affiliate transactions, mergers, acquisitions, and cost-tracking procedures.

15  
16 In addition, I testified twice before the Energy Subcommittee of the Delaware  
17 House of Representatives on the issues of consolidated tax savings and tax  
18 normalization. Also, I have presented seminars on public utility regulation,  
19 revenues requirements, cost allocation, rate design, consolidated tax savings,  
20 income tax normalization and other ratemaking issues to the Delaware Public  
21 Service Commission, to the Commissioners and Staff of the Washington Utilities  
22 and Transportation Commission, and to the Colorado Office of Consumer  
23 Counsel.

24  
25 **Q. HAVE YOU TESTIFIED IN OTHER PROCEEDINGS BEFORE THE**  
26 **NEW JERSEY BOARD OF PUBLIC UTILITIES (“BOARD”)?**

27 A. Yes, I have. I have submitted testimony in the following proceedings before the  
28 Board:

15 **Q. ON WHOSE BEHALF ARE YOU APPEARING IN THIS PROCEEDING?**

16 A. My appearance in this proceeding is on behalf of the Division of Rate Counsel  
17 (“Rate Counsel”).  
18  
19

20 **II. SUMMARY**

21 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**  
22 **PROCEEDING?**

23 A. The purpose of my testimony is to present Rate Counsel’s cost allocation and rate  
24 design issues with Atlantic City Electric Company’s (“ACE” or “the Company”) proposed  
25 plug-in vehicle charging initiatives (“the “PIV Program”), with a  
26 specific interest on the impacts of the PIV program on ACE’s residential  
27 customers.  
28

29 **Q. BEFORE YOU DISCUSS YOUR FINDINGS AND**  
30 **RECOMMENDATIONS, PLEASE PROVIDE A VERY BRIEF**  
31 **OVERVIEW ON ACE’S PROPOSAL IN THIS PROCEEDING.**

32 A. ACE’s original Petition in this matter was filed on February 22, 2018. The PIV  
33 Program outlined in that Petition was subsequently altered and expanded upon in

1 an Amended Petition filed on December 17, 2019. ACE’s Amended Petition  
2 seeks Board approval for the Company’s expanded PIV Program. ACE’s most  
3 recent proposed PIV Program is a multi-year, \$42.107 million initiative consisting  
4 of thirteen separate rate, rebate and incentive offerings for PIV charging and PIV  
5 bus conversion. The thirteen offerings and their primary features are summarized  
6 below.

- 7
- 8 • **Offering #1:** Residential Whole House Time-of-Use [“TOU”] Rates.
  - 9 • **Offering #2:** Off-Peak, Off-Bill Incentive for Residential Customers with  
10 Existing, Installed EVSE.
  - 11 • **Offering #3:** Level 2 EVSE and Installation Rebates for Residential  
12 Customers without Existing Chargers, Plus Off-Peak Incentive.
  - 13 • **Offering #4:** Rebates for Level 2 EVSE and Installation, and Demand  
14 Charge Offset Incentive for MDUs with dedicated on-site parking,  
15 currently without existing EVSE.
  - 16 • **Offering #5:** Rebates for Level 2 EVSE for Workplaces, Plus Demand  
17 Charge Offset Incentive.
  - 18 • **Offering #6:** Rebates for Level 2 EVSE for Electric Vehicle Fleets, Plus  
19 Demand Charge Offset Incentive.
  - 20 • **Offering #7:** Public Charging – Utility-Owned and Operated DCFCs.
  - 21 • **Offering #8:** Public Charging – Utility-Owned Level 2 EVSEs.
  - 22 • **Offering #9:** Demand Charge Incentive for “Make Ready” Work  
23 Incentives for Non-Utility Owned Public DCFCs.
  - 24 • **Offering #10:** The Innovation Fund.
  - 25 • **Offering #11:** Electric School Bus Fund.
  - 26 • **Offering #12:** New Jersey Transit Bus Electrification.
  - 27 • **Offering #13:** The Green Adder.
- 28

