STATE OF NEW JERSEY NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

Budgetary Process

The Appropriations Act provides annual departmental budgets for the General Fund and certain special revenue funds (Casino Control, Casino Revenue, Gubernatorial Elections, and Property Tax Relief Funds). The State Legislature enacts the Appropriations Act through passage of specific departmental appropriations, the sum of which may not exceed estimated resources. It is a constitutional requirement that the Budget be balanced. The Governor certifies the revenues. Before signing the Appropriations Act, the Governor may veto or reduce any specific appropriation, subject to State Legislative override. Once passed and signed, the Appropriations Act becomes the State's financial plan for the coming fiscal year. Spending authority contained in the Appropriations Act may be revised by supplemental appropriations approved by both the State Legislature and the Governor. Expenditures are presented on the accompanying budgetary basis financial statements by statewide program classifications, not by the legal level of budgetary control. Detail at the departmental level is presented on the accompanying Schedules of Appropriations and Expenditures.

For the General Fund and budgeted special revenue funds, budgetary control (legal control) is maintained within the department (as indicated on the organization chart shown in the Transmittal Letter) at the appropriation line item level. Program classifications represent a lower level, operating program function, consisting of closely related activities with identifiable objectives or goals. Program classification examples include Water Supply Management, Forestry Management, Shellfish and Marine Fisheries Management, in the Department of Environmental Protection. Revisions to the Appropriations Act during the fiscal year may be effected with certain executive and legislative branch approvals. In accordance with the "General Provisions" section of the Appropriations Act, the Executive Branch may amend the budget within a department with the approval of the Director of the Division of Budget and Accounting. Under specific conditions, additional approval by the Office of Legislative Services is required. Only the State Legislature, however, may transfer appropriations between departments. Transfers within a department are permitted within certain guidelines and Executive Branch approval.

Appropriations are authorized for expenditure during the fiscal year and for a period of one month thereafter, and unencumbered appropriations lapse at the end of the fiscal year, unless otherwise specified by the Appropriations Act.

The State's budgetary basis of accounting differs from that utilized to present fund financial statements in conformance with generally accepted accounting principles (GAAP). The main differences between the budgetary basis and the GAAP basis used to present fund financial statements, are that under the budgetary basis encumbrances are recognized as expenditures, the federal revenue related to such encumbrances is also recognized, and the budgetary basis reflects transactions only for the current fiscal year. In addition, under the GAAP basis in the fund financial statements, certain grants and other financial assistance are required to be recorded as revenues and expenditures.

The Budgetary Comparison Schedule displays the undesignated-unreserved fund balance for the original budget, final budget, and actual amounts (budgetary basis). The beginning fund balance for the original budget is estimated as of July 1 while the beginning fund balance for the final budget and actual amount columns represent actual amounts.
