

**The New Jersey Department of Transportation (NJDOT) will utilize the New Jersey Department of Transportation Certification System for Disadvantaged Business Enterprise (DBE) Certification Management.**

**Please update your bookmark**

Starting on March 15, 2019, the New Jersey Department of Transportation Certification System can be found at <https://njdot.dbesystem.com/>

The New Jersey Department of Transportation (NJDOT), a certifying partner of the New Jersey Unified Certification Program (NJUCP), is pleased to announce that it is improving service for its DBE user community. Improvements will include a common platform for Disadvantaged Business Enterprise (DBE) on-line application and certification management. This system will streamline the application and certification management process. Certification management will include: Applying for DBE certification, processing DBE annual renewal documents, submitting no change affidavits, reporting any/all changes to your business structure or location and requesting additional NAICS codes.

The New Jersey Department of Transportation Certification System is provided by B2Gnow. The B2Gnow platform is used in many states throughout the country. Many users may already be familiar with its look and search capability. The underlying platform is currently utilized by our NJUCP agency partners New Jersey Transit (NJT) and The Port Authority of New York and New Jersey.

**All certified DBEs will be required to have an account.** If you use the system for another state or agency you can log into your account with the same username and password. If you don't know your username and password or need to **create a new account** use the Account Lookup <https://njdot.dbesystem.com/FrontEnd/usersearchpublic.asp>. Contact Customer Support via any of the system links if you have any questions while attempting to access your account.
