**New Jersey Department of Transportation Project Descriptions**  
(\$ millions)

**ADA Improvements, Contract 1**

*DBNUM: D1505A / UPC: 203320*

This project will continue the complete reconstruction of existing or construction of new ADA compliant sidewalk, curb ramps, and associated structures at approximately 400 various locations in the City of Camden. Crosswalks will be constructed as required or appropriate to connect opposite ADA compliant ramps at street intersections.

**Almond Road (CR 540)**

*DBNUM: S2522 / UPC: 254100*

The roadway needs to be resurfaced due to the deterioration and cracking of the existing pavement. The proposed improvements will consist of milling and resurfacing of the existing pavement for the placement of Hot Mix Asphalt 12.5M64 Surface Course, 2" thick on top of the existing milled surface. Portions of the roadway will be reconstructed as needed with a depth of six (6) inches below the surface course elevation, and replaced with Hot Mix Asphalt 25M64 Base Course, 6" thick.

**Bridge No. C4.13 over Parkers Creek on Centerton Road**

**DBNUM: D2018 / UPC: 213530**

With the permanent closure of County Bridge 03C4004 over the Rancocas Creek, this County Bridge #C4.13 is a primary connector for individuals travelling between Willingboro & Westampton Townships to Mount Laurel & Moorestown Townships. This section of Centerton Road is also one of the main roads that leads to the entrance and exit of I-295 interchange (43 A&B). County Bridge #C4.13 carries 2 lanes of opposing traffic and approximately 3.5' shoulders on each side of the road. The bridge currently lacks sidewalks and does not have bicycle compatible shoulders. Major improvements are needed for this bridge due to the structure's age (over 100 years), structurally deficient status and scour critical status, and it is functionally obsolete. Whether the bridge will be rehabilitated or replaced, the construction work will address the structural deficiencies, scour problems, non-standard bridge width and bicycle & pedestrian compatibility. The project will also include roadway improvements (guiderail, paving, sidewalk), as well as installation of scour countermeasures.

**Bridgeton Pike (SR 45) and Berkley Road Mantua Boulevard (CR 632) Intersection Improvements**

*DBNUM: D2505 / UPC: 253790*

This project will provide left turn lanes for Berkley Road / Mantua Boulevard, which will allow both side roads to access the intersection at the same time. currently, each side street has its own light cycle. The intersection will be widened out with larger radii to allow for larger vehicles and buses to turn onto Mantua Boulevard easier. New sidewalk, new striping, new signage and a new signal will all improve the safety of this intersection.

**Burlington County Bus Purchase**

*DBNUM: D1510 / UPC: 154060*

In the DVRPC region, a combination of fixed route, subscription, and demand responsive transit services are provided in Burlington County, such as providing for the purchase of buses and capital equipment for BurLink. The BurLink bus system is a deviated fixed route service that is operated by the South Jersey Transportation Authority (SJTA) and provides transportation to county residents, employees and visitors. BurLink bus routes connect with many NJ TRANSIT bus routes and the River LINE.

**Camden County LINK Trail**

**DBNUM: D2403 / UPC: 243340**

This project will construct a 12' wide paved, all ages and abilities shared-use path which will act as the centerpiece of the County's eventual 550 mile bicycle and trail network. The LINK will begin at the recently completed Benjamin Franklin Bridge bicycle/pedestrian ramp in the City of Camden, extend through 16 suburban municipalities, and end in the Winslow Wildlife Management Area at the Gloucester County line. The proposed trail, which is intended for both transportation and recreational use, will provide an economic stimulus to Camden County; will connect dense and diverse populations to numerous communities, businesses, employment opportunities, parks and open spaces; and will bisect the urban, suburban, and rural transect of the county.

**Chadwick Beach Island Bridge (No. 1507-007) over Barnegat Bay**

*DBNUM: N1805*

The purpose of the Chadwick Island Bridge project is to restore the structural, geometric and operational integrity of the bridge in compliance with current design standards and to provide a safe, efficient and reliable crossing for all modes of transportation. The existing structurally deficient all timber bridge was originally constructed in the early 1950's as part of the original development of the island community. In 1985 the bridge superstructure was replaced to prolong its service life. The current issues with the existing timber bridge include, moderate to severe deterioration /section loss of load bearing piles, deterioration of substructure cross bracing, deterioration and misalignment of timber deck boards and hardware and inadequate roadway width for vehicular traffic. This is a bridge replacement project.

