## **1.0 INFORMATION FOR BIDDERS**

### **1.1 PURPOSE AND INTENT**

This Request for Proposal (RFP) is issued by the Purchase Bureau, Division of Purchase and Property, Department of the Treasury on behalf of the Division of Lottery. The purpose of this RFP is to solicit bid proposals for all the equipment, communications, firmware, software, supplies and related services necessary to implement, operate and maintain a state-of-the-art Random Number Generator (RNG) for use with the Lottery's draw games.

The intent of this RFP is to award a contract to that responsible bidder whose bid proposal, conforming to this RFP is most advantageous to the State, price and other factors considered. However, the State reserves the right to separately procure individual requirements that are the subject of the contract during the contract term, when deemed by the Director to be in the State's best interest.

The NJ Standard Terms & Conditions version 05 09 06 will apply to all contracts or purchase agreements made with the State of New Jersey. These terms are in addition to the terms and conditions set forth in this RFP and should be read in conjunction with them unless the RFP specifically indicates otherwise.

### **1.2 BACKGROUND**

The Division of Lottery introduced its first raffle style lottery game, "Million Dollar New Year" on November 20, 2006. The game was limited to 500,000 tickets and had a prize matrix of 1-519 winning numbers. The Lottery leased a RNG to perform the selection of winning numbers and produce associated draw reporting.

The Lottery uses mechanical draw machines for the selection of winning numbers for its traditional lottery games, Pick 3, Pick 4, Jersey Cash 5 and Pick 6 Lotto.

The Lottery also uses mechanical draw machines to perform special retailer drawings, certain VIP Club drawings and special promotional bonus raffle type drawings.

### **1.3 KEY EVENTS**

### 1.4 ADDITIONAL INFORMATION

#### 1.4.1 ADDENDA: REVISIONS TO THIS RFP

In the event that it becomes necessary to clarify or revise this RFP, such clarification or revision will be by addendum. Any addendum to this RFP will become part of this RFP and part of any contract awarded as a result of this RFP.

ALL RFP ADDENDA WILL BE ISSUED ON THE DIVISION OF PURCHASE AND PROPERTY WEB SITE. TO ACCESS ADDENDA, SELECT THE BID NUMBER ON THE BIDDING OPPORTUNITIES WEB PAGE AT THE FOLLOWING ADDRESS:

<http://www.state.nj.us/treasury/purchase/bid/summary/bid.shtml>.

There are no designated dates for release of addenda. Therefore interested bidders should check the Purchase Bureau "Bidding Opportunities" website on a daily basis from time of RFP issuance through bid opening.

It is the sole responsibility of the bidder to be knowledgeable of all addenda related to this procurement.

#### 1.4.2 BIDDER RESPONSIBILITY

The bidder assumes sole responsibility for the complete effort required in submitting a bid proposal in response to this RFP. No special consideration will be given after bid proposals are opened because of a bidder's failure to be knowledgeable as to all of the requirements of this RFP.

#### 1.4.3 COST LIABILITY

The State assumes no responsibility and bears no liability for costs incurred by a bidder in the preparation and submittal of a bid proposal in response to this RFP.

#### 1.4.4 CONTENTS OF BID PROPOSAL

Subsequent to bid opening, all information submitted by bidders in response to the bid solicitation is considered public information, except as may be exempted from public disclosure by the Open Public Records Act, N.J.S.A. 47:1A-1 et seq., and the common law. Because the State proposes to negotiate and/or pursue a Best and Final Offer, bid proposals will not be made public until the Letter of Intent to Award is issued.

A bidder may designate specific information as not subject to disclosure when the bidder has a good faith legal/factual basis for such assertion. The State reserves the right to make the determination and will advise the bidder accordingly. The location in the bid proposal of any such designation should be clearly stated in a cover letter. **The State will not honor any attempt by a bidder either to designate its entire bid proposal as proprietary and/or to claim copyright protection for its entire proposal.**

By signing the cover sheet of this RFP, the bidder waives any claims of copyright protection set forth within the manufacturer's price list and/or catalogs. The price lists and/or catalogs must be accessible to State using agencies and cooperative purchasing partners and thus have to be made public to allow all eligible purchasing entities access to the pricing information.

