Jan. 1, 2026 Formulary Management

Jan. 1, 2026 key formulary updates

Affordability

- Many **newly launched generics** will be preferred at Tier 1 on our standard formularies including the generic for popular cardiovascular agent Entresto. Also, as Attention Deficit Hyperactivity Disorder generic drug shortages have started to resolve, generic Adderall XR will again be preferred over the brand to promote client and member savings.
- To encourage the use of recently launched generics and lower cost medications, 71 drugs will be added to the **Vigilant Drug Strategy** including 49 drugs in the **High-Cost Brands with Generics** category and 13 **Clinical Duplicate Drugs**, providing savings for both plans and members.

Specialty medication updates

- In order to further advance biosimilar use and create value, select **biosimilars for Prolia and Xgeva** will be preferred in parity with the originator products at Tier 2 on our standard formularies – delivering savings for our clients and members.

Utilization Management

- **Step Therapy** will be added for brands Vtama and Zoryve creams in the dermatology category, promoting the use of 25 lower cost topical generics available in this class.
- New **Quantity Limits** will be applied to 21 testosterone agents used for androgen replacement therapy and five dry eye agents, addressing appropriate usage and providing client savings in these categories.

Jan. 1, 2026 Formulary Update Summary

OUR MISSION

Helping people live **healthier lives** and helping make the **health system work better for everyone**

DRUG DECISIONS

Downtiers/Additions

Medications can move to a lower tier at any time throughout the year to provide members with immediate cost savings

Uptiers

Medications that move to a higher tier because they offer less health care value, clinically and/or financially, than similar medications in their therapeutic classes

Exclusions

A medication is only excluded when it offers no clinical value over other options in its class and its exclusion can be leveraged to achieve significant savings for our clients while preserving affordable choices for members

PREMIUM

Launching new Prolia and Xgeva biosimilar strategies

As the **biosimilar market** continues to expand, we support strategies that align with our patient-first guiding principles of clinical quality, accessibility, and affordability.

Premium and Select Formularies

Therapeutic class	Originator product	New Strategy
Osteoporosis	Prolia	Tier 2 with PA/QL on Premium Prolia Stoboclo effective Dec. 5, 2025^
		Premium – Excluded Jubbonti effective Nov. 7, 2025^ Conexxence effective Jan. 3, 2026^
Cancer	Xgeva	Tier 2 with PA on Premium Xgeva Osenvelt effective Dec. 5, 2025^
		Premium – Excluded Wyost effective Nov. 7, 2025^ Bomynta effective Jan. 3, 2026^

Preferred biosimilars offer ~50% savings in net cost compared to Prolia/Xgeva.

^Biosimilars are currently on the New Drugs to Market (NDTM) program until the effective date listed.

ADHD generic drug shortage update

Brand Adderall XR will be excluded or nonpreferred, and the generic alternative placed on Tier 1

BRAND DRUG^	FORMULARY STATUS	ALTERNATIVES
Adderall XR capsule	Premium: Tier 3 > Excluded	amphetamine-dextroamphetamine ER capsule

^The brand will move onto the Vigilant Drug Program’s High-Cost Brands with Generics and Clinical Duplicates lists.

Optum Rx regularly monitors and helps manage drug shortages on behalf of our clients and members, ensuring members have access to the most affordable medications and continuity of care. We are continuing to monitor the supply of generic Concerta and Vyvanse.

Jan. 1, 2026 Prior Authorization updates

Therapeutic class	Drug	New PA
Central Nervous System: Analgesics	methadone solution 5 mg/5 mL	PA process for methadone tablets will also apply to solutions.
	methadone solution 10 mg/5 mL	
Central Nervous System: Antidepressants	Raldesy soln 10 mg/ml (trazodone)*	New commercial formulary strategy adds PA criteria requiring a trial and failure, or intolerance to, a generic equivalent in a solid dosage formulation but allows for Continuation of Therapy.

*Excluded on Premium Formulary

**PA helps ensure
medication use is
clinically appropriate
and cost effective.**

Jan. 1, 2026 Step Therapy updates

Therapeutic class	Step 2 drugs (Requires trial of step 1)	Step 1 drugs
Dermatology: Topical Immunomodulators	Vtama cream 1% (tapinarof) Zoryve cream 0.3% (roflumilast)	Any one of the following topical generics: alclometasone, amcinonide, betamethasone, clobetasol, clocortolone, desonide, desoximetasone, diflorasone, fluocinolone, fluocinonide, flurandrenolide, fluticasone, halcinonide, halobetasol, hydrocortisone, mometasone, prednicarbate, triamcinolone, pramoxine-HC, calcipotriene-betamethasone, tacrolimus, pimecrolimus, calcipotrine, calcitrol, tazarotene

Generic First

Generic equivalent trial required first

- **Aptiom** (eslicarbazepine)*
- **Brilinta** (ticagrelor)*
- **Entresto tab** (sacubitril/valsartan)*
- **Estrogel** (estradiol)*

Jan. 1, 2026 Quantity Limit updates

Therapeutic class	Drug
Endocrinology & Metabolism: Androgens	 Testosterone injectable agents Examples: Depo-Testosterone*, Testosterone Cypionate*
	 Testosterone oral agents Examples: Kyzatrex, Methitest
	 Testosterone topical agents Examples: Androgel, Testim gel*

*Excluded on Premium Formulary

Quantity Limits are being added to these testosterone products which already have Prior Authorization.

Savings potential*

>\$1,000

Brand Drugs

\$50

Less expensive drugs

* **Aligning QLs** to the recommended doses provides savings.

New Jan. 1, 2026 Quantity Limit updates

Category	Therapeutic class	Drug	New Quantity limits
Ophthalmology	Dry Eye	Cequa Soln 0.09% (cyclosporine)	2 vials per day
		Eysuvis Susp 0.25% (loteprednol)	1 bottle (8.3 mL) per 30 days
		Restasis Emulsion 0.05% (cyclosporine)	2 vials per day or 1 bottle per 30 days
		Vevye Soln 0.1% (cyclosporine)*	1 bottle (2 mL) per 30 days
		Xiidra Soln 5% (lifitegrast)	2 vials per day

*Excluded on Premium Formulary

Quantity Limits are being added to these medications which already have Prior Authorization.

Monitoring Utilization Management performance

Continuous monitoring improves the member & provider experience

Clinical basis for coverage is reviewed **annually** and **more often** when information becomes available that impacts the basis for coverage.

PA performance data is part of each review.

Medical treatments continually evolve so **ongoing monitoring** ensures alignment with standards of care.

Recent retirement examples

Class	Drug	Rationale	Date
Prior authorization			
Antiretrovirals, HIV	Cabenuva	Being used appropriately and low risk for misuse.	April 1, 2025
Step Therapy			
Leukotriene Modifiers	Zyflo, generic zileuton ER	Retired due to high approval and low utilization.	April 1, 2025
Quantity Limits			
Central Nervous System/ Opioid Use Disorder	buprenorphine for substance use disorder	Retired due to appropriate use, as prescribers dose based on sliding scale and dose modification based on symptoms.	May 1, 2025
