<b>Route 40, Atlantic County, Drainage</b>		

NJDOT Operations reports multiple closures due to flooding in this area. The current stormwater pipes are inadequate to drain the stormwater causing flooding in the roadway. The project consists of raising the road to elevation 4.50 ft as a minimum at the shoulders, the total length of the roadway to be impacted is 4400 LF. New sidewalks and curb will be required along the proposed work. New inlets would be added and connected to the existing pipes at the low points with reconstruction of existing inlets. This alternative will mitigate up to 85% of the existing problem occurring in the last 4 years.