**Clay Street Bridge over the Passaic River**

*DBNUM: N1402*

Clay Street Bridge over the Passaic River is a swing span and was built in 1908. The bridge carries two 18'-4" foot wide lanes of traffic and two 9'-2.5" wide pedestrian sidewalks. The bridge is structurally deficient due to the serious condition of the superstructure. The preferred alternative includes widening and replacement of the Clay Street Bridge along the existing alignment. The proposed structure would be a movable bridge on the existing profile and spanning only one of the existing 75-foot wide waterway channels under the bridge.

**CR 508 (Central Avenue), Bridge over City Subway**

**DBNUM: N1605 / UPC: 153300**

Central Avenue bridge over the Newark City Subway was built in 1908 and is structurally deficient, functionally obsolete, fracture critical and has an overall sufficiency rating of 31 despite all the efforts by the county to save the structure. The city plans to replace the substructure in front of the existing abutment while eliminating 2 spans with a cantilever abutment. The replacement of the two southernmost trusses (Spans 2 and 3) in the north section of the bridge with one truss. The pier supporting the two trusses will be removed. The truss will span from the south abutment to the existing concrete pier supporting the northernmost trusses (Span 3 and 4) of the north section of the bridge; that pier will be removed and replaced with a pier that meets current standards.

<b>CR 616 (Mill Street) Bridge over South Branch Rancocas Creek Rehabilitation/Replacement</b>	<b>DBNUM: D2202 / UPC: 223010</b>
--	-----------------------------------

This project will be conducted as part of DVRPC’s Local Concept Development Program in order to improve the existing bridge in its entirety. The bridge is a concrete encased, single span (36 feet) steel stringer bridge with a reinforced concrete deck. It carries CR 616 over the creek with 2 lanes of opposing traffic and 6’ sidewalks on each side of the road. The out to out width of the bridge is 44.4 feet. The bridge was built circa 1918 and is located in the Vincentown Historic District. The bridge is not historically eligible but is considered a contributing element of the historic district, which has a period of significance ending circa 1930 (source: NJDOT Historic Bridge Survey). The bridge is functionally obsolete due to its existing curb to curb width of 29.8 feet and is scour critical. The structure is in fair condition with localized areas of deterioration and section loss in the deck, superstructure and substructure. It was submerged during the July 2004 and April 2007 flood events and sustained damage. The structure has a sufficiency rating of 66.5.

**CR 706 (Cooper Street) Bridge over Almonesson Creek (Bridge 3-K-3)**

**DBNUM: D2017 / UPC: 213510**

This project will replace or rehabilitate Cooper Street (County Route 706) Bridge (Structure # 0803K03) over Almonesson Creek/at Almonesson Lake (Bridge 3-K-3). The reinforced concrete single span arch was built circa 1926 and is in need of repair. The bridge is rated functionally obsolete with prior inspection recommending widening under the NJDOT Federal Bridge Inspection Program. The bridge has a low sufficiency rating of 65.7. East of the bridge offers access to a public park.

**East Anderson Street Bridge (02C0023A) over the Hackensack River**

*DBNUM: N1801*

The East Anderson Street/Cedar Lane Bridge over the Hackensack River was constructed in 1971. The existing structure is a twin six-span, simply supported, prestressed concrete box beam bridge supported on top of steel pipe piles. The bridge is 304 feet long, 74 feet wide and has two 12' travel lanes and a 5' sidewalk in each direction and a 10' wide median supporting utilities. In 2012, due to structural deficiencies, a 15-ton weight limit was instituted and the outer lanes were closed to traffic. The structure is classified as structurally deficient. The project will replace the existing bridge and upgrade the approach roadways to meet current design standards.

**East Main Street (CR 644), Bridge over Rockaway River**

**DBNUM: N2001 / UPC: 203000**

The existing bridge is a three span stone masonry and concrete arch with fill and a concrete sidewalk on rolled steel stringers. The bridge was originally built circa 1840. A steel stringer sidewalk on east side dates to 1890 and is supported on stone abutments and steel caissons. The west side was widened with concrete in 1905, rehabilitation in 1964 and 1993. The structure is classified as structurally deficient due to the condition of the superstructure and substructure. This is a bridge replacement project.

