Mercer County currently maintains 130 traffic signals. Many of these locations have signals that display "Walk/Don't Walk". These would be replaced with MUTCD-compliant diagrammatic pedestrian displays with countdown numerals. These indications provide users with better information as to the time available to cross the roadway. In addition, these existing pedestrian push buttons will be replaced with ADA-compliant touch activated buttons providing user feedback.

This is a safety and operational improvement project which has already "broken out" two independent projects:

1-Improvements to the Rt. 1 & 95/295 Interchange have already been constructed.

2-Rt. 1 Southbound at Quaker Bridge Mall Overpass (DB# 01330A1) has been advanced to design. This project will provide improved acceleration lane onto Rt. 1 SB from the Quaker Bridge Mall ramp and an auxiliary lane on Rt. 1.

A third break-out from this "mother project" is expected in the Fall '09. This project will consist of shifting the existing Collector-Distributor (CD) road barrier curb resulting in 3 "express" lanes and 1 "local" CD Lane, plus a 10-foot shoulder from north of the Quaker Bridge Road interchange to the Quaker Bridge Mall overpass. The project will also close 5 driveways, providing alternate access through shared access agreements.

This is a study initiated at the request of the local community to redevelop this stretch of Route 1 Business into a pedestrian friendly urban streetscape that promotes business development. The "Vision" aims at slowing traffic speeds, improving and increasing pedestrian connectivity, and providing aesthetic treatments that would help to create a new identity for this section for Route 1B. The roadway cross section (traveled way) will be reduced to provide 11-foot travel lanes, on-street parking along the northbound side of Route 1B, pedestrian "bulb-outs", cross-walk enhancements and a 16' wide center median which can be planted with suitable low ground cover, flowers, etc. The project will be contained within current "curb to curb" dimensions for the entire length, except at the Whitehead Road intersection where a "modern roundabout" will replace the existing traffic signal.

 COUNTY: Mercer MUNICIPALITY: Lawrence Twp.

During rush hours, especially the AM peak hours, the exit from I-295 northbound to Route 1 is insufficient for the amount of traffic, causing backups in the through lanes of I-295 northbound which creates an operational and safety problem. Reconstruction of the interchange and interstate to expand the capacity of the exit could be costly and adversely impact the environment as well as adjacent properties. An interim improvement is proposed to allow the use of the I-295 northbound shoulder to extend the storage for the deceleration lane. To minimize the loss of the shoulder, it is proposed to use ITS technologies to open the shoulder for deceleration use only when needed and then return it to use as a shoulder when not needed. Technologies would include methods of detection when backups are imminent and providing the information to the traveling public that the shoulder is open for use.
