Content Note

This series consists of a near-complete set of the annual reports of New Jersey's county superintendents of schools to the state Commissioner of Education (head of the Department of Public Instruction which, in 1946, became the Department of Education). The standardized report form was required to be submitted by each county during the period 1917 to 1947, though apparently not by statute. Filing ceased with the reorganization of the Department of Education following the 1947 Constitution. Each report covers one academic year from September to June; reports for the years 1918/1919 and 1925/1926 are missing.

Superintendents' annual reports provide detailed financial and statistical information for each county school district, including: revenue raised through taxes, special funds and tuition; expenditures (broken into a variety of categories, such as salaries and capital outlay); personnel information (including the number of teachers and their qualifications, the number of supervisors, principals, etc.); and the number of pupils enrolled (broken down by type of school, grade, age, and sex). The report content generally remains consistent throughout the thirty-year series, although certain sub-categories and details vary from year to year.
