NJDEP Mapped Freshwater Wetlands by Community Type and Locations of Potential NJDEP Defined Vernal Pools

This map is a graphical representation of wetlands as of 1997. As such, this map is to be referenced as a guide only and not to be used in lieu of a formal wetlands delineation.

Wetland information extrapolated from NJDEP GIS data for Somerset County, NJ (based from the 1986 Freshwater Wetlands Quarter Quadrangles). Not all wetland communities are represented. NJDEP Wetlands Cross Acceptance Data has been extracted from the NJDEP 1995 / 97 Land Use, Land Cover layer. All areas with a Type 95 code of "wetlands" in that layer were extracted. This included both natural and modified wetlands as mapped in the LU/LC data. Specific information regarding this data can be found at www.state.nj.us/dep/gis/crossaccept.htm.

Potential vernal pool data developed from the Grant F. Walton Center for Remote Sensing and Spatial Analysis and the NJDEP Division of Fish and Wildlife Interactive Vernal Pool Mapping Application.

Potential Vernal Pool and wetlands community size and location information may have changed since the publication of this inventory and should be verified through the NJDEP.
