### GRAND TOTALS:

- Total: $14,637,551
- FY 2008: $3,281,897
- FY 2009: $3,157,992
- FY 2010: $2,249,989
- FY 2011 - 2014: $5,947,673
- Commission Recommendation: $1,164,407
Overview
The mission of the Department of Agriculture is to promote and provide high quality, nutritious, abundant, safe and affordable food, and other agricultural products. The Department promotes the economic viability of the agriculture industry, fosters opportunities for farm profitability, preserves and protects agricultural and natural resources, and provides leadership and specific services to New Jersey agricultural community and consumers.

The Department’s major responsibilities include:
- Preservation of farmland;
- Protection and conservation of natural and agricultural resources;
- Protection for farmers and consumers by ensuring safe, high quality agricultural products and services;
- Support for and expansion of profitable and innovative agricultural development;
- Provision of fresh and nutritious food for children, the needy and other New Jersey citizens;
- Promotion of agricultural education, awareness and involvement; and
- Delivery of quality services by a well-trained and motivated workforce to the agricultural community and the food industry.

Farmland Preservation
Farmland covers over 820,000 acres or about 20% of New Jersey’s land area. Virtually all of the farms are family-owned with an average size of 82 acres.

Retaining productive, taxpaying farmland is important to all New Jersey residents, and agriculture is an essential component in preserving open space. Open space is preserved through the Farmland Preservation Program, which purchases farmlands and development easements. Funding is provided through the Garden State Preservation Trust Fund. Since its inception in 1983, the Farmland Preservation Program preserved over 1,457 farms, totaling approximately 150,559 acres.

Conservation of Natural and Agricultural Resources
To improve the quality of New Jersey’s waterways and ground water, the Conservation Cost Share Program provides financial and technical assistance to farmers who implement conservation practices that control non-point source pollution. This funding, combined with the federal Environmental Quality Incentive Program, maximizes assistance to farmers and promotes a cleaner environment.

Food Distribution
The Department coordinates several programs that annually provide over 41 million pounds of food from United States Department of Agriculture to schools, State, county, and municipal institutions and to charitable and welfare organizations. These tasks are performed through the Child Nutrition and the Commodity Distribution program.

Developing New Economic Opportunities
The Department is a major advocate for developing and strengthening New Jersey’s agricultural industry. The major sectors of the State's agricultural industry include produce, horticulture, aquaculture, dairy, field crops, livestock, horse breeding, poultry, wine, and organic produce. The Department supports organic production to increase the diversity and value of field crops, helps to identify and promote community farm markets, and assists growers in identifying and sponsoring local and regional fresh market processors.

The Department also encourages new agricultural markets. For example, by supporting the construction of an ethanol plant in South Jersey there will be an increased need for locally grown grain. To expand existing markets, such as the demand for milk, the Department encourages the marketing of flavored milk thereby promoting the nutritional benefits of drinking more milk at a younger age. In addition, by establishing Jersey Fresh brands and Jersey Fresh Organic labels, the Department promotes a common trademark for New Jersey’s agricultural products.

Operating Impact: Increase: $0 Decrease: $0

New chromatographic equipment is needed to replace existing liquid and gas chromatographic equipment in the Department’s Plant Industry laboratory. Current Liquid Chromatograph (LC) and Gas Chromatograph (GC) equipment is obsolete and can no longer be repaired or serviced. The Department of Health and Senior Services and the State Police originally provided this equipment when they upgraded their equipment. The liquid and gas chromatographs are versatile pieces of equipment, used by both plant industry and animal disease laboratories to identify chemicals such as proteins, mycotoxins, alkaloids, fatty acids, and hydrocarbons. These chemical agents can be found in pasture grasses and animal feeds, and can cause sickness and/or death in New Jersey livestock. Mycotoxins currently investigated and analyzed could very well appear in milk of dairy cows that are affected. Mycotoxins are included in the federal list of bioterrorism agents. Very importantly, new LC and GC equipment will provide for prompt and accurate analysis to identify bacteria that are pathogenic to humans, as well as to protect the health and safety of our state’s livestock industry and economic viability of the farmer.

Some of the toxic compounds that can cause animal and plant disease problems also impact human health and the addition of the new equipment to the laboratory will provide additional resources that can be utilized by the State in the event of a bioterrorism event. The close proximity of the Agriculture and the Health and Human Services laboratories and the close working relationships of the scientists in those departments are such that cross utilization of equipment and personnel could and should occur in a bioterrorism situation.

This is the fifth year the department is submitting this request. The request was approved for funding in FY 07, but was reversed by the Governor’s Office during the fiscal hours of the budget. This request replaces old and obsolete equipment that is critical towards detecting bioterrorism and ensuring the safety of our food supply.

### DIVISION OF PLANT INDUSTRY

**EXTENSION OF ACCESSORY BUILDING**

LOCATION: WEST TRENTON, NJ

### Dept Priority 2

- **Project ID:** 10-019
- **Project Type Code:** E02
- **Project Type Description:** Construction-New

### General:

- Requested: $200
- FB-08: $200
- FY-09: $0
- FY-10: $0
- FY 2011-2014: $0

### Sub-Total:

- Requested: $200
- FB-08: $200
- FY-09: $0
- FY-10: $0
- FY 2011-2014: $0

### Operating Impact:

- **Increase:** $0
- **Decrease:** $0

The accessory building located on the grounds of the New Jersey Department of Agriculture’s Phillip Alampi Beneficial Insect Rearing Laboratory, is required for the storage of greenhouse and laboratory supplies, a number of agricultural field implements, two tractors, two power wagons, and three trailers for transport of the tractors and field equipment and field supplies. Due to lack of space, the supplies, farm and field equipment are stored in very close proximity of each other, making it difficult to maneuver within the building, without danger of injury. Much of the equipment has sharp edges.

The building is also used to hold plant material required for insect rearing in one of the Bureau's major biological control programs. During peak production, it is necessary for technicians to maneuver around the stored materials and equipment while working with the plant material, exposing them to possible injury. In addition, due to a lack of space in the accessory building, supplies must be stored within the laboratory in areas that would otherwise be used for the rearing of beneficial insects. This is an inefficient means of utilizing laboratory space. That space would be better utilized toward revenue production.

This project was previously approved for $153,000, project No A0847-00... but due to state fiscal problems, funds were frozen and eventually withdrawn. Previous to the loss of funds, much of the design work had been completed. All that remains is to appropriate the funds and bid the project.

To accommodate the additional supplies currently being stored in the laboratory, all the field equipment, and to allow for the safe, unobstructed movement within the building, it important to extend the building by a total of 1650 square feet. The addition will include a storage platform, two walk-thru doors, and two overhead doors for access to the extension. These access doors in conjunction with those two already present in original section of the building will permit the safest, most efficient and convenient movement of supplies and equipment in and out of the building, and will allow for additional space needed for the safe handling of the plant material stored in the building. The storage platform will greatly increase storage space within the building and will be used to hold bulk supplies, thereby freeing more ground level space for the farm equipment and heavy supplies.

The additional laboratory space will enable the lab staff to increase beneficial insect production that will be used to increase the number of insects released into the field for pest control, decreasing crop damage, increasing weed control, and decreasing pesticide applications. The additional space will allow us to increase the number of insects being evaluated for their rearing potential, vigor and activity to better determine, in a timely manner, our ability to incorporate the species in a mass rearing program. The increase in production will lead to an increase in revenue generated through the sale of insects to researchers and land managers.

In order to reduce the amount of time required to detect Avian Influenza viruses, currently up to three weeks utilizing a lab service, the NJDA requests funding to retrofit existing laboratory space in the Health and Agriculture facility.

The proposal will allow the NJDA the ability to confirm the presence of live virus in a sample without shipping the samples elsewhere. This proposal includes equipment as identified below.

Currently, the NJDA sends samples to the National Veterinary Services Laboratory in Iowa for virus isolation. Confirmations take weeks to obtain. This delay in reporting causes problems with rapid confirmation of positive premises that require quarantines and subsequent release of the quarantine. Additionally, the current testing protocol involves shipping specimens, which could result in false negative results.

- **Hood 6 foot Laminar Flow w/stands (1 for clean work, 1 for dirty work)** - Cost = $22,000. Required working space is 84 square feet.
- **Refrigerator (for reagents and incoming samples)** - cost = $1,400. Required working space is 14 square feet.
- **-80 C freezer chest type, 115V (for sample storage)** - Cost = $10,000. Required working space is 16 square feet.
- **Incubator (3)** - Cost = $18,000. Required working space is 47 square feet.

The equipment will be located in the current Health and Agriculture Laboratory Building. The equipment will be moved to the Agriculture labs in 2010.

Overview
Committed to turning around New Jersey's child welfare system with an aggressive and focused plan, Governor Corzine prioritized the creation of the State's first Cabinet agency devoted to serving and safeguarding the most vulnerable children and families in the State. In July 2006, Governor Corzine signed legislation, which received overwhelming support in the legislature, to establish the New Jersey Department of Children and Families (DCF). The Department is staffed by over 7,000 employees and provides services to more than 150,000 children every year. Within DCF, staff in the Division of Youth and Family Services' (DYFS) respond to more than 60,000 referrals annually, supervising at any given time approximately 54,000 children, including just over 11,000 children in out-of-home placement. The Department also includes the Division of Child Behavioral Health Services (DCBHS), which supports a statewide children's behavioral health system, including round-the-clock mobile response for families in crisis, care management for children with behavioral health needs and a broad continuum of residential services and in-home community supports for vulnerable children. Through the Division of Prevention and Community Partnerships (DPCP), the Department supports numerous programs focused on primary child abuse prevention for children from birth to three years old, scores of family support centers in schools and community-based organizations, and a growing home visitation program for at-risk families.

DCF has focused initially on achieving results in several fundamental, priority areas: (1) reducing child welfare caseloads; (2) improving our children's behavioral health system by expanding access to in-state treatment options; (3) growing relevant emergency, assessment and family support services; (4) recruiting and licensing foster and adoptive families; (5) improving permanency practice; and (6) enhancing training initiatives for child welfare workers and system partners throughout the State. DCF has used a data-driven approach to manage the reform process and incorporated the best thinking of New Jersey's child welfare stakeholders, child welfare workers and supervisors to identify and chart office-by-office and program-by-program the strengths and weaknesses in the State's child welfare work.

SACWIS, the Statewide Child Welfare Information System, is the Department of Children and Families (formerly administered by the Department of Human Services) response to a federal initiative by the Administration of Children and Families to improve the administration of the Title IV-B (child welfare) and Title IV-E (foster care) programs. This is the final year that Capital funds will be requested for this project. Combined state/federal funding has already been used to purchase desktop computers and enterprise-level infrastructure servers required for the project. The later acquisition is especially important, since it is anticipated that the Department will be able to move and consolidate all Child Protective Service/Child Welfare Service computer applications from the obsolescent legacy Honeywell-Bull mainframe to a modern, maintainable, efficient and less costly enterprise infrastructure.