**Erial Rd and College Drive Intersection**

**DBNUM: D2204 / UPC: 223030**

This project consists of improvements to the intersection to reduce the high crash rate at the signalized intersection and allow it to operate in a safe, usable manner for all modes of transportation, including pedestrian and non-motorized modes, by improving traffic flow through the area. The intersection improvements consist of widening the intersection approaches in order to provide additional lanes for turning movements and through traffic. An additional dedicated left turn lane will be provided for both the NW bound and NE bound approaches. Additionally, the intersection will be improved with better striping and pavement markings to properly channelize and guide motorists through the intersection. Further, a multi-use path for pedestrians and bicyclists will be provided along the northern side of the intersection and its approaches to advance Camden County’s multimodal transportation initiatives.

**Garden State Parkway Interchange 83 Improvements**

*DBNUM: N1405*

Garden State Parkway Interchange 83 Improvements will address the missing interchange movement from the GSP southbound at Interchange 83. It proposes construction of an exit ramp that begins south of the Interchange 83 toll plaza and terminates at a signalized "T" intersection at CR571. In order to accommodate the additional traffic and to improve the operations of the intersection of US 9 and CR 571, improvements to the intersection are proposed. CR 571 will be widened east of the intersection to provide two through lanes in each direction and opposing dual left turn lanes. West of the intersection, CR 571 will be restriped to provide the same lane configuration requiring minor roadway widening.

**Gloucester County Multi-Purpose Trail Extension - Glassboro Elk Trail**

*DBNUM: D1203 / UPC: 123510*

The project will extend the multi-purpose trail that runs from Glassboro to Williamstown along the former railroad right-of-way to the Elk Township recreational complex, and Elk Township’s trail (Elephant Swamp Trail) that runs towards Salem County. The project would not only link to the existing trail that ends at Delsea Drive in Glassboro but also look to link to other facilities such as Rowan University and the Rowan Boulevard project. The trail link to Rowan University would end on campus near Girard Avenue in Glassboro at the future site of the light rail train station that would connect to the City of Woodbury and onward to Philadelphia. A portion of the former rail right-of-way on the easterly side of Route 55 is owned largely by Elk Township. Linking to the existing Elk Township Recreational Complex would involve using the existing bridge on Whig Lane Road (CR619) across Route 55, as well as utilizing a portion of the State highway right-of-way of Route 55 (on the other side of the existing fence away from the highway, separated from any traffic). A small trail bridge is planned across a branch of Still Run along the Route 55 ROW. The southerly link to the Elk Township Recreational Park connects to the Elephant Swamp Trail which extends into Salem County. The project would have the ability to link to existing and planned transit facilities such as: NJ Transit 463 Bus Route in Williamstown on an existing portion of the trail which has connections to NJ Transit’s Avondale facility in Camden County (connections to Camden, Philadelphia and Atlantic City); NJ Transit 408 Bus Route in Glassboro at the project beginning of the trail on Route 47 which connects Philadelphia to Millville; the northern terminus of the planned trail at Rowan University in Glassboro would provide a future light rail connection to the City of Woodbury as well as to the Cities of Camden and Philadelphia; and a bike lane link is also planned along a light rail trail spur by the Borough of Glassboro to the Glassboro Arts District along High Street.

**Great Road (CR 601), Bridge over Bedens Brook (D0105)**

*DBNUM: N2008 / UPC: 203070*

Bridge was constructed in 1983 of 2-span weathering steel stringers with open steel grid deck supported on concrete abutments and pier. The bridge was rehabilitated in 2008, work consisted of filling in the open steel grid deck with concrete and deck joint repairs. As per 2017 Inspection report, the superstructure is in poor condition due to several severely deteriorated girders with areas of 100% section loss in the webs at the girder ends. The substructure is in satisfactory condition due to moderate to heavy scaling at the waterline of all substructure units and large spalls with exposed steel reinforcement. This is a bridge replacement project.

