| Route 40, Route 77 to Elmer Lake (4) | 9327                  | 9327           |

Route 40 will be reconstructed to provide a new riding surface within the project limits. The shoulders and two feet of the travel lanes will be reconstructed with new pavement. The drainage system will be upgraded by adding new drainage ditches, new pipes and new inlets where required.

In the downtown area of Elmer, new curbing and sidewalk will be provided where required. The intersection of Front Street and Route 40 will be improved by providing a new curve with a better radius and superelevation rate. Also, a new traffic island, striping and signing will be provided at this intersection. The bridge over Elmer Lake will be replaced with a new bridge structure. The new bridge will have 12-foot travel lanes, eight-foot shoulders and six-foot sidewalks in both directions.

This project is funded under the provisions of Section 13 of P.L. 1995, c.108. Total construction cost is anticipated to be \$9,835,000.

The project will provide for the replacement of two structures that are about 275 feet apart. The existing structures contain two 12-foot travel lanes and 3-foot shoulders. The new structures will provide for two 12-foot travel lanes and 8-foot shoulders to be consistent with the adjacent roadway. There is no evidence of pedestrian traffic in this vicinity; however, the shoulder area will provide for bicycle use.

This project will provide for the replacement of the existing structure along the same alignment. The existing structure has one 12-foot travel lane, one three-foot outside shoulder and one six-foot sidewalk in each direction. There will be one 12-foot travel lane and one 10-foot shoulder in each direction. In addition, because of the close proximity of the structure to the Route 55/56 interchange, missing acceleration/deceleration lanes on Route 56 from and to Route 55 will be provided. Guiderail upgrades will be made in the immediate vicinity of the structure and will extend along the Route 55 southbound ramp to Route 56 westbound, as well as the Route 56 eastbound to Route 55 southbound ramp. This project will be designed to be bicycle/pedestrian compatible via use of the shoulder.