Previously requested capital funds, matched by Federal funds have also been used to transfer and modify the software from an existing SACWIS system to complete the project. The system has been renamed the New Jersey Statewide Protective Investigation, Reporting and Information Tool (NJ SPIRIT). This computer application will improve: case management and supervision of staff; identification, allocation and utilization of resources, budgeting, contracting and fiscal controls, quality assurance and program planning; interface with systems in other divisions; and claiming of Federal funds.

To date, two of the planned four releases have been deployed. This includes Release 1.4, the screening and intake module used by the State Central Registry (SCR) to centrally collect and record reports of child abuse and neglect as well as requests for child services and other requests for information. Release 2 - Phase 1 (R2P1) standardizes and automates all child welfare related litigation correspondence, permitting the preparation and review of court documents by case workers, deputy attorney generals and judges electronically, was deployed on schedule. (June 2006) Tracking of foster home recruitment events is also provided with R2P2.

Release 2- Phase 2 (R2P2) will implement the core of the software functionality, including case management, fiscal, contracting and eligibility programs. The deployment of R2P2 in March 2007 permits the migration from the legacy systems. Funding requested for FY 2008 permits the completion of the project in February 2008 through implementation of Release 3. This release completes all federally approved requirements, finalizes required interfaces with other DCF systems, and permits the purchase of additional enterprise-level hardware and software to operate the NJ SPIRIT application's consistent user demand and planned response times.

Following the development of the SACWIS system, it will be necessary to request funding for ongoing operational costs beginning in FY 2008 via the regular budget process. Please note that Federal matching funds for the operation of the SACWIS system will also be available.

In order to preserve the infrastructure of community-based substitute care placements for children and victims of domestic violence, DYFS has made capital bond grants available to private non-profit and public agencies to complete essential maintenance, program enhancement, preservation and life safety projects. Since the Division has committed nearly all of its available capital bond balances, other capital funds will be required to continue this effort. Currently the Division has a total of $29,148.70 in funds which are neither obligated nor spent. The Division’s network of substitute care providers will eventually be forced to either borrow funds or defer improvements and repairs. The consequence of these options could include the deterioration of general living conditions for the residents, higher service rates and a delay in program development or needed program expansion. The second important consequence of not funding this initiative will be the Division’s inability to meet goals of the reform plan which include increasing bed space in alternative type programming such as transitional living as facilities will not have the financial support to build or renovate to meet the needs of those clients.

Operating Impact: Increase: $0  Decrease: $0

Construct a multi-purpose gymnasium to enhance the recreational programs and to provide large areas for individual, group and family activities at the Woodbridge Child Diagnostic Center. Current use of community recreation sites is insufficient to meet the extensive need for after-school and weekend hours of supervised therapeutic recreation that this population (children) requires. The new facility will greatly enhance the recreational program and would provide space for large group activities/events for residents and families.

The Ewing Residential Treatment Center has inadequate space to provide statutorily mandated educational services to its clients. In addition, the facility has no indoor recreation space. Currently, the facility has an agreement with Trenton Psychiatric Hospital (TPH) that allows them access to the second floor of the Lincoln Building for educational purposes and provides limited access to the TPH gymnasium. The space in the Lincoln Building is inappropriate space for the client population of Ewing since it is on the grounds of a psychiatric hospital and these children are not clients of the facility. It also creates the need to transport the children from Ewing to TPH. The two patient populations can come into contact with each other. The Department has long been concerned about this for security reasons. TPH is also under continuing pressure to reclaim the entirety of the Lincoln Building for their own population. The clients of the Ewing Residential Center would be best served if their educational and recreational services were provided within the Center's own campus.
### OFFICE OF EDUCATION

Overview
The mission of the New Jersey Department of Corrections (NJDOC) is to ensure that all persons committed to State correctional institutions are confined within the level of custody necessary to protect the public and to provide the care, discipline, training, and treatment needed to prepare them for reintegration into the community.

The Department's goals are to control costs, improve productivity and operational efficiencies, expand treatment and rehabilitation services, increase community programs and reintegration services, and improve educational programs. The Department intends to accomplish these goals through several approaches including maximization of technology, expansion of inmate services, outreach programs evaluations, measurements of program effectiveness, enhancement of emergency response capabilities, and expansion of inmate work programs.

Statistical Data
Collectively, county jails, community treatment programs, and State correctional facilities house approximately 27,000 inmates of which approximately 2,119 are incarcerated in county facilities due to lack of bed space in State institutions.

Since 1979, the New Jersey courts have utilized mandatory minimum sentences, which require offenders to serve the entire minimum sentence before becoming eligible for parole. These mandatory minimum sentences cannot be reduced through earned credits, good behavior, minimum security, or work programs. Consequently, as of January 2004, fifty-five percent of all adult offenders with mandatory minimum terms had mandatory minimums of four years or less, twenty-nine percent were serving five to fourteen-year minimums, and sixteen percent had mandatory minimums of fifteen or more years. At present, the median term for all NJDOC inmates is four years.

As of January 2004, forty percent of the inmates (10,556) were convicted of violent offenses such as homicide, sexual assault, robbery, death-by-auto, and negligent manslaughter. Of the violent offenders, 1,094 are serving life sentences and 16 are under capital sentences. Drug convictions also account for a substantial number of offenders, constituting thirty-five percent of the inmate population. Eighty-two percent of all narcotics law violations are for sale and distribution of drugs.

Facilities
NJDOC operates 14 major institutions. These include eight adult male correctional facilities, one woman’s correctional institution, a central reception/intake unit, a sex-offenders facility, and three youth institutions. The department also operates satellite facilities at Ancora, Marlboro Camp, and Jones Farm and provides a stabilization and reintegration unit for inmates in need of special training, education, and supervision.

The major adult correctional facilities include South Woods State, New Jersey State, East Jersey State, Bayside State, Northern State, Riverfront State, Southern State, Mid-State, and the Edna Mahan Correctional Facility for adult females.
The three youth facilities administered by the Department include Garden State, Mountainview, and Albert C. Wagner. These facilities provide for the custody, care, and rehabilitation of men aged 18 to 26 who are serving indeterminate sentences and for those who are less violent and serving determinate sentences.

Other facilities provide specialized functions in the correctional system. The Central Reception and Assignment Facility is responsible for initial custody and classification of offenders entering the prison system; the Adult Diagnostic and Treatment Center offers specialized treatment services for sex offenders; and a Special Treatment Unit, operated jointly by the Department of Corrections and Department of Human Services, provides for custodial supervision of civilly committed sex offenders.

**Services**

The Department offers an array of institutional services for offenders including work programs in the State Use shops, farms, bakeries, maintenance, and food services. Also provided are academic and vocational education training, recreational activities, library services, and substance abuse treatments. All inmates receive medical care, psychological counseling, and treatments to improve social behavior and skills necessary for positive social interaction.

For offenders under community supervision, the Department contracts with private and non-profit organizations to provide a variety of residential treatment programs. Also, the State Parole Board supervises parolees through the Electronic Monitoring/Home Confinement Program, Intensive Supervision Surveillance Program, and the Intensive Parolee Drug Program. A new program initiated in 2002 by the Parole Board is the Halfway Back Program. This program, designed to reduce recidivism for technical parole violators, provides a highly supervised residential environment that concentrates on areas of the offenders’ highest needs such as addiction or life skills development.

South Woods, the DOC’s newest and largest facility, opened in the spring of 1997. The High Temperature Hot Water (HTHW) Underground Distribution System, which was installed from 1995 to 1997, supplies the various buildings of the facility from a central plant. Multiple pipe failures have occurred on the HTHW System. The first failure occurred in 2000 with additional failures in 2002 (1), 2003 (1), 2004 (2) and 2005 (1). Due to the number of failures, their location throughout the institution, and the short period of time from the opening of the facility to the first occurrence, staff from the Department of Corrections, the Division of Property Management & Construction (DPMC), and the Bureau of Risk Management in the Department of Treasury all agree that we have a complete and catastrophic system failure. Therefore the HTHW System must be replaced. A consultant has been contracted to perform an investigation of the existing HTHW system to determine the cause of repeated pipe failures and to design a replacement system. This request is to supplement funds appropriated in FY 2007 for the construction of the replacement system. This funding is required due to design revisions and the escalation in labor and material costs. The aforementioned investigation of the causes of the failure will guide the State in seeking reimbursement from the original installers of the system.

#### SOUTHERN STATE CORRECTIONAL FACILITY

| FACILITY REPLACEMENT |
| LOCATION: PRESENT SITE |
| Dept Priority 1 |
| Project ID: 26-008 |
| Project Type Code: E02 |
| Project Type Description: Construction-New |
| General: $210,433 |
| Sub-Total: $210,433 |
| Operating Impact: Increase: $0 |
| Decrease: $0 |

The entire Southern State complex, with the exception of a few support buildings, is comprised of trailer units. These units, which are constructed of inexpensive non-durable materials, have a normal life expectancy of ten (10) years and these are over 20 years old. In August 2003, a fire completely destroyed Unit 11. Also in September 2003, the entire complex, which now has an operating capacity of 1,696 inmates, had to be evacuated due to the potential for winds in excess of 70 mph from Hurricane Isabel. During FY 1996 the DOC replaced all of the housing unit roofs and made repairs to the roof mounted HVAC units and other roof systems at a cost of $2.5 million. Since FY 1997 the DOC’s Capital Budget has included requests for the design and construction of a replacement facility, built with conventional structures with longer useful lives. These requests have not been funded; therefore the DOC is requesting design funds in FY 2008 and construction funding in FY 2009. Failure to fund this request will force the department to initiate major capital repairs to these deteriorating...

**DIVISION OF MANAGEMENT AND GENERAL SUPPORT**

**TRAILER UNIT REPLACEMENTS**

- Dept Priority: 2
- Project ID: 26-071
- Project Type Code: E02  
  Project Type Description: Construction-New

| General | $69,344 | $12,608 | $12,608 | $6,304 | $37,824 |
|----------------------|---------------------|---------------------|---------------------|--------------------------|

**Sub-Total:** $69,344  
| $12,608 | $12,608 | $6,304 | $37,824 |

**Operating Impact:** Increase: $0  
Decrease: $625

In response to the prison-overcrowding crisis, the Department initiated a trailer installation program in May 1981. At the present time, the Department occupies 9 units with an operating capacity of 1,386 beds. These units, which are constructed of inexpensive non-durable materials, have exceeded the normal life expectancy of ten years, require an inordinate amount of maintenance and are not energy efficient. The Department received a $4.0 million appropriation in FY 2006 and has initiated the replacement of D Cottage (48 beds, installed in November 1981) at Edna Mahan. In addition to replacing the trailer, approximately 59 beds will be added to the Operating Capacity of the Edna Mahan facility when the project is completed. This project request is for the phased replacement of the following units, with the Department's dormitory prototype inside the secure perimeter of the host facilities: TM 3 (148 beds) and TM 4 (149 beds), Bayside (installed in March 1985); East Cottage (120 beds, Installed in May 1988) and Hillcrest Cottage (120 beds, installed in March 1990) at Edna Mahan; Rahway Camp, East Jersey (132 beds installed in November 1985); Housing Units D, E and F, Riverfront (357 beds, installed in July 1990); and Housing Units G, H and I, Northern (360 beds, installed in January 1990). Presently, E Unit, Riverfront and H Unit, Northern are not occupied due to fires in the units. Phase 1 of the program; will include the installation of two (2) 134 bed units at the Bayside State Prison. Should this request not be funded, the Department will be forced to initiate major capital repairs.