**DBNUM: S2526 / UPC: 254140**

The roadway needs to be resurfaced due to the deterioration and cracking of the existing pavement. The proposed improvements will consist of milling and resurfacing of the existing pavement for the placement of Hot Mix Asphalt 12.5M64 Surface Course, 2" thick on top of the existing milled surface. Portions of the roadway will be reconstructed as needed with a depth of six (6) inches below the surface course elevation, and replaced with Hot Mix Asphalt 25M64 Base Course, 6" thick.

**Intersection Improvements to Clayton Road (CR610) and Franklinville Road/Corkery Lane (CR 612) DBNUM: D2504 / UPC: 253780**

The project is required to alleviate crashes, confusing geometrics and routine backups that occur at the CR610/CR612 intersection. The County Route 610 westbound leg (stop control leg) intersects the aligned legs of Franklinville Road and Clayton Road (the through movement legs) at an acute angle and is slightly misaligned with the Corkery Lane leg (stop control leg) of the intersection. The skew of the intersection along with this slight misalignment creates confusion with motorists on the current stop controlled legs on Clayton Road and Corkery Lane.

**Kaighn Avenue (CR 607), Bridge over Cooper River (Roadway and Bridge Improvements)**

**DBNUM: D1709 / UPC: 174000**

The project will make roadway improvements to Kaighn Ave. (CR 607) from Euclid St. to North Park Dr. (CR 628) and include complete bridge replacement of the Kaighn Ave. Bridge. These improvements will decrease travel time, alleviate flooding, reduce annual maintenance costs and provide for a multi-modal connection to The Circuit, Greater Philadelphia's Regional Trail Network.

Kaighn Avenue is a heavily traveled regionally significant corridor that transects the Parkside Neighborhood of Camden City and is prone to tidal flooding and plagued by road closings during regular rainfall and high tide events. Flooding is the result of a 40 year old hurricane event that breached a nearby earthen dam and subsequently allows the Cooper River to inundate a low lying area of Farnham Park which is directly adjacent to a 1/3 mile stretch of Kaighn Avenue. Road closing events due to flooding number between 15 – 18 times annually. In addition, the vertical alignment of Kaighn Avenue, as a result of topography, plays a role in the continued flooding. Over time high tides and regular rain fall have led to total washout, undermining the road structure and severe ice wedging. Non-motorized transportation challenges include the sidewalk and multiuse trail being in severe disrepair or continually washed out. This trail provides access to Farnham Park and The Circuit connecting users to Philadelphia and the regions trail.

**Kapkowski Road - North Avenue East Improvement Project**

**DBNUM: 17339 / UPC: 173390**

This project involves the traffic signal and roadway improvements to five existing antiquated signalized intersections to current MUTCD standards in the City of Elizabeth. The intersections include the following locations: North Avenue East / Dowd Avenue / Division Street; Intersection; Veterans Memorial Drive / Trumbull Street / Third Street Intersection; Division Street / Trumbull Street Intersection, and Underpass Road Lowering; Trumbull Street / Dowd Avenue Intersection; and North Avenue East / Kapkowski Road Intersection. This project is to improve visibility of motorists, reposition traffic and pedestrian signals to more appropriate locations by installing new traffic signal poles and mast arms, installing video detection and CCTV on the mast arms, upgrade pedestrian signals to count down type push button activation, upgrade the signals to Light Emitting Diodes (LED), replace the existing traffic signal controllers and cabinets, install public sidewalk curb ramps with detectable warning surfaces where possible, add mast-arm mounted LED street name signs, replace the existing regulatory signs with signs conforming to the MUTCD Manual, improve drainage, curbing, sidewalks, roadway subbase, repaving, and restripe the crosswalks, stop bars and roadway center lines. The project also includes the lowering of the roadway under the Central Railroad bridge at the Division Street / Trumbull Street intersection to allow for a 14'-6" clearance. The current clearance is 12'-6". The improved clearance will eliminate a bottleneck and allow trucks to safely navigate this important area and avoid detours into residential neighborhoods. The underpass has a history of being struck by trucks.

The following federal appropriations were allocated to this project: DEMO ID# NJ272, DEMO ID# NJ200, DEMO ID# NJ258.