1 For each of the Offerings, ACE proposes to establish two regulatory assets: (1) a  
2 Program Regulatory Asset to capture all non-capital related costs incurred in  
3 connection with Offerings 1 through 12; and (2) a Green Adder Regulatory Asset  
4 for renewable energy-related costs (Offering 13). As proposed, the Program  
5 Regulatory Asset will accrue a carrying charge, equal to the Company's most  
6 recent approved weighted cost of capital and will be amortized in rates over a  
7 five-year period beginning with the Company's next base rate case. The proposed  
8 Green Adder Regulatory Asset will track renewable energy costs on a dollar-for-  
9 dollar basis each year corresponding to the Company's purchase of renewable  
10 energy credits. The proposed Green Adder Regulatory Asset also includes an  
11 annual true-up mechanism to ensure the matching of revenues and expenses.  
12

13 **Q. WHAT IS YOUR OVERALL IMPRESSION OF THE COMPANY'S**  
14 **PROPOSED PIV PROGRAM?**

15 A. From a cost allocation and rate design standpoint, my overall impression is not  
16 favorable. ACE's PIV Program is inconsistent with cost-based ratemaking  
17 principles in that it is intentionally designed to force ACE's general body of  
18 customers to subsidize the Company's costs of providing PIV service to relatively  
19 few electric vehicle customers. My specific cost allocation and rate design  
20 concerns, as they relate to the residential class, are explained in more detail in the  
21 following section of my testimony.  
22  
23

24 **III. PIV – Rate Design Considerations**

25  
26 **Q. WHAT CATEGORIES OF COSTS ARE EXPECTED TO BE INCURRED**  
27 **UNDER THE PROPOSED PIV PROGRAM?**

1 A. ACE’s witnesses have identified two broad categories of costs that will be  
2 incurred under its PIV Program, capital costs and regulatory asset-related costs.  
3 Capital costs, which include time-of-use meters and PIV charging equipment,  
4 account for approximately \$15 million of the total expected cost of the PIV  
5 Program. Regulatory Asset-related costs account for the remaining \$27 million of  
6 total estimated PIV Program Costs. ACE witness Michael T. Normand identified  
7 the following subcategories of costs to be included in his proposed Program  
8 Regulatory Asset account:

- 9 • Rebates on electric vehicle servicing (charging) equipment (a/k/a  
10 EVSE);
- 11 • Rebates on installation costs;
- 12 • Rate incentives;
- 13 • Community and Transit Funds/Grants;
- 14 • Recurring Network & Data costs;
- 15 • Program Implementation and Administrative costs; and
- 16 • Incremental Depreciation and Operation and Maintenance  
17 (“O&M”) expenses.<sup>1</sup>

18  
19 **Q. WHICH OF THE COMPANY’S OFFERINGS IMPACT ACE’S**  
20 **RESIDENTIAL CUSTOMERS?**

21 A. The Offerings that impact ACE’s residential customers are identified in ACE  
22 witness Mr. Normand’s Schedule (MTN)-3, page 4, attached to his Direct  
23 Testimony in this proceeding. Therein, it is shown that capital and regulatory  
24 assets costs incurred under Offerings #1, #2, and #3 are 100 percent allocated to  
25 the residential class. In addition, capital and/or Program Regulatory Asset costs  
26 incurred under Offerings #7, #8, #10, #11 and #12 are, in part (59 percent), to be  
27 allocated to the residential class. That is, any costs incurred in connection with

---

<sup>1</sup> Normand Schedule (MTN)-3, page 1.