**DIVISION OF MANAGEMENT AND GENERAL SUPPORT**

**FIRE SAFETY CODE COMPLIANCE**

- Dept Priority: 3
- Project ID: 26-005
- Project Type Code: B02  
  Project Type Description: Compliance-Fire Safety

| General | $56,785 | $15,193 | $11,996 | $14,956 | $14,640 |
|----------------------|---------------------|---------------------|---------------------|--------------------------|

**Sub-Total:** $56,785  
| $15,193 | $11,996 | $14,956 | $14,640 |

**Operating Impact:** Increase: $0  
Decrease: $0

To provide for the necessary repairs, renovations and installations of required fire safety devices to comply with the New Jersey Uniform Fire Safety Code. The Department has received $9.8 million in Capital Appropriations over the last six fiscal years, which has been utilized for twelve (12) Fire Safety projects at ten (10) different facilities. This funding was supplemented with the insurance reimbursement from the Unit 11, Southern State fire, which was used to complete the Secondary Egress Installation, Mountainview project (C0718-00). Funding is requested in FY 2008 for projects at the Albert Wagner (Detection, Alarm &amp; Suppression), Garden State (Detection &amp; Alarm), Southern State (Fireblocking in Trailers) &amp; ADTC (Sprinkler Head Replacement) facilities. Should this request not be funded the potential for loss of life and structures, due to fire, will continue at the remaining institutions and the Department will remain non-compliant with the New Jersey Fire Safety Code.

The locking systems at our facilities are outdated and parts are no longer available from the original manufacturer or any other stocking source. All parts obtained are specifically fabricated to fit the system. The delays experienced obtaining these specially fabricated parts results in vacating the cells until the part is received. At times, multiple doors have failed to open in-group mode during a mass movement, which has delayed a mess, shop or yard movement. In this case, extra officers may be dispatched to the unit. The Department received $1.0 million in funding in FY 2006, which will be utilized to replace the locking system in Wing 3 at the East Jersey State Prison. Funding for the remaining work is requested over several fiscal years, which will enable the Department to initiate a phased replacement program for locking systems throughout the state. Phase 1 of the program; will include replacement of the locking systems in Housing Units A – F, Northern and Wings B, D and E, Albert Wagner.

- **Decrease:** $0

The Scope of Work for this project, initiated in 1996, called for the replacement of deteriorated perimeters of ten (10) of the Department's facilities with a prototype secure perimeter. East Jersey, Mountainview and Cottage C and Hillcrest Cottages at Edna Mahan were added later. Funding previously appropriated for the program, totaling $25.789 million, was from existing capital fund balances ($0.186 million) supplemented by capital appropriations in FY97 ($6.5 million), FYs 99 - 02 ($18.704 million) and $0.399 million from the 1987 Bond Issue. However, $11.212 million was lapsed in FY02 to cover the State's Operating Budget deficits. To date, Bayside, CRAF, East Jersey (Perimeter Wall, Phase 1), ADTC (Rahway Camp) and Hillcrest Cottage (Edna Mahan) have been completed. The priority order for completion of the remaining facilities is Mid-State, Garden State, Albert Wagner, Mountainview, East Jersey (Perimeter Wall, Phase 2), Northern, Riverfront, Edna Mahan, ADTC (Main Fence) and Southern State. Failure to fund this request would increase the potential for perimeter security breaches at the remaining facilities.

This project is for the replacement of the existing chiller units (2) at the New Jersey State Prison with higher-efficiency equipment and state-of-the-art control systems. In May 2006, chiller #2 failed. In order to ensure adequate cooling to the facility, a portable chiller and ancillary equipment was rented and put into operation until the failed unit could be repaired. The existing units are over 25 years old and, as shown by the recent breakdown, are in such a condition as being beyond reasonable repair by the facility maintenance staff.

This project is for the design and construction of a 200-bed medium security unit on the grounds of the Edna Mahan facility. The unit is needed due to continued overcrowding and the change in the type of inmates presently housed at the facility. The Scope of Work calls for the construction of four 50-cell housing units in one building similar to the housing units constructed at the Northern State Prison, with sufficient program and staff support space, surrounded by the Department’s prototype perimeter security system. Due to the configuration into four separate housing units, the building could house several divergent populations such as General Population, Administrative Segregation, Protective Custody, Special Needs inmates and inmates requiring extended care or the provision of specialized medical care as identified by facility staff.

The phased replacement of East Jersey State Prison (EJSP), which is a maximum-security prison, by 2,000 beds of various security levels. EJSP was constructed more than 100 years ago (1886) and, other than selected wings at the New Jersey State Prison, is the Department’s oldest facility. Despite extreme efforts to provide short-term maintenance to this aged facility, the basic infrastructure is obsolete, outmoded and in a chronic state of disrepair. This includes the locking systems, roofing, plumbing, HVAC and power. This initiative provides the Department with a unique opportunity to assure optimal utilization of bedspace by custody level and to maximize existing operational expenditures. The FY2008 request is for programming, planning and design funds. Construction funding is requested in FY2009.

Many facility roofs have been leaking for a number of years and are beyond repair. Without funding for roof repairs, facilities will experience continued structural damage and the potential for health and safety hazards to staff and inmates. Funding of the project would result in a cost saving from the reduction of the cost of materials, equipment and man-hours associated with maintaining the roofs and repairing any damage created by the leaks. Over the past five fiscal years $9.0 million has been appropriated for roof replacements/repairs with an additional $1.9 million transferred for this purpose. To date, work has been completed at ADTC, Riverfront, Albert Wagner, Edna Mahan (Food Service Building), Garden State, Mid-State, Northern (Power House), Bayside (roof overhang), Rotunda/Dome Repair at East Jersey and the DEPTCOR Warehouse in Trenton. The North &amp; South Halls, Edna Mahan project is under construction. One project is currently in design (Vocational/Training Building, East Jersey).

The upgrade of the domestic water supply and distribution system of the Edna Mahan facility. Due to the increase in population over the last 15 years the water supply, treatment and distribution system are running at capacity. Also due to the age and condition of the existing system, ongoing maintenance is a problem. To accommodate an increase in supply and to improve the condition of the existing distribution system, the following work must be completed: 1) The construction of a new well house and treatment building or the upgrade of the existing well house and treatment facilities. 2) The upgrade of the existing water distribution system, including, but not limited to new connections, valves, fire hydrants and relays and the cleaning and lining of all water mains.

- Install storm drains around building perimeter. Excavation of grounds with upgrades and repairs to masonry walls (exterior & interior), windows, doors and walls of basement areas of facility. During the summer of 1996, heavy rains caused severe flooding of the basement area. Central Archives and Classification are located in this area. Water came extremely close to the main electrical switch gear. This could have caused a total loss of electrical power and the loss of inmate records. In April 2005, the department initiated the study/design phase of this project (C0805-00). The consultant's final report, which contains recommend solutions, was received in August 2006. This request is for the funding to carry out the recommendations.

- In May 2006, the DOC contracted with an Environmental Engineering firm to conduct a limited microbial and moisture assessment within designated areas of the South Woods facility. The inspection was initiated in response to a PEOSH program report that identified locations exhibiting visible fungal contaminants. The Consultant did identify evidence of condensation and water incursion and therefore recommended that the facility's HVAC systems be evaluated by a Mechanical Engineer for interior environmental controls for humidity, ventilation and condensation. This project is requested to fund the recommendations made in the Mechanical Engineers evaluation report.

Operating Impact: Increase: $0 Decrease: $0

- Upgrade and expansion of the existing closed circuit TV system to include video taking capability. Currently, there are six cameras located in the dining hall, gym and auditorium with monitors located in Central Control. Funding is requested to purchase additional equipment which will be installed in Housing Units A-F, Chapel, Main Compound, East &amp; West Arcades, Visit Room, Gym, Clothing Shop, Tag Shop, Bakery, Maintenance Shops and Trailer Complex in the Medium Unit. As well as Willow and Spruce Halls at Ancora and all Housing Units and Educational Shops at the Minimum Unit. Due to the increase in the inmate population over the last several years and the type of inmate now being classified to the facility, it is imperative that staff have the ability to monitor and record the activities of the inmate population. This system would act as a deterrent to the inmate population and also enhance the safety of the staff and inmates.

Engineer and install a new electrical distribution system for the facility and update the electrical services for all housing units. Due to the poor condition of the electrical distribution system the facility has had several power outages during the last year. Due to the poor condition of the electrical services in the housing units many inmates use batteries. These batteries can be used as weapons by the inmates. The installation of the upgraded electrical service will eliminate the need for batteries and take away the threat of harm to both staff and inmates. This project is planned to be completed in 2 phases. The design for the entire project and the installation of the new facility wide distribution system will be included in the first Fiscal Year. The upgrading of the housing unit electrical services is planned for the second Fiscal Year.
### SOUTHERN STATE CORRECTIONAL FACILITY

To fund the replacement of the air-handling systems for the main Housing Units (A, B & C) including two (2) chiller units. The original systems, as a result of their constant use since 1985, have exhausted their utility and efficiency, requiring expensive continued repair and maintenance to the point they now need replacing. These buildings have housed inmates double their design capacity.

### ALBERT C. WAGNER YOUTH CORRECTIONAL FACILITY

**Condensate Return Line Replacement**

- **Department:** Corrections
- **Project ID:** 26-241
- **Project Type Code:** F01
- **Project Type Description:** Infrastructure-Energy Improvements

- **Decrease:** $0

The replacement of the condensate return line that runs from the Garden State facility to the Wagner facility powerhouse. The existing condensate return line has numerous leaks. Facility maintenance staff have attempted repairs, however when one is complete new leaks appear. This situation has significantly reduced the amount of condensate being returned to the plant. To operate the boiler plant, facility staff must then use more make-up water and the chemicals used to treat the water. The more make-up water used the less cost efficient the boiler plant operation becomes.
## Department of Corrections

Replace the complete entrance area, including the doors, in each Housing Unit (A - F). The replacement doors are to include electronic locks that will be controlled by Center and the Housing Unit officer for security. The steel supports of the entranceways are rusting excessively at the point where they are embedded in the concrete steps leading into each housing unit. In addition, the weights of the doors themselves seem to be above the limit which can be supported by the metal frames, causing difficulty in closing the doors.

