Data Sources:
Wetland: NJDEP, Jan. 2007
Other Data: Monmouth County GIS

Any wetland boundaries shown on these maps are approximate and are for guidance only. Therefore, these maps are not an accurate indication of whether DEP will classify an area as exceptional resource value wetland under the DEP's freshwater wetland rules. To obtain a determination of whether or where wetlands are located on a property and the resource value classification of a wetland, contact the DEP and apply for a letter of interpretation under the freshwater wetlands rules, N.J.A.C. 7:7A-3.