**Kings Highway (CR 608), Route 83 to CR 628**

**DBNUM: S2310 / UPC: 233250**

The existing surface from Route 83 to CR 628 is in need of resurfacing as it is over 25 years old. The road surface is rated as fair to poor on the 2019 PCI pavement assessment. The roadway services numerous container trash trucks in route to the CMCMUA landfill. It also services numerous residences along the road including subdivisions. The roadway connects to existing seasonal campgrounds and a bicycle path that is part of the countywide network. The road is seeing more bicycle and pedestrian use due to the completion of the bike path. It also provides access to two golf courses that form a portion of the tourist economy. The roadway provides a connection to both Sea Isle and Avalon barrier islands to the central part of the county and an eventual link to Route 55.

**Kingsland Avenue, Bridge over Passaic River**

*DBNUM: N1601 / UPC: 153260*

The Kingsland Avenue (Avondale and De Jessa Memorial) Bridge over the Passaic River was constructed in 1905 and rehabilitated in 1986. The existing fracture critical structure is a two-span thru truss with a rim-bearing swing span with two steel pony truss approach spans supported on an ashlar stone substructure with a concrete cap. The bridge is 364 feet long and 30 feet wide between trusses (45'-8" out to out) and has a travel lane and sidewalk in each direction. The structure is classified as structurally deficient and functionally obsolete. The project will replace the existing movable bridge with a fixed bridge and upgrade the approach roadways to improve traffic operations and meet current design standards.

**Lincoln Ave/Chambers Street (CR 626), Bridge over Amtrak & Assunpink Creek**

**DBNUM: D1710 / UPC: 173920**

Project will replace the Lincoln Avenue Bridge over Amtrak Northeast Corridor (NEC) rail line, an inactive rail yard, and Assunpink Creek. Proposed Improvements include the following listed:

1. Complete replacement of the structure to extend the life of the bridge, correct deficiencies, and meet current design requirements;
2. The structure will be replaced with steel multi-girders (structure depth of 51" and maximum girder spacing of 7');
3. The vertical profile and pier locations will be revised to provide the required horizontal and vertical clearance over the railroad tracks;
4. Standard 12-foot wide lanes, 8-foot wide shoulders, which can be used by bicyclists and as a standard bicycle lane, and 6-foot wide sidewalks for pedestrians on structure;
5. Architectural treatments, such as stone facing, veneer or form liners; galvanized and powder coated steel; aesthetic parapet or railing treatments; colored concrete; decorative lighting; etc. are also being considered.

No roadway widening is proposed. Easement agreements will be required for work that is performed outside of the existing right-of-way, such as grading and sidewalk repairs necessary to meet ADA compliance. Lincoln Avenue serves as an important connector across the aforementioned physical barriers and is the first crossing outside of the central business district of Trenton City. The structure, which was built in 1931 and reconstructed in 1965, was rated 'serious', or 3 on a 0 to 9 scale, with 9 being excellent condition and 0 being failed condition/closed facility. Despite its rating of 3, the bridge is still safe for travel. The rating is primarily due to the condition of the superstructure, which suffers from severely rusted steel throughout and large areas of spalled and delaminated concrete on the deck. The County performed short-term fixes on the structure including lighting, deck repairs and an asphalt overlay until the structure could be replaced. The fund type 'OTHER-DVRPC' reflects a commitment by Mercer County of Local County Aid, Local Aid State Infrastructure Bank, and/or Mercer County general funds to the project.

**Magnolia Road, Spring Road to Lincoln Avenue**

*DBNUM: S2529 / UPC: 254170*

Magnolia Road is a major east-west road connector for Vineland. It is one of the main corridors to connecting agricultural activities in the south and east to the regional county network to the north. The existing pavement has surface deterioration that could result in safety problems. The project includes upgrades to pedestrian and drainage facilities in addition to resurfacing of the roadway within the existing right of way.

**Manhattan Avenue Retaining Wall**

*DBNUM: N1603 / UPC: 153280*

The Manhattan Avenue Retaining walls were built between 1912 and 1914. The walls, located at JFK Blvd East, River Rd, Manhattan Ave and Paterson Plank Rd, were constructed to protect Manhattan Avenue and stabilize the Palisades Cliffs and range to a height of 42 feet. In 2007, after a heavy rainstorm a 200 ft. section of the wall collapsed and fell onto Manhattan Avenue closing the entire roadway for a period of 10 days. The LCD study revealed that the retaining walls are in overall poor condition. There are vertical cracks, loose stones, inadequate drainage, clogged weepholes and large hollow sounding areas. The purpose of this project will be to reinforce and modernize the walls to improve safety, stabilize the rock cliffs behind the walls to prevent rock slides and slope failures and improve drainage.