### MID-STATE CORRECTIONAL FACILITY

REPLACE GUARD TOWERS

</table>

**Operating Impact:**

- *Increase:* $0
- *Decrease:* $0

The existing guard towers (5) at the Mid-State facility were installed in 1982 and are of modular construction, which have exceeded their useful life span. There are numerous problems with the units. Roof leaks may be allowing water to penetrate the structural steel tube members that support the towers. The sealant/weather-stripping at the ends of the unit’s corrugated wall panels has deteriorated. Due to these two factors, rust and/or deterioration were present in varying degrees in the towers. It appears that the towers are not in immediate danger of failure, but due to this deterioration and the aforementioned problems the DOC is requesting funding to replace the guard towers. The replacement towers will be constructed of panelized concrete with metal roofs.

The kitchen floor at the Albert Wagner Youth Correctional Facility was declared unsafe by structural engineers and replaced in 1994. Since that time, new leaks have been discovered, creating a potential health hazard. This request will fund the replacement of the existing flooring and possibly the substructure in the areas of the leaks. The replacement of the floor will require the relocation of some kitchen equipment.

Installation of one 25 ton multi-zone package HVAC unit with hot water zone heat coils, economizer, power exhaust, extended compressor warranty and factory built adapter curb to service the Administration Building. Due to the deteriorated condition of the roof top HVAC unit, replacement is necessary. The present unit is in constant need of repairs with replacement parts very difficult to find. The HVAC Controls for the building will be upgraded at the same time. All of the roof mounted HVAC units serving 5-wing, a dormitory style-housing unit, have passed their useful life, are in a deteriorated condition and should be replaced.

The Department has engaged an Engineer to replace steam lines and traps that are in deplorable condition and operating at about 50% efficiency, which is very costly. Recent replacement sections of the system have shown significant improvement in efficiency. Replacement of the balance of the system, along with new steam traps and flash tanks, would greatly increase efficiency and produce a significant cost reduction. As part of the project, the facility's steam trap maintenance program would be upgraded with the installation of new equipment.

#### EDNA MAHAN CORRECTIONAL FACILITY FOR WOMEN

**BACK-UP GENERATOR SYSTEM INSTALLATION**

- **Location:** POWERHOUSE
- **Dept Priority:** 28
- **Project ID:** 26-280
- **Project Type Code:** A01

**Operating Impact:**

- **Increase:** $0
- **Decrease:** $0

The Department contracted with an Electrical Engineer to study the Edna Mahan facility's electrical distribution system. The consultant's report indicated that if there is a problem with the Co-Generation Plant and any attempts to temporarily tie into street power are unsuccessful, the existing backup generator will not provide the facility with sufficient power to maintain all systems. There is a good possibility it would fail. It is imperative that a facility of the size and type of the Edna Mahan facility have a functioning back-up generator system. This system would be in a self-contained trailer and would be strategically placed on grounds to take over in the event of total power loss.

#### SOUTHERN STATE CORRECTIONAL FACILITY

**VIDEO SURVEILLANCE SYSTEM INSTALLATION**

- **Location:**
- **Dept Priority:** 29
- **Project ID:** 26-296
- **Project Type Code:** E03

- **Decrease:** $0

A video surveillance system would provide real-time viewing and recording of the general compound areas of the Southern State facility. The system would enable facility staff to view and record and retrieve video data of inmate activity such as inmate gatherings, assaults on staff, fights, contraband exchange, escape attempts and misuse of equipment. Therefore, increasing the safety of both staff and inmates. Also, video evidence is mandatory in the event of inmate alleged misconduct. Video documentation of the misconduct would assist in investigations and potentially protect the Department in the event of court proceedings. The Southern State system would include approximately 16 cameras in each Compound comprised of 2 camera types (fixed position and pan, zoom tilt with automatic adjustment) and sufficient recording equipment to support the cameras.

Operating Impact: Increase: $0  Decrease: $0

This request is for the complete renovation of the basement and first floor levels of the Center Control at the Garden State facility. The Garden State facility was built in the early 1960's and the Center Control was not constructed to accommodate the high technology control devices that exist today. With subsequent additions to the mission of the facility and physical plant, the area is a mixture of varying technologies. This includes an abundance of counters, filing cabinets and other controls of various eras. A variety of electrical equipment, emergency phone boards and the fire alarm system reside in the basement. Design of this project was funded from the FY 2000 Capital Appropriation for Security Improvements. This request is for construction funding.

NORTHERN STATE PRISON

REPLACE YARD AND SALLY PORT GATES

Operating Impact: Increase: $0  Decrease: $0

To engineer and install new gates at the entrances to the Yard areas outside each Housing Unit and in outside sally ports. The work would include, but not be limited to the replacement of gates and gate operators as well as the relocation of the units. The gate operators that were originally installed is no longer manufactured. This makes locating replacement parts very difficult and in some cases facility staff must fabricate these parts. Also, the housing unit gates and operators were installed inside the yards. This not only makes servicing difficult, but also allows the inmates access to the operators and locks.

NEW JERSEY STATE PRISON

KITCHEN FLOOR REPLACEMENT

Operating Impact: Increase: $0  Decrease: $0

A 1999 investigative study by a structural engineer revealed that no waterproofing was incorporated or placed in the existing floor area of the kitchen as required in the original construction documents, floor penetrations were not sufficiently sealed, floor tiles are cracked broken or missing in vital areas, the floor drains are high and the floor is not sloped properly. At that time, the consultant recommended a Phased Development Program, which included floor repair, relocation of kitchen equipment and equipment adjustments. By phasing the construction activities necessary to eliminate the problems it will be possible to maintain kitchen production and serving activities at 80% efficiency. This request is to fund this work.
### RIVERFRONT STATE PRISON

**Tower Flashing and Window Replacement**

- **Dept Priority:** 33
- **Project ID:** 26-250
- **Project Type Code:** A03
- **Project Type Description:** Preservation-Critical Repairs

**General:**

- FY 2008: $268
- FY 2009: $0
- FY 2010: $0
- FY 2011-2014: $0

**Sub-Total:**

- FY 2009: $0
- FY 2010: $0
- FY 2011-2014: $0

**Operating Impact:**

- Increase: $0
- Decrease: $0

Design and replace all windows in guard towers 1, 2, 3 & 4 with tinted security glazing and proper insulation. The towers have been drafty since they were built in 1985 generating many complaints from officers. Also, it has been determined that officers manning these towers are vulnerable due to the clear glazing that was installed which creates a security problem. Department of Health inspections have cited the tower windows as a problem.

### MID-STATE CORRECTIONAL FACILITY

**Upgrade Center Control Door System**

- **Dept Priority:** 34
- **Project ID:** 26-267
- **Project Type Code:** E03
- **Project Type Description:** Construction-Renovations and Rehabilitation

**General:**

- FY 2008: $253
- FY 2009: $0
- FY 2010: $0
- FY 2011-2014: $0

**Sub-Total:**

- FY 2008: $253
- FY 2009: $0
- FY 2010: $0
- FY 2011-2014: $0

**Operating Impact:**

- Increase: $0
- Decrease: $0

This project is for the complete removal and replacement of the existing electronic center control door system. The Mid-State facility, which is in the New Hanover Township section of the Fort Dix Military Reservation, was built to serve as the Base Stockade in 1972. The Department took occupancy of the unit under a lease agreement with the Federal Government, in May 1982. The existing door control system, which controls all doors surrounding central control, was repaired and upgraded at that time. The intent is to replace the system, utilizing the existing control console turrets, relay cabinets and most existing field wiring. The new system shall consist of new control console faceplates (with low voltage, mechanical switches and relay back-plates), individual door relay modules and individual door fusing.

### SOUTH WOODS STATE PRISON

**New Public Address System**

- **Dept Priority:** 35
- **Project ID:** 26-298
- **Project Type Code:** A01
- **Project Type Description:** Preservation-Electrical

**General:**

- FY 2008: $211
- FY 2009: $0
- FY 2010: $0
- FY 2011-2014: $0

**Sub-Total:**

- FY 2008: $211
- FY 2009: $0
- FY 2010: $0
- FY 2011-2014: $0

**Operating Impact:**

- Increase: $0
- Decrease: $0

The facility public address system for the South Woods facility has been struck by lightening several times in the last year. While attempting to make repairs to the system, facility maintenance staff have been advised by the original manufacturer that replacement parts for the system are no longer manufactured. Any parts that have been obtained have had to be specially fabricated to fit the system. Delays in obtaining parts have leave staff in numerous areas of the institution in communication “dead zones”, which jeopardizes staff safety. This project is for the phased replacement of the existing public address system with a state of the art system.

This project would include an investigation of the Garden State food service operations. This investigation would provide various recommendations from which a program document would be prepared, followed by design documents and construction. This program would include, but not be limited to, replacement of the existing floor, the upgrade of necessary equipment and relocation, as needed, to improve the facility. This may entail recommended changes in transport carts that not only meet Health Department standards but which similarly meet the physical requirements of our facility including efficiency of food preparation, storage and serving both in the main dining halls and to remote feeding.

This project is for the cleaning and sanitizing of the entire HVAC system including ductwork, mixing boxes and coils in order to improve the air quality in the North and South Compounds of the New Jersey State Prison. The North and South Compounds (occupied in 1982) were constructed with a state of the art HVAC system. However, no maintenance contract was provided with this installation and it is beyond the capabilities of the existing facility maintenance staff. Therefore, capital funding is now required to effect the cleaning of this system.

Design and construct an expansion to the front house, employee dining room and record retention storage. Due to the expansion of the prison population (both employee and inmate), existing employee office space, record retention storage and employee dining/break areas are inadequate. It is possible that employee office space is in violation of OSHA standards concerning minimum allocation of work area per employee. This overcrowding is compounded by the increased demand for space created by the wide scale use of computers and the very large volume of general record-keeping mandated by various regulations. Due to this overcrowding, some of the office areas have been supplemented by office trailers, but this is only a temporary stop-gap measure. The Classification Office is also undersized for the required number of employees and file storage area. Currently storage space is being utilized in other buildings within the compound which makes the search for information very time consuming and inefficient.

To construct a central processing plant of approximately 9,000 sq. ft. for the Department's AgrIndustries program. The new processing plant would act as a dairy as well as a produce plant. A new processing plant would process and store current AgrIndustries products such as milk, fruit drink and iced tea as well as provide an opportunity to manufacture new products, such as orange juice, ice cream and pudding. The plant would also serve as a storage and preparation area for the AgrIndustries Jersey Fresh Program, where over-produced and under-valued Jersey fresh produce is sold to AgrIndustries customers at a discounted price. A second project to install a new concrete floor in the main barn at the Wagner farm is also planned.

This multi-year funding request would provide additional space to augment existing industrial and program space and to also provide space to establish new manufacturing and service type programs. During the 1990's the increase in the Department's inmate population outpaced the number of available inmate work opportunities. This seriously constrains the Department of Corrections ability to provide practical and productive inmate work activities. To alleviate the constraint, the Department recommends the following capital expansion program for inmate work opportunities.

