130	Westfield Avenue/Pochack Creek, Drainage			9303	2371

Vicinity of Pochack Creek Culvert, drainage improvements

This project will provide for drainage improvements along Route 130 and Westfield Avenue. Flooding occurs approximately three to five times a year along Pochack Creek, often resulting in the closure of Route 130. Drainage basins will be constructed along Pochack Creek, upstream and downstream of Route 130. The project begins at Walnut Avenue and continues downstream to Route 90. A culvert will be constructed to allow excess stormwater to bypass an industrial park, Route 130, and an adjoining cemetery. The existing creek flows through the Crescent Burial Park and causes extensive flooding; a basin within the cemetery will reduce the flooding in the cemetery. No disturbance of graves is anticipated.
