Route 4 left lane closed in both directions for emergency bridge deck repairs in Englewood **Expect heavy congestion or plan alternate route**

(Trenton) – New Jersey Department of Transportation (NJDOT) officials today announced the left lane on Route 4 in both directions is closed just east of Route 93/Grand Ave in Englewood for emergency repairs to the bridge over Broad Avenue in Englewood, Bergen County.

Beginning at approximately 9 a.m. today, the left lanes on Route 4 in both directions were closed for emergency repairs to the Bridge over Broad Avenue in Englewood. At least one lane in each direction on Route 4 will remain open during construction. Broad Avenue remains open.

This closure will allow NJDOT's Contractor, I.E.W. Construction Group, to remove loose concrete under the bridge and reconstruct a portion of the deck. In order to make the repair, the center median on Route 4 will be removed. Once the deck is repaired, the median will be replaced. The lane closures are expected to continue through Saturday afternoon.

Motorists using Route 4 to get to or come from the George Washington Bridge should expect heavy congestion and may want to consider using I-80 as an alternate route.

The precise timing of the work is subject to change due to weather or other factors. Motorists are encouraged to check NJDOT's traffic information website www.511nj.org for construction updates and real-time travel information.