#### SOUTH WOODS STATE PRISON

Replace the existing video surveillance system throughout the South Woods facility with a more manageable less labor intensive system utilizing pan-tilt cameras and touch screen video monitoring along with digital date recording capability. The new system would also integrate the visit hall camera system. The original video surveillance system is antiquated. There is no control of the cameras and video archiving is done by video tape. Also, the system constantly requires repair. This compromises the security and safety of both staff and inmates.

## NEW JERSEY STATE PRISON

**WING 4 RENOVATIONS**

**LOCATION:** WEST COMPOUND

- **Dept Priority:** 45
- **Project ID:** 26-002
- **Project Type Code:** E03
- **Project Type Description:** Construction-Renovations and Rehabilitation

| General | $5,400 | $0 | $5,400 | $0 | $0 |
|---------------------|---------------------|---------------------|---------------------|---------------------|
| Sub-Total            | $5,400              | $0                  | $5,400              | $0                  | $0          |

**Operating Impact:**

- **Increase:** $0
- **Decrease:** $0

Repair of water damaged walls and ceilings, replacement of sinks and commodes in the 83 cells with stainless steel combination units and replacement of the main water and sewer lines. In 1987, a section of the deteriorated ceiling fell and temporary repairs were made. The main sewer and water lines are in poor condition and need replacing. The sinks and showers in the bottom tier housing units drain into a french drain outside the main building. The plumbing work identified is similar to work recently completed in Wings 7 and 1 and requested for Wings 2, 3 and 5. Failure to fund this request will allow an already hazardous life safety condition to worsen.

## NORTHERN STATE PRISON

**STORM DRAINAGE/LEVELING ACSU YARDS**

**LOCATION:** ADMIN. CLOSE SUPERVISION UNIT

- **Dept Priority:** 46
- **Project ID:** 26-109
- **Project Type Code:** F04
- **Project Type Description:** Infrastructure-Other

| General | $627 | $0 | $627 | $0 | $0 |

| Sub-Total            | $627                | $0                  | $627                | $0                  | $0          |

**Operating Impact:**

- **Increase:** $0
- **Decrease:** $0

Initially a study will be performed to determine the cause and extent of the problems with the storm drainage system in and around the ACSU yards. Based on the recommendations made in the study the necessary remedial work will be carried out. It has been identified in various reports, and a staff grievance, that large amounts of water do not drain during heavy rains. Thereby creating large ponds of water in the ACSU yard areas. This has created an unsafe condition for both staff and inmates.

## CENTRAL OFFICE

**RENOVATE THOMPSON COTTAGE**

**LOCATION:** THOMPSON COTTAGE

- **Dept Priority:** 47
- **Project ID:** 26-266
- **Project Type Code:** A06
- **Project Type Description:** Preservation-Other

| General | $1,377 | $0 | $1,377 | $0 | $0 |

**Operating Impact:**

- **Increase:** $0
- **Decrease:** $0

Thompson Cottage is a vacant three- (3) story building located at the Department’s Central Office Complex that is presently being used as short-term storage space. Due to the shortage of useable space for the Department’s administrative staff, it has been determined that this unit be renovated for use as office space. This project addresses the complete renovation of this building. The Scope of Work includes, but is not limited to, the following items: removal of rotted flooring and installation of new sub-flooring and flooring; replacement of existing walls; new electrical services (main and secondary); a new HVAC system; and new plumbing services (domestic water and sewer).

Design and construction a new perimeter guard tower adjacent to the existing Tower 1. Tower 1 has been in place since the opening of the facility over 75 years ago and due to age and deterioration has become unsafe. Based on the recommendations of a structural engineer, facility maintenance staff has undertaken repairs to the structure. However, this will only sustain the building for a couple of years. Tower 1 is an integral part of the perimeter security system of this facility.

Engineer and install necessary upgrades to the facility's HVAC and pneumatic control systems. The Scope Of Work (SOW) for this project would include the installation of air handling equipment and duct work where necessary. Also included is the upgrade of the electrical distribution system. Parts of the building are without adequate air flow and ventilation, which creates an unhealthy situation during the summer months. Installation of this new HVAC system will alleviate this problem and allow for a more healthy environment for both staff and inmates. Also included in the SOW, will be the replacement of the facility's pneumatic control system.

This project is for the engineering and installation of the work necessary to repair the HVAC system of the Northern State Prison, Administrative Close Supervision Unit (ACSU). The ACSU is a maximum security facility which houses over 400 inmates. The unit, built in 1991, consists of two (2) three (3) story buildings totaling 42,000 square feet, which are connected to a one story visitor's center. The problems with the system include, but are not limited to the pneumatic control system, dampers, thermostats and the compressors, heating and cooling coils and motors on the rooftop HVAC units. There are no operating windows in the ACSU facility, therefore it is imperative that the HVAC system function at all times.

Design and construction of the necessary renovations to modernize the facility's Center Control Area. The Center Control function at ADTC is divided into two distinct locations separated by the facility's receiving area. This project's SOW would include, but not be limited to the following renovations: 1) The installation of a masonry and security glass wall in the Receiving Area creating a link between the two existing locations. 2) Revision of all existing security control system equipment and communication equipment, as needed, to provide the most efficiency in the combined spaces; 3) Redesign of existing desks and cabinetry to provide the most efficient design for staff movement and functionality with the possible addition of cabinetry to provide needed storage; and 4) Relocation of the existing armory. Center Control is inadequate for monitoring and control of the main and satellite units (5 Wing. The Special Treatment Unit-Kearny and the STU Annex.

- **Sub-Total:** $876

**Operating Impact:**
- **Increase:** $0
- **Decrease:** $0

Design and construction of the necessary renovations to modernize the facility's Center Control Area. This project's SOW includes, but is not limited to the upgrade and/or replacement of existing security control system equipment, the redesign of existing desks and cabinetry to provide the most efficient design for staff movement and functionality with the possible addition of cabinetry to provide needed storage and the revision of all communication equipment, as needed, to provide the most efficiency in this very limited space. Center Control is inadequate for monitoring and control of the main and satellite units (Ad Seg, I Wing, Work Release and New Lisbon Boot Camp). Design of this project was funded from the FY 2000 Capital Appropriation for Security Improvements. This request is for construction funding.

**BAYSIDE STATE PRISON**
- **Expand Visit Lobby, Medium Unit**
- **Location:** Medium Unit
- **Dept Priority:** 55
- **Project ID:** 26-301
- **Project Type Code:** E02
- **Project Type Description:** Construction-New

- **General:** $149
- **Sub-Total:** $149

**Operating Impact:**
- **Increase:** $0
- **Decrease:** $0

Convert the room adjacent to the current visit lobby at the Medium Facility to additional visit space. This project would require architectural and engineering services to address all code related issues. The current visit room was designed to accommodate visits for 550 inmates. The present population at the Medium Facility exceeds 1,200. As the number of visitors has increased along with the population, it has become necessary to terminate visits early to accommodate all family members that arrive at the institution within the time frame established, to have their visit. When an inmate's visit is terminated early it causes anxiety for both the inmate and his family. The addition of this room would allow all visits to continue until visiting hours are over.

**EAST JERSEY STATE PRISON**
- **Interior Cell Wall Repairs, Wing 4**
- **Location:** Wing 4
- **Dept Priority:** 56
- **Project ID:** 26-286
- **Project Type Code:** A03
- **Project Type Description:** Preservation-Critical Repairs

- **General:** $2,300
- **Sub-Total:** $2,300

**Operating Impact:**
- **Increase:** $0
- **Decrease:** $0

This project is for the replacement of the rear walls of each cell unit in Wing 4. The Scope of Work would include, but not be limited to, the replacement of all plumbing and electrical fixtures and ancillary piping within the cell. Wing 4 contains 368 cells, which were constructed with modular metal sections connected by concrete flooring. Portions of the rear cell walls have become decayed to the point that some cells have been condemned. To allow this deterioration to go unchecked will result in the loss of additional maximum security bedspaces.

EDNA MAHAN CORRECTIONAL FACILITY FOR WOMEN
UNDERGROUND STEAM LINE REPAIR/REPLACEMENT
LOCATION:
Dept Priority 57
Project ID: 26-281
Project Type Code: F01 Project Type Description: Infrastructure-Energy Improvements

| General | $758 | $0 | $758 | $0 | $0 |
| Sub-Total | $758 | $0 | $758 | $0 | $0 |

Operating Impact: Increase: $0 Decrease: $10

The Edna Mahan facility is constantly losing steam due to a variety of leaks within the underground steam distribution system. The Department would contract with a Mechanical Engineering firm to inspect the entire underground steam piping system to identify the problem areas and to provide recommendations to correct the problems. The second phase of the project would carry out the recommended repairs and or replacements.

SOUTH WOODS STATE PRISON
CATWALK INSTALLATION
LOCATION: FACILITY WIDE
Dept Priority 58
Project ID: 26-187
Project Type Code: A06 Project Type Description: Preservation-Other

| General | $1,183 | $0 | $1,183 | $0 | $0 |
| Sub-Total | $1,183 | $0 | $1,183 | $0 | $0 |

Operating Impact: Increase: $0 Decrease: $0

It was noted in a recent PEOSH inspection that the location of some of the air handling equipment throughout the facility creates a hazardous situation for maintenance staff. An engineering firm has been contracted to investigate the problem and provide recommendations to alleviate the hazard. The recommended solution is the installation of catwalks at each of the air-handling units.

Tower 3 at the Northern facility is a five (5) sided, 48 foot high, freestanding, reinforced concrete structure constructed in 1985. In March 2001 a structural engineer inspected the facility due to reported masonry distress. The consultant found that although the tower’s main concrete structural frame is in overall good condition, the exterior block facade exhibits various degrees of structural distress. There is exterior open cracking and localized areas of spalled block. The consultant recommended the application of sealant over the cracks as a short term solution. The long term repair was to rebuild the facade with vertical control joints and shelf angle flashing. This project is requested to fund the long term solution.

Operating Impact: Increase: $0  Decrease: $0

This project is for the engineering and replacement of the existing emergency generator at the Riverfront facility. The existing emergency generator has little room for electrical expansion and currently is not 100% redundant. All other DOC facilities have 100% redundancy on their emergency power generation systems. The replacement of the existing generator with a larger unit and associated switchgear would provide for upgrade system redundancy, provide automatic transfer and additional electrical capacity.

The buildings in the Central Office Complex are experiencing deterioration. Following the recommendations of the Structural Engineering firm which completed a Building Exterior Survey in March, 1999, this project addresses the exterior surface restoration, repointing, brick and stone sealing and general masonry repairs as well as repairing, painting or covering soffits, fascias and cornices as necessary on the buildings. Significant deterioration has occurred on the Administration, Edge, Stokes and Bates Buildings. Deterioration of a lesser degree can be found on other buildings. If left uncorrected, the deterioration will progress requiring more costly repairs and creating potentially unsafe conditions. The project is being completed in phases. Work has been completed on the Colpitts, Cubberly, Edge, Stokes and Bates Buildings.