**Market Street/Essex Street/Rochelle Avenue**

**DBNUM: 98546 / UPC: 985460**

The Market Street/Essex Street/Rochelle Avenue/Main Street intersection exhibits inadequate traffic operations due to an insufficient number of lanes. The existing Essex Street Bridge over the Saddle River and beneath Rt 80 is located on the western leg of the intersection. The existing structure was constructed in 1923 and is a two-span, simply supported, concrete encased steel I-beam structure founded on concrete abutments and a pier. The bridge is 91 feet long and 41.7 feet wide with a travel lane in each direction and a sidewalk in the westbound direction. The structure is classified as functionally obsolete and scour critical. The project will improve traffic operations by widening the intersection and replacing the Essex Street Bridge over the Saddle River.

**Martin Luther King Avenue Bridge (No. 1400-118) over the Whippany River**

**DBNUM: N1804**

The Martin Luther King (MLK) Avenue Bridge spans over the Whippany River and is located between Flagler Street (M.P. 0.11) and Coal Avenue (M.P. 0.14) in the Town of Morristown. Originally constructed in 1900, and widened in 1928, the 66 foot long bridge has numerous structural and geometric deficiencies. The 121 years old stone arch bridge is significant because it is a secondary commuter route into and out of downtown Morristown with a high volume of pedestrian and vehicular traffic. The Bridge Re-Evaluation Survey Report (Cycle No. 18, dated 7/11/17) concluded that the MLK Avenue Bridge is classified as Structurally Deficient due to the poor condition of the superstructure. This is a bridge replacement project.

**Mill Road, Garden Road to Wheat Road**

*DBNUM: S2530 / UPC: 254180*

Mill Road is a major north-south road connector for Vineland's industrial area. Mill Road is heavily used by truck traffic along with residents and travelers. The existing pavement has rutting and potholes that could result in safety problems. The project area includes milling and resurfacing of the roadway within the existing right of way.

**Monmouth County Bridge S-31 (AKA Bingham Avenue Bridge) over Navesink River, CR 8A      DBNUM: NS9603 / UPC: 950606**

The proposed project is to replace the structurally deficient and functionally obsolete bridge. Constructed in 1939, repaired and rehabilitated at various times, the bridge is in need of a major improvements. The Bridge Re-Evaluation and Structural Inventory and Appraisal concluded that the overall condition of the bridge is critical due to the condition of the superstructure and substructure. The condition of the superstructure is “serious” due to heavy rust throughout steel members with small corrosion holes in girder webs, section loss to floor beam bottom flanges, and areas of severe section loss to rivet heads at connections and bottom flanges. The substructure was found to be in “poor” condition due to wide cracking and deep spalls with exposed and severely rusted reinforcing steel (100% section loss to many bars) in the concrete columns, towers, and pier caps.

**Monmouth County Bridges W7, W8, W9 over Glimmer Glass and Debbie's Creek**

**DBNUM: NS9306 / UPC: 950607**

This project is comprised of the replacement of three existing deficient bridges, which carry Brielle Road over Glimmer Glass Creek and Green Avenue over Debbie's Creek. Due to its three-component perpendicular configuration, the project site is locally known as "Three Bridges." All three structures, whether movable or fixed, will be replaced in-kind with bridges meeting current design standards and thus improve roadway geometrics.

