The State Plan

NJ State Planning Act (NJSA 52:18A-196 et seq)

- NJSA 52:18A-200: "The State Development and Redevelopment Plan shall be designed to represent a balance of development and conservation objectives best suited to meet the needs of the State..."
 - Protect the natural resources and qualities of the State...
 - Promote development and redevelopment in a manner consistent with sound planning...
 - Consider input from State, regional, county, and municipal entities...
 - Identify areas for growth, limited growth, agriculture, open space conservation...
 - And more...

What the State Plan is NOT....

The State Plan is not designed to overrule, negate, or interfere with existing plans or regulations in communities, but it is intended to provide guidance and foster collaboration among stakeholders.

State agencies implement the State Plan through their functional plans, investment priorities, and administrative rules, while local governments implement it through their own planning objectives.

State Plan Policy Map

While the State Planning Act does not address the State Plan Policy Map (SPPM or the Map), the Rules require a map.

- A geographic application of the goals, strategies, and policies of the Plan
- Important in interpreting smart growth areas and areas that need protection
- Historically, the implementation and development of the Map have had challenges.
- No map changes were initiated by the State. Counties and municipalities proposed map changes that will be considered after the adoption of the Final State Development and Redevelopment Plan.
