

This Work Item Guide is a guide only. It is not a comprehensive or complete list of work items found on NJDOT contracts. Work Items are used to describe construction materials and work activities on NJDOT construction projects. The work items individually do not represent the broad scope of any project. As such, the NAICS codes associated with the work items in this guide are only a general guidance and are not conclusive or binding. The Guide associates NJDOT Work Items with NAICS as though the contractor were performing an "Execution of the work" or a "Furnish and Install" function. NJDOT Certifying Officers and Contract Administrators should look at the demonstrated capabilities of the firms, the projects on a contract-by-contract basis, and at the project as a whole to determine the DBE firm's capabilities and NAICS code(s) for the specific work item(s).

NAICS codes are assigned based on documentary evidence and on-site verifications. DBE firms must be certified with the appropriate NAICS code prior to bid opening to qualify as a responsible/responsive bid. Prime contractors must conduct their own due dilligence to verify if a firm performs a CUF before they commit to use the firm. NAICS code certifications are not a substitue for Commercially Useful Function (CUF). Certification and CUF are separate and distinct issues. To receive credit on a Federally Funded Contract, a DBE must perform a CUF.

A full scope understanding of the project is necessary when reviewing DBE firms for subcontracting opportunities. All work functions within work items are not necessarily represented in the work item description. For example a Saw Cutting contractor may be used on a Concrete Pavement Repair work item even though that work function is not expressly written in the work item. It is important to check the NJDOT Standard Specifications Manual for descriptions of work associated with the work item. **Prime Contractors and proposed participating DBE Subcontractors should clearly express the description of work to be performed by each DBE subcontractor in their DBE Participation Plan. "Copy and pasting" from this work item guide does not satisfy the required "description of the work" provision of 49 CFR Part 26.53(b).**

Authority

As a Certifying Agency, NJDOT is authorized to assign NAICS codes to qualifying DBE firms under 49 CFR 26.73.

26.73 NAICS Codes

(a) A certifier must grant certification to a firm only for specific types of work that the SEDO controls. To become certified in an additional type of work, the firm must demonstrate to the certifier only that its SEDO controls the firm with respect to that type of work. The certifier must not require that the firm be recertified or submit a new application for certification but must verify the SEDO's control of the firm in the additional type of work.

A correct NAICS code is the one that describes, as specifically as possible, the principal goods or services which the firm would provide to DOT recipients. Multiple NAICS codes may be assigned where appropriate. Program participants must rely on, and not depart from, the plain meaning of NAICS code descriptions in determining the scope of a firm's certification.

If there is not a NAICS code that fully, clearly, or sufficiently narrowly describes the type(s) of work for which the firm seeks certification, the certifier must supplement or limit the assigned NAICS code(s) with a clear, specific, and concise narrative description of the type of work in which the firm is certified. A vague, general, or confusing description is insufficient.

Firms and certifiers must check carefully to make sure that the NAICS codes cited in a certification are kept up-to-date and accurately reflect work which the UCP has determined the firm's owners can control. The firm bears the burden of providing detailed company information the certifying agency needs to make an appropriate NAICS code designation.

A certifier may change a certification classification or description if there is a factual basis in the record, in which case it must notify the firm 30 days before making the change. Certifiers may not apply such changes retroactively.

In addition to applying the appropriate NAICS code, the certifier may apply a descriptor from a classification scheme of equivalent detail and specificity. Such a descriptor (e.g., a “work code”) does not supersede or limit the types of work for which a DBE is eligible under an appropriate NAICS code.
