## New Jersey Department of Transportation Projects

<i>ROUTE/PROGRAM</i>	<i>Project ID No.</i>	<i>TIP No.</i>
Eden Lane Bridge over Whippany River	NS9908	NS9908

The existing structure was built in 1972 as a temporary single-span structure. The bridge consists of simply supported steel acrow panel trusses and is supported on concrete abutments. The bridge has inadequate deck geometry and substandard lane widths. The existing metal bridge deck components are overstressed (under-designed). This bridge is considered structurally deficient and functionally obsolete and hence is in need of replacement. The new structure will provide two 3.65 meter lanes, adequate shoulders on both sides, one sidewalk and will be constructed on an improved alignment.

A six-foot sidewalk will be constructed 150 feet north of the bridge and 350 feet south of the bridge. Some roadway reconstruction of School Road and Lower Hibernia Road is anticipated to meet Green Pond Road. The new bridge will be a 62-foot single-span steel girder section with a composite concrete deck, or a prestressed concrete box beam section.