The steam piping system is in poor condition and is in need of immediate attention. Piping is deteriorated and leaking and is beyond simple repairs. The old system is a one pipe system. Radiators become clogged with debris which does not allow steam to pass through and causes the wings to have little or no heat. The piping repairs listed are necessary to ensure that the operation of the new system is as efficient as projected.

The institution is largely lighted by incandescent fixtures. Incandescent bulbs have a relatively short life span, emit heat and yield less light to an area than fluorescent lighting. This project would entail replacing, with comparable candle light, approximately 940 incandescent light fixtures. Because of the lower heat generated and longer life bulbs, a computerized light survey has indicated potential energy savings of over $60,000 in just one year.

Replace the current obsolete standard wiring and panel boxes in various cottages and install electrical disconnects on fifteen poles. C Cottage, Conover, Silzer, Williamson, Ackerman & amp; the Administration Buildings are 6 of the oldest building on grounds still in use and utilize the old fashioned cotton type jackets which are deteriorating due to age & amp; heat. Power panels with the older type individual glass fuses are in use and should be changed to breakers. Some of the buildings have neutral leg fuses, which is a very hazardous condition. An overall evaluation of the electrical systems in these buildings would not meet electrical code standards. Also, electrical pole disconnects should be installed at each pole where the electrical wires enter the building (15 locations). The main reason for these disconnects are, in a case of fire or other emergency, the electricity can be shut off at the pole. This would facilitate response time as well as eliminating the hazard of attempting to enter a basement during an emergency.

This project is for the installation of chilled water piping into the Maintenance Department shop areas. The electrical switch substation in the maintenance shop area becomes very hot and is at a critical limit. If the temperature becomes too high, the system will fail. The shop areas are very uncomfortable for staff to perform daily routine work. There are no windows to open, and the exhaust system is inadequate to keep the spaces tolerable for staff.

Design and construction of a 1,200 sq. ft. prefabricated building to house various vocational education programs. The unit will be sited inside the secure perimeter of the facility and will include work shop and warehouse space. ADTC was opened in 1976 with a design capacity of 183 inmates. The present inmate population is 628. Although housing has been expanded to accommodate the population growth, there has been little done to provide additional vocational education space. If this is not funded, the lack of vocational educational programs will continue to seriously impact the institution's ability to provide worthwhile activities for inmates.

The Southern State Correctional Facility is comprised of 11 dormitory units each surrounded by a security fence with a gate to segregate the unit from the main compound and adjacent unit(s). This inner security fence is provided to separate each unit in the case of a life threatening event and/or security breach. Due to the system-wide increase in gang activity and the dormitory environment of the Southern State facility, facility staff believe there is an added potential for internal and external security breaches. The planned upgrades include, but are not limited to the replacement of the existing fence with a 16 ft. high chain link fence topped with several strands of razor wire and the installation of additional security lighting.

To repair/install roads and parking lots. These repairs are necessary to maintain operations and have been scaled down to represent essential needs. Various entrance and perimeter roads and parking lots are in a serious state of disrepair. The sub-base in many areas has deteriorated and allowed the roadway to sink creating pot holes and checker-boarding of the blacktop. The facilities continue to patch pot holes as they appear, but a long range solution to this problem must be found. The maintenance of the DOC's road system is not just a convenience for the employees. It is also a security necessity due to the use of the road system for patrol of security perimeters and the access provided to the facilities for vendors, supplies, food service deliveries and various law enforcement personnel. Areas that require work at Mountainview are the Main Compound parking lot, the facility perimeter road and the farm driveways.

Replacement of water supply mains (3''), risers, commodes, sinks and main sewer lines in both units. The water supply mains need to be replaced due to age and low water pressure to the third tier housing units of Wing 3. The obsolete commodes and sinks should be replaced with stainless steel combination units. The main sewer line is cracked and split creating leakage and has been cited by the Department of Health. The plumbing work identified is similar to work recently completed in Wing 1.

### GARDEN STATE RECESSION AND YOUTH CORRECTIONAL FACILI

HOT WATER TANK REPLACEMENT  
LOCATION: MAIN COMPLEX

Dept Priority: 85  
Project ID: 26-274  
Project Type Code: A06  
Project Type Description: Preservation-Other

| General | $332 | $0 | $0 | $332 | $0 |
| Sub-Total | $332 | $0 | $0 | $332 | $0 |

**Operating Impact:**  
Increase: $0  
Decrease: $0

At the present time, the Garden State facility is supplied domestic hot water through four (4) existing hot water tanks. These tanks, which were part of the original construction of the facility are over 40 years old, inefficient, slow recovering and require a great deal of maintenance. The cement linings have crumbled and the tank design has made them obsolete. This project is for the engineering and installation of a new domestic hot water supply system utilizing an instantaneous feedback hot water system. The system requires only a minimum of floor space, provides water as it is needed (instantly), has a redundancy factor for complete system back-up and does not waste energy.

### MID-STATE CORRECTIONAL FACILITY

Replace necessary equipment and relocate, as needed, to improve the site. Repair Slop Room floor to allow for proper drainage of water from flooring. Poor drainage has allowed the accumulation of water in the flooring to dislodge the quarry tile and create a safety hazard. The existing equipment has been in use since 1985 to serve meals for an inmate population and staff, which has tripled in number. Subsequently, equipment which has undergone continuous repairs, has more than reasonably outlived operational expectations.

  - **Sub-Total:** $190  $0  $0  $190  $0

**Operating Impact:**
- Increase: $0
- Decrease: $0

The existing Receiving Gate sallyport loading dock doors have exceeded their normal life expectancy. Numerous mechanical breakdowns and physical damage make them a constant maintenance problem. These doors operate seven (7) days a week and are damaged by the heavy equipment (forklifts, pallets, etc.) used on the dock. All supplies enter the institution through these doors. Therefore failure of these units would severely impact the operation of the institution. This project is for the replacement of the six (6) doors and the installation of a new electronic locking system.

#### RECEPTION & ASSIGNMENT FACILITY

- **INMATE INTAKE/PROCESSING AREA RENOVATIONS**
  - **Location:** EAST WING
  - **Dept Priority:** 92
  - **Project ID:** 26-061
  - **Project Type Code:** E03  **Project Type Description:** Construction-Renovations and Rehabilitation
  - **General:** $2,988  $0  $0  $2,988  $0
  - **Sub-Total:** $2,988  $0  $0  $2,988  $0

**Operating Impact:**
- Increase: $0
- Decrease: $0

Make necessary renovations to the inmate Intake and Processing area. Provide one controlled access and high visibility stairwell for code-mandated egress and security and one 5,000 pound elevator. This work will give better visibility and control of the area.

**Operating Impact:** Increase: $0  Decrease: $0

Design and construct a separate visit entrance to the Administration Building utilizing an approximately 1,000 sq ft area left of the main entrance to be used as a visit entrance and package delivery dropoff. Riverfront was opened in 1985 with a design capacity of 396 inmates. The present inmate population is approximately 1,100. The visit entrance is located in the main lobby. During visit day, the visitors are lined up through the main entrance door and down the sidewalk. This blocks up the main entrance door and creates security problems due to the amount of visitors in the lobby waiting to enter through the front door. The construction of a new visit entrance and package dropoff area would direct all the visitors away from the main entrance door and front lobby creating a more secure situation.

#### NEW JERSEY STATE PRISON
- **Elevator Door Conversion**

**Operating Impact:** Increase: $0  Decrease: $0

There are six (6) typical general housing units at the South Woods State Prison. Each unit has two (2) attached exterior recreation yards. The recreation yards are prototypical with some fencing variations. Given their intended use, an increased level of security containment is required. This is to be accomplished by upgrading the existing security fence at each of the twelve yards by modifications to the existing fence and wall enclosures of each yard.

In July 2004 the DOC embarked on a statewide program to ensure that all facilities attained compliance with the NJDEP Municipal Separate Storm Sewer System regulations. Technical assistance was supplied by a Consultant contracted under the Department's Agency Consultant Program. As part of the Year 2 requirements for these regulations, the consultant has identified several areas of concern regarding stormwater and erosion concerns at the East Jersey facility. The existing swale that runs immediately north of the facility perimeter wall is in a continued state of deterioration. There is significant erosion exposing various stormwater pipe outfalls into a pond on facility grounds. Finally the existing culvert system, between the facility access road and the pond is deteriorating. This project is requesting funds to engineer and construct the various repairs to stabilize the aforementioned areas.

The Southern State facility currently has 1 laundry location each in Compounds A, B & C. Each laundry is comprised of 2 washers and 2 dryers, which are commercial grade and operated by electric power. Each unit also has a detail of inmates working along with a custody staff person. These units service approximately 2,040 inmates. The existing equipment is not capable of handling the capacity generated by this number of inmates. The proposed laundry will be located outside the perimeter fence in front of Compound A on the access road between Compound A & Compound B. Blankets and sheets from the entire facility would be transported and cleaned at this location, reducing the load of the existing machines and eliminating the need to transport these items to an outside facility. Existing laundries would be utilized to service inmate personal laundry.

This project is for the complete renovation of the bathroom areas, including plumbing and sanitary systems, on all inmate housing areas of A Wing and in E-1. The fixtures, valves and piping of both the plumbing and the sanitary systems do not meet water conservation standards or ADA requirements. Although the main plumbing distribution line in the basement of the A Wing has been recently replaced with copper piping, most of the supply system to the bathroom areas is original.

**BAYSIDE STATE PRISON**

REPLACEMENT OF STEAM HOT WATER HEATERS

**Operating Impact:** Increase: $0  Decrease: $0

Design and construct a new cinderblock building to create additional storage space for dry, refrigerated and frozen storage. The outside process kitchen's current storage is being used to its maximum capabilities. The kitchen produces 12,000 meals per day that provide meals for EJSP and the Adult Diagnostic & Treatment Center. Currently, only one week's worth of food supply can be stored at any one time with no room for mechanical breakdown of equipment. Storage closets that would normally be used for cleaning supplies and other such items are being used for the storage of raw food materials. Dry and refrigerated storage have been added over the years, but this is not enough for the current output of the kitchen.

To renovate the entire building including the plumbing, heating and electrical utilities. The building, which contains program, housing and office space, is a very sound structure and should last for a long time given proper care and maintenance. The plumbing, heating and electrical utilities in the building are approximately 60 years old and need to be replaced as soon as possible. The health and safety of both employees and inmates is a major concern because of these deteriorating utilities.