**New Jersey Regional Signal Retiming Initiative**

*DBNUM: D1601 / UPC: 163170*

This project reduces congestion and improves air quality by optimizing progression on signalized 500 and 600 routes in DVRPC’s New Jersey counties. These improvements are designed to enhance mobility and promote integrated corridor management strategies. Corridors will be selected by representatives of DVRPC member governments, DVRPC, and NJDOT, with reference to the current Regional Transportation Operations Master Plan and other appropriate data. After obtaining supportive MOUs from signal owner-operators along a selected corridor, signal timing plans will be developed and implemented by consultants to DVRPC for peak hour, off-peak, weekend, event, and emergency operations, as appropriate. After implementation, signal system owner-operators will be responsible for maintaining the timing plan and implementing related physical improvements, if recommended

**DBNUM: S2311 / UPC: 233260**

The existing paving surface is beyond its serviceable life span and in need of resurfacing. The project will include 2" mill and pave, installation of new concrete gutters and curbs for enhanced drainage flow and replacement of all ADA public access ramps. Work will also include limited drainage improvements that will tie into a Borough funded island-wide drainage upgrade. The project will complete the resurfacing of CR 619 within the Borough since it will be the follow up project to the FY 2023 resurfacing FHWA project from 99th Street north. The project will provide enhanced pedestrian and bicycle awareness with the addition of high visibility markings. The route is posted at 25mph and as such the improvements will support the use of LSV sharing the lanes with motor vehicles thereby increasing vehicle transport and reducing emissions. The corridor is the main north south roadway servicing the island and its tourist economy forming a connection from North Wildwood to Ocean City. It also serves as an evacuation route for the island.

**Quaker Neck Road (CR 657) Phase II**

*DBNUM: S2112 / UPC: 213230*

The proposed improvements will consist of milling and resurfacing of the existing pavement. Portions of the roadway will be reconstructed as needed. Safety improvements include the placement of new long-life epoxy traffic stripes, raised pavement markers, and the installation of new signage which meet the current FHWA guidelines for retroreflectivity. Any substandard guide rail installation will also be upgraded. Any existing inlet stream-flow grates will be removed and replaced with bicycle-safe grates. Any existing inlet cast iron curb pieces along the entire roadway length will removed and replaced with the current eco-friendly cast iron curb pieces.

**Reconstruction of South East Avenue**

*DBNUM: S2318 / UPC: 233330*

This project involves milling and paving East Avenue within the existing right of way, upgrading drainage facilities, and removing and replacing concrete curbs and gutters. Additionally, the improvements will include replacing ADA ramps at intersections, installing signage, line striping, and pavement markings. The project will also include the installation of a proposed bicycle lane. All other safety improvements behind the curb, such as sidewalk and driveway enhancements, will be completed as part of a separate project funded by HSIP. An overhead flashing beacon will also be installed at the all-way stop controlled intersection at Walnut Road.

**Roosevelt Boulevard (CR 623)**

*DBNUM: S2312 / UPC: 233270*

Rosevelt Boulevard is one of two routes servicing Ocean City that can accommodate legal truck loadings. It is the most travelled connector to the business district and southern portion of the island. It also has direct access to the Garden State Parkway and Route 9. Roosevelt Boulevard is the key corridor for tourist access to Ocean City, the busiest tourist destiny in Cape May county and consistently ranked as one of the premiere resorts in the nation. The corridor also serves as a critical evacuation route. The roadway is in need of reconstruction as the underlying concrete sub base has heaved and the asphalt overlay has buckled. In addition, the roadway needs to be elevated in order to provide resiliency against nuisance flooding and potential sea level rise. The work that is proposed is the removal of the existing sub base concrete and replacement with DGA, and the milling and resurfacing of the roadway with a new 7 1/2" paving section so that the proposed grade can be elevated approximately 12" above the existing elevation. This project is being proposed in concert with another project, the raising of the easterly portion of 34th Street as part of a joint venture between the County and City. The expectation is that the roadway will be elevated approximately 12" to provide for added evacuation serviceability while not adversely impacting business access. The roadway is also of critical importance as it is listed a an NHS route. The roadway is classified as a Rural Principal Collector.

**Route 539 Overpass (joint Kim/Smith)**

*DBNUM: N2406 / UPC: 243100*

This funding to be used to construct an overpass on County Route 539 which goes through the center of Joint Base McGuire-Dix Lakehurst. For the men and women who train on Joint Base MDL, it offers thousands of acres of added training space east of CR 539, with faster and safer routes for military personnel to travel. The CR-539 project will allow the Army to continue and expand its vital national security mission to train Army Reservist and Army National Guard Members during peacetime. Additionally, it will allow shore-bound motorists safer travel by keeping military vehicles and conveys off CR 539 and State Highway Route 70, which are currently their common routes to go from one end of the base to the other. Civilian traffic would ride above on the new overpass on CR 539, while large military tactical vehicles would be able to travel more safely and efficiently below.