All bid proposals, with the exception of information determined by the State or the Court to be proprietary, are available for public inspection after the Letter of Intent to Award is issued. At such time, interested parties can make an appointment with the Purchase Bureau to inspect bid proposals received in response to this RFP.

#### 1.4.5 BID OPENING

On the date and time bid proposals are due under the RFP, only the names of the bidders submitting bid proposals will be publicly announced. The contents of the bid proposals shall remain confidential until the Notice of Intent to Award is issued by the Director.

#### 1.4.6 PRICE ALTERATION

Bid prices must be typed or written in ink. Any price change (including "white-outs") must be initialed. Failure to initial price changes shall preclude a contract award from being made to the bidder.

#### 1.4.7 BID ERRORS

In accordance with N.J.A.C. 17:12-1.22, "Bid Errors," a bidder may withdraw its bid as follows:

A bidder may request that its bid be withdrawn prior to bid opening. Such request must be made, in writing, to the Supervisor of the Business Unit. If the request is granted, the bidder may submit a revised bid as long as the bid is received prior to the announced date and time for bid opening and at the place specified.

If, after bid opening but before contract award, a bidder discovers an error in its proposal, the bidder may make written request to the Supervisor of the Business Unit for authorization to

withdraw its proposal from consideration for award. Evidence of the bidder's good faith in making this request shall be used in making the determination. Some of the factors that may be considered are that the mistake is so significant that to enforce the contract resulting from the proposal would be unconscionable; that the mistake relates to a material feature of the contract; that the mistake occurred notwithstanding the bidder's exercise of reasonable care; and that the State will not be significantly prejudiced by granting the withdrawal of the proposal. Note: a PB-36 complaint form may be filed and forwarded to the Division's Contract Compliance and Administration Unit (CCAU) for handling. A record of the complaint will also be maintained in the Division's vendor performance file for evaluation of future bids submitted.

All bid withdrawal requests must include the bid identification number and the final bid opening date and sent to the following address:

Department of the Treasury  
Purchase Bureau, PO Box 230  
33 West State Street – 9<sup>th</sup> Floor  
Trenton, New Jersey 08625-0230  
Attention: Supervisor, Business Unit

If during a bid evaluation process, an obvious pricing error made by a potential contract awardee is found, the Director shall issue written notice to the bidder. The bidder will have five days after receipt of the notice to confirm its pricing. If the vendor fails to respond, its bid shall be considered withdrawn, and no further consideration shall be given it.

If it is discovered that there is an arithmetic disparity between the unit price and the total extended price, the unit price shall prevail. If there is any other ambiguity in the pricing other than a disparity between the unit price and extended price and the bidder's intention is not readily discernible from other parts of the bid proposal, the Director may seek clarification from the bidder to ascertain the true intent of the bid.

#### **1.4.8 JOINT VENTURE**

If a joint venture is submitting a bid proposal, the agreement between the parties relating to such joint venture should be submitted with the joint venture's bid proposal. Authorized signatories from each party comprising the joint venture must sign the bid proposal. A separate Ownership Disclosure Form, Disclosure of Investigations and Actions Involving Bidder, Affirmative Action Employee Information Report, MacBride Principles Certification, and Business Registration or Interim Registration must be supplied for each party to a joint venture.

The system must be designed and delivered to provide unbiased lottery drawings that minimize the time required between the closing of lottery ticket sales and the game drawings.

The system must consist of two independent RNG's (primary and redundant back up).

The system must have a single operating system. The overall fundamental operation of the system must have sufficient internal controls and security programs to ensure the integrity of all drawings.

The system must be modifiable to support multiple and future draw games.

#### **3.1 Hardware Requirements**

The contractor will provide the following hardware:

- Two customized identical PC based computers, each with keyboard and mouse;
- Two lockable computer cases;

- Archival system for internal drawing log files;
- Internal hard drive no less than 80GB;
- CD/DVD drive;
- Tamper proof EPROM internal security.