Replace the deteriorated tile floor in the inmate dining room with a non-skid terrazzo floor. The floor in the inmate dining room is deteriorating from age and has tiles which are either loose or missing. This is not only an unsanitary, but an unsafe situation for inmates and staff. As part of the project, a study will be conducted to insure the integrity of the sub-flooring. Areas of the dining room have been off limits at times due to damaged or missing floor tiles. Also, loose floor tiles can be used as a weapon against other inmates of facility staff.

**EDNA MAHAN CORRECTIONAL FACILITY FOR WOMEN**

NEW PUBLIC ADDRESS SYSTEM

LOCATION: FACILITY WIDE

Dept Priority: 129  
Project ID: 26-022  
Project Type Code: A01  
Project Type Description: Preservation-Electrical

| General: | $511 | $0 | $0 | $0 | $511 |
| Sub-Total: | $511 | $0 | $0 | $0 | $511 |

**Operating Impact:** Increase: $0  
Decrease: $0

To install a PA system to all housing units and buildings throughout the facility, recreation and work areas. The system would be operated in Center Control allowing all points to be notified at once, interacting with housing units for return voice and paging. EMCFW does not now have the capability to reach all posts and areas at one time. Communication is by telephone and an all points alert for an emergency takes approx. 20 minutes, requiring several staff members. Center Control has only one override extension to interrupt a call. Mobile radio communication equipment is not available for all areas and would be cost prohibitive. All other facilities have an "all call" code system alert of some kind. Not having one at this facility with maximum security inmates equal in sentencing time with NJSP inmates is a serious security and safety breach. Minimal response time by staff in an emergency is crucial in addressing emergent matters.

**GARDEN STATE RECEPTION AND YOUTH CORRECTIONAL FACILITY**

FLOOR REPLACEMENT, DORM #1 & GYMNASIUM

LOCATION: MAIN BUILDING

Dept Priority: 130  
Project ID: 26-124  
Project Type Code: A06  
Project Type Description: Preservation-Other

| General: | $370 | $0 | $0 | $0 | $370 |
| Sub-Total: | $370 | $0 | $0 | $0 | $370 |

**Operating Impact:** Increase: $0  
Decrease: $0

Design and replace the floor in Dorm #1 (approximately 15,000 sq. ft) and the Correction Gymnasium (approximately 25,000 sq. ft.). The SOW will include an investigation of the sub-flooring for possible deterioration. Water damage, due to roof leaks that have recently been repaired, and subsequent insect damage have deteriorated the condition of each floor. Dorm #1, which was originally a gymnasium, has added damage due to its conversion to a housing unit.

**MOUNTAINVIEW YOUTH CORRECTIONAL FACILITY**

BUILDINGS FOR STOREROOM, PACKAGES & FRISK AREA

The phased replacement of the West Compound of the maximum-security New Jersey State Prison (NJSP). A number of buildings in the West Compound were constructed more than 150 years ago making them is the Department's oldest facilities. Despite extreme efforts to provide short-term maintenance to this aged facility, the basic infrastructure is obsolete, outmoded and in a chronic state of disrepair. This includes the locking systems, roofing, plumbing, HVAC and power. This initiative provides the Department with a unique opportunity to assure optimal utilization of bedspacel and to maximize existing operational expenditures.

### ALBERT C. WAGNER YOUTH CORRECTIONAL FACILITY

| HVAC UPGRADE, OFFICERS DINING ROOM | LOCATION: OFFICERS DINING ROOM | |

| **Operating Impact:** | Increase: $0 | Decrease: $0 | | |

The Administration Building at the Minimum (Farm) Unit is a three story structure (including basement) built circa 1920 - 1930. The exterior facade consists of painted eight inch block with punched windows. Above the first floor windows is a flat brick arch supported by a steel loose lintel. A report prepared by a structural engineer reported a continuous open horizontal crack above the first floor window head, blocks that have spalled and are outwardly displaced above window jambs, loose blocks along the north elevation and fine vertical cracks originating from window heads. Left unchecked this would eventually compromise building structural integrity. Facility maintenance staff have implemented the short term repair recommendations of the consultant. This project is for the long term repair solution of removing the brick above the windows, repair/replace the steel lintel, install protective flashing and replace the brick.

- Decrease: $0

Replace the flooring in Drill Hall which has been damaged due to roof leaks. The Drill Hall is the only indoor recreational area for the entire institution of approximately 1,700 inmates. The floor has holes and many not repairable, loose floor boards which create a severe safety hazard. This project would provide the inmates with a safe environment for recreation as well as prevent possible future litigation costs. Sections of the Drill Hall are not able to be used to their full extent due to the damaged floor, causing a decrease in inmate's use of the facility.

### EDNA MAHAN CORRECTIONAL FACILITY FOR WOMEN

The purpose of this request is to provide construction funding for the renovation of the existing kitchen to ensure that the unit can receive, store & rethermalize food. The SOW includes, but is not limited to, additional storage, rethermalization ovens, replacement of the existing floor and a new HVAC system. Design funding was provided in FY2001.

To design & construct a new building to consolidate the engineering office and all crafts into one adequate area. Included is a storage area with proper loading ramps to receive and distribute inventories. The maintenance shops at Mahan are located at various places within the institution with several areas too small to store craft related equipment and supplies. This decreases the availability of valid inventories. The engineering office consists of two small rooms in a building formerly used to house farm equipment with limited space to accommodate current assigned staff. There is no room for job meetings or space to maintain institutional drawings, meet with visitors or sales people, etc. If all engineering and maintenance shops were located within one area, the engineer would have better control of personnel and equipment, thereby increasing the efficiency of all crafts to meet the ever increasing maintenance needs of the institution. The creation of one storage crib for tools will eliminate a major security concern. CONTINUED IN EXPLANATION BLOCK.

### GARDEN STATE RECEPTION AND YOUTH CORRECTIONAL FACILITY

The installation of a new canopy over the recently installed facility entrance ramp. In 2002, the stairs of the main entrance to the facility were replaced with a ramp system which includes two landings. On visiting days, visitors line up on the new ramp prior to being processed into the facility. Based on the visitors exposure to the elements, it was decided that a canopy should be constructed to cover the ramp.
### BAYSIDE STATE PRISON

**REPLACEMENT OF AIR HANDLING UNIT, TAG SHOP**

Replace the air handling unit that supplies the Tag Shop, Industrial Complex. The pneumatic control, which regulates the unit, should be upgraded to provide energy savings to the complex. The unit is required to maintain air flow through the buildings. The shaft in this unit has been repaired several times over the last thirty years. The steam coils that supply heat have deteriorated. It is becoming more difficult to locate parts to repair the unit.

Remove the old and installation of a new floor in the gym. The gym roof leaked for a period of approximately five (5) years before the roof was replaced. This leaking completely destroyed the wooden gym floor. The floor boards are warped and very rough and even sanding does not help. The moisture has also gotten under the wooden floor boards and will not dissipate causing this warping to continually change. The condition of this floor constitutes a safety hazard. The only possible way to correct this is to replace the entire floor.

### BAYSIDE STATE PRISON

**BOILER TRIM & FEED WATER SYSTEM**

Engineer and install a new feed water tank and control, new steam feed water pump, a centrifugal pump and soft start control to the boiler feed water system. In addition, provide oxygen boiler trim microprocessor systems and computerized Hawk Systems to all boilers. Finally, a blowdown heat recovery system, which will recover 90% of heat normally lost through blowdown, should be installed. The oxygen system will adjust fuel and oxygen mixture in the burners, which will reduce emission and fuel costs. The Hawk System provides operating data to the Operating Engineer on the various internal systems of the boilers. The existing boiler feed water system is over 30 years old and has failed several times, interrupting feed water to the boiler, which resulted in the loss of heat. The feed water control system also has parts that are obsolete.

**Operating Impact:**

- Increase: $0
- Decrease: $0

To demolish the old back kitchen. The old back kitchen is not in use and has been condemned and presents a safety hazard. The floor of this area is being supported by numerous "jacks" in order to prevent its collapse. The utility support systems for the building are in very poor condition and in some cases have fallen from their original installed location. The demolition of the back kitchen is a pre-condition for the construction of a new multi-purpose building. Even though this building is not in use as a kitchen, it must be utilized as a walkway for transporting garbage to the loading dock. The area has been checked by PEOSH Health and Safety Inspectors. Some of the violations the Maintenance Staff were able to correct but other corrections and repairs are needed to bring this building up to current requirements.

To conduct a study to determine the feasibility of renovating the existing (Thompson Hall) or constructing a new center control building to include offices, line up room, locker rooms with toilet and shower facilities for male and female correction officers and an upper level center control area with a 360 degree view. The present building is inadequate to handle all security functions as well as support additional staff. The control officer view window is below the grade of the maximum security area. Also, the present building infrastructure is unable to support a constantly increasing demand as well as the need for sophisticated security equipment. As a result of population expansion which required additional staff in Center Control, as well as various equipment modifications that have occurred or are scheduled to occur shortly (e.g., new emer. telephone equip. console, fire alarm controls, radio control system and All Call Intercom system), the institution is operating with an inefficient and uncoordinated center design.

The brick walls of Wings 1 & 4 appear to be in an advanced state of deterioration. Sections of masonry have fallen from these structures. Large sections of the walls appear to be unsound. Although unsightly, the walls will not be repainted in order to prevent possible further damage due to moisture retention. Emergency repairs were made in 1999 to the front wall and window security bars of Wing 4 due to the threat from falling bricks and the failure of the security bars. A study must first be conducted to determine the extent of damage and course of action to repair and/or replace the brick walls as deemed necessary to maintain security.

Operating Impact: Increase: $0 Decrease: $20

To construct a 25,000 sq. ft. maintenance facility outside of the security perimeter to accommodate all of the maintenance shops, offices, conference room and material storage. BSP now has two small maintenance facilities located a mile apart. This makes managerial control difficult and causes constant disruption of operations when even one person is not on duty. Also, total duplication of all machinery, tools, equipment and materials is necessary. Ordering of material and stock is duplicated with the resultant loss of man hours. Combining the two facilities will result in each shop having the opportunity to establish its priorities and send staff out each day on the critical items. The problem of having maintenance located inside the secure perimeter will be eliminated and security will be enhanced.

This project calls for the extension of the outflow pipe from Riggins Ditch to the Delaware Bay and the dredging of Riggins Ditch. The capacity of the existing wastewater plant is now 550,000 gallons per day (gpd). The dredging and the extension of the outflow pipe may allow for an increased capacity of 1,000,000 gpd. This would enable the department to request that the Department of Environmental Protection modify our operating permit and increase the inmate population at the Medium and Minimum facilities, as well as the Southern State facility.

To construct a masonry type building of approximately 5,000 sq. ft. to be completely air conditioned with necessary fixtures and furnishings. In keeping with the DOC’s policy to relocate the Classification Office, the SID Office and the institutional Pharmacy to a location outside the security area, it is proposed that an addition to the administration building be constructed which will house the office of the Administrator, the entire Business Office and possibly other administrative offices. Upon completion, the Classification, Internal Affairs and/or Pharmacy will then be relocated to the areas now occupied by the Administrator and Business Office. This request also includes the construction of arsenal space to address new security standards and increased storage requirements.