**Shunpike Road (CR 620), Oyster Road to Dias Creek Road (CR 612)**

**DBNUM: S2313 / UPC: 233280**

Shunpike Road is an urban minor collector that services subdivisions and residential dwellings. In addition, it provides access to the Middle Township School recreation field and play area. The roadway provides access to several seasonal campgrounds in the area which are critical to the Township's tourist industry. Shunpike road Parallels the county bike path network and provides for easy vehicle access to the bike path at multiple locations along its length. The southern end of Shunpike services the CMCMUA transfer station and a new natural gas servicing station. The roadway has some accident history near the Oyster Road intersection. The project will include milling and paving, drainage improvements to correct existing spread onto the roadway during rain events, widening to provide for a consistent cross section of (2) 11' wide lanes and (2) 7' wide shoulders for enhanced bicycle and pedestrian safety, centerline rumble stripes south of Shell Bay Avenue and ADA improvements. Additional safety measures such as lane text and double warning signage will be included in the project.

**Sixth Avenue (CR 652), Bridge over Passaic River**

**DBNUM: N1606 / UPC: 153310**

The Sixth Avenue Bridge (Structure No. 1600-012), designated County Route 652, crosses over the Passaic River connecting the City of Paterson, Borough of Prospect Park and Borough of Hawthorne. The bridge was originally constructed in 1900, and in 1987 the superstructure was replaced with a temporary steel truss structure. Due to structure deficiencies and substandard features, the bridge is in need of replacement. The project involves replacing the existing bridge with a new 3-span steel multi-girder continuous bridge with reinforced concrete deck slab.

**Townbank Road (CR 648), Clubhouse Drive to Bayshore Road (CR 603)**

**DBNUM: S2314 / UPC: 233290**

Townbank Road (Cr) 648 is a urban collector consisting of (2) 12' wide thru lanes and shoulder areas. The project will consist of 2" milling and paving the road surface, installation of targeted drainage improvements, construction of new curbs, new ADA access ramps and gutter where required by grade. Traffic calming measures will be installed including the installation of RRFBs and lane markings for speed awareness. The Township may entertain allowing the speed to be reduced to 25mph by statute, which will permit the use of LSVs. The final cross section will consist of (2) 11' wide lanes, (2) 5' wide bike lanes and a buffer area adjacent to the lane of 4' in width. Townbank road services residential dwellings and a church and fire station and provides a direct connection for the North Cape May area residents to the Delaware Bay. The project will accommodate bike traffic that currently travels along the corridor to reach the business district of Bayshore road to the east, and the beach of the Delaware Bay to the west. Townbank road provides tourist access to the businesses and the Cape May Beach section of the township primarily consists of second homes. The demographics of population fronting Townbank Road include multi-cultural/ multi-ethnic individuals. Many of the residents are of low to moderate income and as a result the roadway services both vehicular, bicycle, and pedestrian traffic.

**Pedestrian Bridge over Route 440**

**DBNUM: 17356 / UPC: 173560**

The Pedestrian Bridge over Route 440 is a proposed structure to connect pedestrians and bicyclists between the recently developed Peninsula at Bayonne Harbor (PABH) on the east side of Route 440 and the 34th Street Hudson Bergen Light Rail (HBLR) station on the west side of Route 440. The site of the proposed bridge is located in the vicinity of the intersection of Goldsborough Drive and Route 440 in Bayonne, NJ.

The project will include traffic studies, investigations into intersection improvements, Americans with Disabilities Act (ADA) compliance, public involvement, utility relocations, modifications to the existing NJ Transit pedestrian structure, and construction of a new pedestrian bridge over Route 440. The west end of the bridge will connect directly to the existing NJ Transit pedestrian structure and the east end will touch down in the grass area between Route 440 and the CVS parking lot. The structure will be ADA compliant and accessible by either a ramp or elevator system. Proposed sidewalks will connect to existing sidewalks on the south side of Goldsborough Drive and at Port Terminal Boulevard.

The following federal appropriation was allocated to this project: DEMO ID# NJ 272.