1 these PIV Offerings that are not directly paid for by the PIV customer will be  
2 allocated to the general body of residential customers and become part of base  
3 rates for that service class. In total, Mr. Normand determined that \$21.9 million,  
4 or 52 percent, of the \$42.1 million estimated total cost will be allocated to the  
5 residential class.<sup>2</sup>  
6

7 **Q. WHAT IS YOUR OBJECTION TO OFFERING #1 – WHOLE HOUSE**  
8 **TIME OF USE (“TOU”)?**

9 A. My objection to Offering #1 is the same as it is for the other Offerings – i.e.,  
10 ACE’s proposal results in non-PIV residential customers paying for a service they  
11 do not receive. For example, Mr. Normand estimates that the Company will  
12 spend \$120,000 in capital costs for TOU electric meters for PIV customers  
13 seeking service under Offering #1. TOU meters are more expensive than non-  
14 TOU meters presently used by residential customers. Yet, Mr. Normand does not  
15 propose to increase the monthly customer charge for Offering #1 customers to  
16 recover the additional cost of the TOU meter. Rather, he proposes that all  
17 customers pay for the additional TOU meter costs. This treatment is inconsistent  
18 with proper cost allocation and rate design principles which dictate that customers  
19 receiving service benefits pay the related costs. This principle has been a  
20 fundamental cost allocation and rate design principle in every ACE base rate  
21 proceeding in which I have been involved and is the guiding principle in class  
22 cost of service studies previously filed by ACE in base rate proceedings. Mr.  
23 Normand’s proposed cost recovery procedures in this proceeding do not meet this  
24 basic objective, however.  
25

26 I have the same objection for the \$428,000 of Program Regulatory Assets that  
27 ACE projects to accrue in connection with Offering #1. Non-PIV residential

---

<sup>2</sup> Normand Schedule (MTN)-3, page 4.

1 customers do not receive any benefit for the service to be provided under Offering  
2 #1. Therefore, the Program Regulatory Asset costs should not be charged to non-  
3 PIV residential customers.

4  
5 **Q. ARE YOUR OBJECTIONS TO OFFERINGS #2 AND #3 ANY**  
6 **DIFFERENT THAN YOUR OBJECTIONS TO OFFERING #1?**

7 A. No. Offerings #2 and #3 feature off-peak rates for PIV charging and incentives  
8 and rebates for installing in-home residential charging stations, which are not all  
9 included in Offering #1, but the regulatory principle is the same. Non-PIV  
10 residential customers receive no identifiable direct benefit from the PIV services  
11 provided under Offerings #1, #2 and #3. It is only the relatively few PIV  
12 customers that will benefit from any of these three Offerings. Therefore, the large  
13 body of residential non-PIV customers should not be required to pay for the  
14 incentives that ACE is willing to extend to its small subclass of residential PIV  
15 customers. The users that require ACE to incur the costs and who receive the  
16 service benefits should pay for those costs.

17  
18 **Q. EARLIER YOU STATED THAT THE RESIDENTIAL CLASS WOULD**  
19 **BE ALLOCATED 59 PERCENT OF THE CAPITAL AND PROGRAM**  
20 **REGULATORY ASSET COSTS ASSOCIATED WITH OFFERINGS #7,**  
21 **#8, #10, #11, AND #12, UNDER MR. NORMAND'S PROPOSED COST**  
22 **ALLOCATION SCHEME. DO NON-PIV RESIDENTIAL CUSTOMERS**  
23 **RECEIVE ANY DIRECT BENEFITS FROM THE SERVICES TO BE**  
24 **PROVIDED UNDER ANY OF THESE OFFERINGS?**

25 A. No. The services to be provided under all these Offerings are not even remotely  
26 related to residential service. Rather, they target utility-owned and non-utility  
27 owned public charging stations, grants and subsidies to be provided to school  
28 districts, and the New Jersey Transit system for the purchase and support of

1 distribution upgrades and charging equipment for electric buses. As such,  
2 residential customers will not receive any direct benefit from any of these  
3 Offerings. Thus, there is no cost of service justification for allocating any of these  
4 non-residential PIV-related costs to the residential service class.

5  
6 **Q. DO YOU HAVE ANOTHER CONCERN WITH THE PROGRAM  
7 REGULATORY ASSET THAT MR. NORMAND PROPOSES?**

8 A. Yes, I do. For PIV-related capital costs incurred, Mr. Normand proposed to  
9 include those investments in plant in service, with no deferral. However, Mr.  
10 Norman proposes that the associated depreciation expense and O&M expenses on  
11 those plant investments be included in the Program Regulatory Asset account.  
12 Including depreciation expense and O&M expenses in the Program Regulatory  
13 Asset account, however, will result in some double recovery of those two costs.

