We, the undersigned petition the State of new Jersey to **REJECT** Lakewood Township's applications to designate Lakewood as either a "Regional Center" or a "Planning Area 1". We oppose such change due to the following concerns (among others):

1. Greater population density and increased use of impervious cover may have a negative impact on the public water supply.
2. Greater population density will exacerbate an already difficult traffic problem.
3. Taxes may have to be increased to pay for additional public services for the increased population.

Thank you for your consideration of our concerns.
