<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
206                      (39) Old York Road/Rising Sun Road	9208

Old York Road and Rising Sun Road, I-295 to Route 68, operational improvements  
This project will provide construction of a new connector road between Rising Sun Road and Route 206 as well as pavement rehabilitation on Old York Road and Rising Sun Road to accommodate heavy traffic between I-295 and Interchange 7 of the New Jersey Turnpike.

This is a multi-year funded project under the provisions of Section 13 of P. L. 1995, c.108.

The federal Transportation Equity Act for the 21st Century (TEA-21) provided funding for this project under Section 1601, High Priority Projects Program. The Act allocated \$4.98 B for this project. FY 2000 and FY2001 RABAs have increased the total authorization amount to \$5,111,145.

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
206                      Arreton Road, drainage improvements	98423

The existing 36-inch culvert at Arreton Road will be replaced with a 54-inch culvert as well as installing a Gabion lining to protect the eroded embankment on both sides of the roadway. A catch basin and connecting pipe to the existing culvert north of Arreton Road will be constructed at the bottom of the driveway to reduce ponding on Route 206. South of Arreton Road, the embankment protection will be composed of Gabion Baskets and River Mattresses, to limit the extent of tree clearing needed. North of Arreton Road, the lining will be composed entirely of Gabion Baskets.

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
206                      Atsion Lake Dam	8906

This dam is classified as high hazard, Class 1 by NJDEP-DSS. This project will provide for proposed rehabilitation of the dam to address the following deficiencies: (1) timber gates and structural members of the spillway need to be replaced with concrete fixed crest spillway and (2) construct embankment protection measures or purchase the downstream properties to downgrade the hazard class to a 100-year storm.

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
206                      Cat Swamp Mountain	9001

The improvements to the first section of this project (MP 99.7 - 100.3) include the design of operational and safety improvements by widening of the roadway, extension of the northbound climbing lane, reconstruction of the horizontal and vertical curvature and removal of rock face to facilitate sight distance. Work in the second section (MP 101.15 - 101.35) is limited to mitigation of a high hazard rockfall area, which include a substantial rock outcrop hazard and a substandard berm in the northbound direction. This project will be designed to be bicycle/pedestrian compatible.

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
206                      East and West Mansfield Road/White Pine Road Intersection Improvements	9212B

It is proposed to address intersection safety and operational improvements which would align East and West Mansfield Roads at a signalized intersection. It is also proposed to provide a left-turn lane from southbound Route 206 to White Pine Road. The Route 206 approaches at both intersections should be widened to provide shoulders for both bicycle and pedestrian compatibility.

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
206                      Jack's Run Drainage Improvements	96002

An inadequate drainage system, sedimentation and backwater cause flooding impacts. The Initially Preferred Alternative (IPA) will replace and upgrade the existing storm drainage system. The section of the ditch between Route 206 and CR 641 will be contained in a drainage easement. This will allow NJDOT to maintain the ditch. Grading will reestablish the umbrella roadway section and adjacent roadway ditches. The IPA would also include repaving of a portion of Route 206 to raise it above the 25-year water surface elevation of Beaver Dam Creek, provide superelevation of a horizontal curve and improve a crest vertical curve. The IPA will mitigate flooding in the 25-year and small storm events.

<b>ROUTE/PROGRAM</b>		<b>Project ID Number</b>
206	Jacksonville/Jobstown Road, intersection improvements	9212A

This intersection safety improvement project was identified as a high priority by the Springfield Township Council and was ranked as No. 78 on the Safety Intersection Project list. Several accidents have occurred at this intersection due to the lack of left-turn lanes on Route 206. Traffic Engineering has agreed to restripe the intersection, eliminating the shoulders to provide left-turn lanes as an interim measure. The proposed project would provide accommodations for left-turn lanes as well as shoulders. This project will incorporate recommendations made in the Route 206 Bicycle/Pedestrian Compatibility Study.

<i>ROUTE/PROGRAM</i>	<i>Project ID Number</i>
206 CR 24/513      Main Street (Route 24), Chester, intersection improvements	94044

This project will improve the Route 206/CR 24/513 intersection by adding a left-turn lane in each direction on Route 206. There are no plans to widen CR 24/513. Unless provided by others, the project will also include the addition of a traffic signal and left-turn lanes in each direction in the vicinity of MP 86.85 (shopping center entrance). Provisions will also be made for an unsignalized southbound left-turn lane into Colby Farm Road in Chester Township at approximately MP 86.55. Route 206 will have 15-foot outside lanes which are bicycle compatible. The intersection of Route 206/CR 24/513 will include improved pedestrian crossings. The project will also include sidewalks along Route 206 (replacement of existing sidewalks as well as supplemental sidewalks).

<b>ROUTE/PROGRAM</b>	<b>Project ID Number</b>
<b>206 CR 537 Monmouth Road/Juliustown Road Intersection Improvements</b>	<b>9212C</b>

This proposed safety and operational improvement project would provide a west and eastbound left-turn lane at Monmouth Road, widening to provide for shoulders, as well as improving the geometry and signal timing. A traffic signal is recommended at the Juliustown Road intersection, but due to the close proximity with Monmouth Road, the signals will need to be coordinated. In addition, the existing four-lane section should be extended through both intersections to provide more of a safe distance to tie back into the two-lane section. This project will incorporate recommendations made in the Route 206 Bicycle/Pedestrian Compatibility Study.