14  
15 Under Mr. Normand's proposal, the accumulated Program Regulatory Asset,  
16 which will also include a carrying charge, will be amortized through rates over a  
17 five-year period beginning with ACE's next base rate case. But, some or all of  
18 ACE's depreciation and O&M expenses on its PIV capital costs will have already  
19 been recovered in base rates. Thus, some amount of double recovery of  
20 depreciation and O&M expenses will occur.

21  
22 **Q. PLEASE EXPLAIN.**

23 A. ACE's present base rates include expense allowances for depreciation and O&M  
24 expenses on the assets in service at the time of ACE's last base rate proceeding.  
25 Those two expenses, coupled with test year sales volumes also from ACE's last  
26 base rate proceeding, result in a unit charge rate allowance for depreciation and  
27 O&M expenses. Under Mr. Normand's proposed rate design for Offerings #1, #2,  
28 and #3, residential PIV customers will continue to pay ACE's current distribution

1 charges, including the unit charge amounts for depreciation and O&M expenses,  
2 on all sales volumes, *including the incremental PIV-related kWh sales*. It is the  
3 unit charge amounts for depreciation and O&M expenses included in base rates as  
4 applied to the incremental PIV-related kWh sales that provides some amount of  
5 cost recovery for the incremental depreciation and O&M expenses on incremental  
6 PIV-related capital facilities. Moreover, ACE will continue to collect the rate of  
7 return and depreciation expense allowances that are embedded in the Company's  
8 current base rates relating to the non-TOU meters that are retired for residential  
9 customers choosing Offering #1. Therefore, if the entire balance of the  
10 depreciation and O&M expenses on PIV assets are deferred and recovered  
11 through the Program Regulatory Asset amortization as Mr. Normand proposes,  
12 some level of double recovery of those costs surely will follow. The precise  
13 amount of the double recovery will of course depend on the level of incremental  
14 PIV-related kWh sales, which cannot be determined with certainty at this time.  
15 Nevertheless, a double recovery is certain to occur.

16  
17 **Q. GIVEN YOUR CONCERNS, WHAT IS YOUR CONCLUSION AND**  
18 **RECOMMENDATION TO THE BOARD IN THIS PROCEEDING?**

19 A. My primary conclusion is that ACE's proposed PIV Program fails the  
20 fundamental and long-standing cost allocation and ratemaking principle that  
21 customers receiving service benefits from the utility should pay the associated  
22 costs incurred to provide that service. In this proceeding, however, ACE has  
23 intentionally designed a cost recovery scheme that results in the general body of  
24 non-PIV customers subsidizing the cost of PIV service for a relatively few PIV  
25 customers. This subsidization is unreasonable and discriminatory, especially for  
26 those residential customers who do not own any vehicle, let alone an electric  
27 vehicle, and must rely on public transportation.

1 The decision to purchase an electric vehicle is a matter of economics. As with  
2 any purchase, the expected benefits must outweigh the costs, including  
3 consideration of alternative costs. For example, the purchase of an electric  
4 vehicle will reduce the number of trips to a gasoline filling station. But that  
5 saving must be netted against the cost of PIV charging. A false economic savings  
6 will result if the prospective buyer relies on subsidized costs of PIV charging, as  
7 will occur under ACE's PIV Program initiatives. The false economic savings  
8 occur because ACE's general body of non-PIV customers have been forced to  
9 subsidize the PIV Program, conferring a non-cost-based benefit on a select few  
10 customers that are able to purchase an electric vehicle. This subsidy is contrary to  
11 long-standing ratemaking principles and should be rejected by the Board.

