### Intersection improvements at Wall Street

Intersection improvements will consist of 12-foot left-turn slots on all four legs of the intersection and the installation of a new traffic signal standard. The through lanes will be widened to 15 feet, but there will be no shoulders. For safety reasons, concrete islands along the Route 71 left-turn lanes will be constructed. The radii of all four corners of the intersection will be improved. Painted crosswalks and sidewalks will be constructed within the project limits. This project will not provide for bicycle/pedestrian use; however, it is consistent with adjacent areas of this roadway.
