Gentlemen:

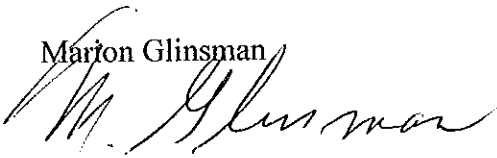

I am going to be as short and succinct as possible Frustration does not cover what I am feeling toward my Association Leisure Knoll of Manchester and Manchester Township. For over a year I have been complaining about water being dumped behind my house into the Ridgeway Branch of the Toms River causing the area to be swamp like .

Ultimately I found out that a builder is looking for a variance to designate a PA-5 an environmentally sensitive area to a PA2. This area is fast becoming a swamp because of dumping of ground water. Exactly who gave these developers permission to dump this water for over a year now into the Ridgeway Branch is unknown to me but obviously no one bothered to find out the impact this would have on the river, the surrounding homes and the wildlife. However, Mosquitoes will undoubtedly be one of the many negative side effects of this.

I would like answers from all organizations as to what they are doing to prevent this over abundance of homes in this area. Route 70 is a constant hazardous driving highway with way too many accidents and to add additional homes would only add to the problem. Has a traffic study been done on this area?

Answers please.

Marion Glinsman