12  
13 Lastly, I echo Dr. Hausman's recommendation that if the Board approves a PIV  
14 program in some form that ACE be directed to establish PIV-specific rate  
15 schedules for the Residential and for the Commercial and Industrial classes so that  
16 costs incurred to provide PIV services to each class can be accounted for and  
17 appropriately charged to customers that receive PIV service.<sup>3</sup>

18  
19 **Q. DOES THIS COMPLETE YOUR TESTIMONY AT THIS TIME?**

20 A. Yes, it does, however, I wish to reserve the right to supplement this testimony if  
21 new information is received.

22  
23  
24

---

Mr. Peterson is employed as a public utility rate consultant by Chesapeake Regulatory Consultants, Inc. Mr. Peterson has over forty-two years of experience analyzing regulated public utility ratemaking and service matters including three years as a member of a state regulatory commission staff and thirty-nine years as a consultant. Mr. Peterson specializes in utility revenue requirement and cost of service analyses. He has presented testimony in more than 170 proceedings before twenty state regulatory commissions, the Delaware House Energy Subcommittee, and the Federal Energy Regulatory Commission. Utilities addressed in Mr. Peterson's analyses and testimonies have included electric, natural gas, propane, telephone, water, steam and sewer companies.

**EMPLOYMENT**

1991 - Present	Senior Consultant Chesapeake Regulatory Consultants, Inc. Annapolis, Maryland
1980 - 1991	Consultant Hess & Lim, Inc. Greenbelt, Maryland
1977 - 1980	Rate Analyst South Dakota Public Utilities Commission Pierre, South Dakota
1977	Research Assistant Economics Department South Dakota State University Brookings, South Dakota

As a rate analyst and consultant, Mr. Peterson has served a diverse group of public utility consumers and governmental agencies on utility ratemaking and service-related issues. Clients have included state regulatory commissions and their staffs, consumer advocate agencies of state governments, federal agencies, municipalities, privately owned, municipally owned and cooperatively owned utilities, civic organizations, and industrial consumers.

## **EDUCATION**

December 1983                      Master of Business Administration  
University of South Dakota  
Vermillion, South Dakota

May 1977                              Bachelor of Science Degree in Economics  
South Dakota State University  
Brookings, South Dakota

## **EXPERT TESTIMONY**

Among the issues that Mr. Peterson has addressed in testimony are the appropriate test year, construction work in progress, cash working capital lead/lag studies, rate base, excess capacity, revenues, expenses, depreciation, income taxes, capital structure, rate of return, cost allocation, rate design, customer service charges, flexible rates, life-cycle analyses, cost tracking procedures, affiliate transactions, mergers, acquisitions and the consequences of industry restructuring. Mr. Peterson has presented testimony to the following regulatory bodies.

Alabama Public Service Commission  
Arkansas Public Service Commission  
California Public Utilities Commission  
Colorado Public Utilities Commission  
Connecticut Public Utilities Control Authority

Delaware Public Service Commission  
Indiana Public Service Commission  
Kansas State Corporation Commission  
Maine Public Utilities Commission  
Maryland Public Service Commission

Montana Public Service Commission  
Nevada Public Service Commission  
New Jersey Board of Public Utilities  
New Mexico Public Service Commission  
New York Dept. of Environmental Protection

New York Public Service Commission  
Pennsylvania Public Utility Commission  
South Dakota Public Utilities Commission  
West Virginia Public Service Commission  
Wyoming Public Service Commission

Delaware House of Representatives (Energy Subcommittee)  
Federal Energy Regulatory Commission

In addition, Mr. Peterson has presented several utility training seminars, including the following:

Consolidated Tax Savings and Income Tax Normalization  
Presented to Delaware Public Service Commission 2006

Public Utility Ratemaking Principles  
Presented to Washington Utilities and Transportation Commission 2011

Electric Cost Allocation and Rate Design  
Presented to Colorado Office of Consumer Counsel 2012

Public Utility Revenue Requirements  
Presented to Delaware Public Service Commission 2012

Electric Cost Allocation and Rate Design  
Presented to Delaware Public Service Commission 2013