In May 1987, a second unit was opened at the Ancora site for the housing of inmates assigned to BSP. This expansion increased the total population at the Ancora Unit to 350 inmates. The visit program is currently held in the dayrooms of both Willow and Spruce Halls, directly adjacent to the housing units. This situation creates a security risk. In addition, the storage space for supplies and equipment, needed to maintain these units is insufficient. This request is for the construction of a pre-fabricated structure of approximately 25,000 sq. ft. to be used for the visit program and provide the Maintenance Department with a shop equipped with the supplies needed to effect repairs at the unit. Failure to fund this request will allow the security problems and inefficient maintenance operation to continue.

**BAYSIDE STATE PRISON**

To repair/install roads and parking lots. These repairs are necessary to maintain operations and have been scaled down to represent essential needs. Various entrance and perimeter roads and parking lots are in a serious state of disrepair. The facilities continue to patch pot holes as they appear, but a long range solution to this problem must be found. The maintenance of the DOC’s road system is not just a convenience for the employees. It is also a security necessity due to the use of the road system for patrol of security perimeters and the access provided to the facilities for vendors, supplies, food service deliveries and various law enforcement personnel. Areas that require work at BSP are: the steam line access road from Minimum Unit to Medium Unit entrance road; areas behind Housing Units A-F; the sawmill road; a new perimeter road at the Medium Unit; paving the dirt road connecting the Medium and Minimum Units repaving the Medium Unit entrance road from Route 47; repaving the Administrator's and Assistant Superintendent's residence driveways and repaving the Dairy and Minimum Unit roadways.

DEPARTMENT OF EDUCATION
Overview
The primary mission of the Department of Education is to provide leadership within the public school system to ensure that all children receive a meaningful and effective education. The Department provides direction for improvements in all school districts by fostering an education system that emphasizes success through flexibility, innovation, and collaboration.

One of the Department’s primary objectives is to ensure every child reads at, or above, grade level by the end of third grade. The Department is responsible for ensuring accountability for public dollars by motivating schools to provide high-quality, cost-efficient programs, including a safe and drug-free learning environment. To assure accountability, the Department sets standards and assessments to determine student achievement levels and offers assistance in achieving the established goals and objectives.

In addition to overseeing the operation of all public schools, the Department is responsible for managing the Marie H. Katzenbach School for the Deaf and for administering the 10 Regional Day Schools for special needs students.

School Construction and Renovation Program
The New Jersey Constitution guarantees that children, regardless of residency, will receive a “thorough and efficient” education. As a result of the New Jersey Supreme Court’s Abbott v. Burke decision, the State was ordered to provide a “thorough and efficient” education to children from Abbott schools (special needs districts) that was comparable to the education received by children in the more affluent communities. Consequently, in 1996, the State designed the Core Curriculum Content Standards, covering academic subjects that defined the meaning of “thorough.” These standards determine what students should know, after completing a thirteen-year public education program, in the areas of visual and performing arts, health and physical education, language arts, mathematics, science, social studies, and world languages. In the 2003-2004 school year, the standards were revised to include consumer, family, and life skills, and technology and career education to provide an awareness and exploration of occupations and professions.

In addition to curriculum standards, the Court directed the State to review the facility needs of schools in Abbott districts and to provide solutions on how to address such needs--independent of the district’s willingness or ability to raise taxes or incur debt.

In compliance with Abbott v. Burke, the State developed facility needs in the 31 Abbott districts for instructional and administrative space in elementary, middle, and high schools. These facility standards provided the definition of “efficient” in the context of the “thorough and efficient” constitutional guarantee.

Once the magnitude of the need was established, the New Jersey Legislature passed the Educational Facilities Construction and Financing Act, providing a total of $8.6 billion in State issued debt to be authorized for construction and renovation of schools in all districts, including $2.6 billion in non-Abbott districts, $100 million of which is reserved for county vocational schools. This funding, one of the largest and most comprehensive school construction programs
in the nation, provides 100% of approved construction costs for the Abbott schools and guarantees minimum State support of 40% of approved project costs in all other school districts.

**Marie H. Katzenbach School for the Deaf**
The Department of Education operates the Marie H. Katzenbach School for the Deaf. This school offers educational and vocational services, from birth through twelfth grade, to deaf and disabled deaf children. Residential services are provided for 52% of the school’s 228 students on a five-day-a-week basis.

**Regional Day Schools**
The Regional Schools for the Handicapped were authorized by the *State Facilities for the Handicapped Bond Fund (Chapter 149, Laws of 1973)*. This act provided funds to construct eleven state-owned schools for children with severe handicaps, one of which reverted to the town it is located in. The remaining ten schools are managed by local school districts under contract with the Department of Education. Annually, approximate 1,100 students attend the regional schools. The schools’ operating expenses are supported entirely from tuition charged to the sending districts, including facility improvements under $50,000. However, capital improvements over $50,000 are the responsibility of the State.

This project involves the installation of exterior lighting between buildings 24 and 30, the lower school and building 10, in the building 24 parking area. Lack of lighting in these areas present a serious safety concern for students and staff.

The Department of Education's Seven Year Plan has included three (3) Katzenbach School for the Deaf Projects in FY'03 involving the replacement of water and sewer lines. These projects are all included in this request. The majority of the sewer and water lines in this area of the campus, both between the buildings and internally, were installed between 1924 and 1929. Leaks and stoppages are a continuous reoccurring problem. The proposed solution is to replace both the water delivery and sanitary/waste removal pipes for all of the building in that quadrant of the Katzenbach campus, from the Clock Tower (Bldg. 7) back. This will include buildings 1, 8, 9, 10, 11, 12 and 13. Simultaneously the interior plumbing (supply and removal) in those individual structures will also be replaced. Currently, those structures have had their usefulness severely limited as leaking water pipes caused flooring problems and sanitary concerns.

**MARIE H. KATZENBACH SCHOOL FOR THE DEAF**

**STEAMLINE CONNECTIVE REPLACEMENT - VARIOUS BLDGS.**

LOCATION: MERCER COUNTY

- Dept Priority: 5
- Project ID: 34-079

The steamline connections within Buildings 24, 25, 26, 27 & 28 must be replaced due to the fact that they are 70 years old. These buildings are residence halls and instructin buildings. If the current steamlines fail, it would require that the building be closed and would have a serious impact on school operations.

In FY'00 the sum of $450k was appropriated to provide the school with modern air conditioning. During design and scope of work phases, there was extensive complications involving duct work, piping, ventilation and electrical. New electrical service and transformers alone cost $182,000. While unable to complete the job, the interior core of the structure including gym/all purpose, cafeteria, lobby and hallways were air conditioned. The additional funds requested will allow the completion of air conditioning all offices and classrooms and student service areas and replacing the existing hot water perimeter radiator units with modern high efficiency units. The completion will result in a modern heating, air conditioning, electrical and control system.

<td>The purpose of this project is to replace fifteen exterior classroom doors, to replace several rear and side entry doors with fully automatic ADA compliant doors and, to convert existing fire exit windows in occupational/physical therapy room with ADA compliant emergency exit doors. Exterior classroom doors, now approximately 22 years old, have deteriorated/warped to the extent that there are significant air leaks around the doors resulting in costly heating/cooling losses and posing a potential health hazard to medically fragile students. Classroom, rear and side entry doors are not fully automated and post a significant safety risk in evacuating students with physical disabilities. The conversion of fire exit windows is also needed to provide additional safe egress for physically disabled students during emergency evacuation situations.</td>

<tr>
<td>In FY’94 the Katzenbach School installed a computer-based heat control system across 10 buildings. The system monitors temperature levels, establishes zones of temperature needs, and automatically controls setbacks and turndowns. Heating oil consumption has been reduced by over 1/3 on an annual basis in those buildings. This project builds up the subsequent installation of a fiber optic cable system that the Katzenbach School had installed to all the buildings in question, to extend the EMS system. The existence of the optical cable system allows us to include significantly more buildings to the system at no additional cost beyond the level originally planned. The system will be extended to the Cottage Loop (Bldg 8-13), the Nursery (Bldg 18); the Boiler Maintenance Shop (Bldg 22/23) and a dorminatory (Bldg 30). Based upon a comparison of square footage, using current EMS savings rates, we project energy cost savings of between $35,000 to $50,000 per year for these buildings being added to the system.</td>

<td>The purpose of this project is to replace existing fluorescent lighting and fixtures with energy efficient lighting. Current lighting, in addition to not being energy efficient, is detrimental to the increasing number of autistic students served by the regional day school. The flickering direct lighting currently in use is a major distraction for the increasing autistic population as well as for the other children with disabilities served at the regional day school. Through project approval, we will replace lighting with high efficiency indirect lighting fixtures at or above the 50 lumens level.</td>

Agency Capital Budget Request

|------------|----------------------|----------------------|----------------------|--------------------------|

**MARIE H. KATZENBACH SCHOOL FOR THE DEAF**

**ASBESTOS TILE FLOOR REMOVAL - BUILDING 1**

LOCATION: MERCER COUNTY

Dept Priority: 10

Project ID: 34-071

Project Type Code: C02  Project Type Description: Environmental-Asbestos

| General | $450 | $0 | $0 | $450 | $0 |
| Sub-Total: | $450 | $0 | $0 | $450 | $0 |

Operating Impact: Increase: $0  Decrease: $0

Remove asbestos floor tiles which are over 40 years old in Building 1. Worn, cracked, chipped tiles create a health and safety issue for staff and students.

**DIVISION OF ADMINISTRATION**

**NURSE'S OFFICE & STUDENT BATHROOMS**

LOCATION: MERCER COUNTY

Dept Priority: 11

Project ID: 34-059

Project Type Code: A06  Project Type Description: Preservation-Other

| General | $250 | $0 | $0 | $250 | $0 |
| Sub-Total: | $250 | $0 | $0 | $250 | $0 |

Operating Impact: Increase: $0  Decrease: $0

This project will provide for the expansion of the existing nurse's room to provide space for an office and private examination room. Currently, the nurse shares space with therapists and case managers. The renovation will allow for the isolation and privacy of sick students. The project will also provide barrier free sinks and changing tables in each of four in-class bathrooms. This project is extremely important for meeting the health and safety needs of students with severe disabilities.

**MARIE H. KATZENBACH SCHOOL FOR THE DEAF**

**RESURFACE DAM**

LOCATION: MERCER COUNTY

Dept Priority: 12

Project ID: 34-028

Project Type Code: A06  Project Type Description: Preservation-Other

| General | $125 | $0 | $0 | $125 | $0 |
| Sub-Total: | $125 | $0 | $0 | $125 | $0 |

Operating Impact: Increase: $0  Decrease: $0

Repair and resurface the dam at the end of the Katzenbach lake. The face of the dam is delaminating, thus weakening the structure.