Hardware must support printing to standard laser printers using PEL or PS drivers. The system must have a direct method of backing up and saving data to a disc (e.g., a DVD burner) to safeguard the integrity of lottery drawing information. The contractor must certify that all of its equipment will fully comply with all applicable underwriters' laboratory rules before it is installed. All equipment must be supplied by major manufacturers whenever possible so as to maximize the availability of any necessary replacement parts. The system must be constructed of commercially available hardware and must contain no proprietary components. The bidder must certify that all of its equipment is maintainable and upgradeable through the term of the contract, including any possible extensions. The system must be capable of displaying an image to a remote TV. (150ft) using RCA outputs at a minimum.

#### **3.2 Software Requirements**

The system must include the following:

- Random Number Generator algorithms; Customized game matrices; Program validity checking – micro checksums; and Dual sign on authentication.
- All passwords stored on the system must be encrypted at a level of no less than 128bit.
- All system maintenance must require dual sign-on authentication.
- An automatic audit report must print an audit history of each draw/transaction conducted for each session.
- Provide an efficient, comprehensive methodology for Lottery drawing officials to select draw games;
- Include authentication capabilities that limit system access to authorized personnel;
- Include the last dual login display (time, date and users) upon successful login;
- Be able to display drawing values, as drawn and in ascending order;
- Prevent the user from changing any variable (e.g., date and time) used by the system for generating a drawing;
- Provide a method to activate the draw; and
- Produce, upon the instigation of the drawing official, hardcopy and archival materials that record all actions of the system. The hardcopy and archival material must be, at a minimum, that considered necessary and sufficient by the auditing agency to establish the rightful winning numbers and a trail of the processing associated with the display of the winning information.

### **3.3 Operational Performance:**

- The system must be able to generate the correct number of winning values for a given draw game, consistent with the desired range of the game.
- The system must ensure that each of the possible numbers in the appropriate range for any given draw game has an equal opportunity of occurring (i.e., will be selected in an unbiased manner).
- The system must use methods that prevent the prediction of the selected values before their selection.
- The system must be modifiable to support multiple and future draw games. The system initially will be used for Raffle drawings with a flexible matrix of 1 – 700 winning numbers from a population of up to 1 million. The system may also serve as a back up to the traditional on-air mechanical lottery machines. Accordingly, the system must be capable of not only determining the winning numbers, but also compile a broadcast ready animated graphic presentation of a lottery drawing that is recordable to DVD. The Vendor must specify any limitation to the number of games the System will support.
- The system must support direct live drawings with a Broadcast ready feed in National Television System Committee (NTSC) standards in either Serial Digital Interface (SDI) or analog, to accepted standards.

- The system must provide for the ability to connect to an optional Communications Server to capture complete drawings via a secure “Video Only” connection to the primary system. Captured drawings must be able to be compressed and exported in various formats for easy web viewing.
- The system must be capable of completing a drawing within 15 minutes after the closing of ticket sales for the game being drawn.
- The system shall include an authentication capability that will limit access to the System’s resources to authorized personnel only.
- The system must maintain an audit trail to permit the reconstruction of the processing associated with all games and all draws since inception.
- The system must have two interchangeable methods of seeding random numbers, or an alternative method of arriving at random numbers.
- The algorithm must be burned into an EPROM chip or a superior alternative method of securing the algorithm.
- The system must perform pre-draw and post-draw tests, of no less than 100,000 draws per test, for each game drawing.
- The system must print the pre-draw and post-draw results on the audit logs after the drawing officials log off the System.
- The system must provide for customizable draw reports for winners with a checksum value for corresponding results files.
- The system must perform a Chi-Square analysis of the pre-draw and post-draw test to ensure randomness. If any pre-draw test fails, the system will not complete the draw and the user will be returned to the main menu.
- The drawing officials shall not be able to manually enter a time or date nor any other entry that tampers or compromises the integrity of the draw.

### **3.4 Environmental and Construction Requirements**

#### **3.5 Modular Design:**

The system must provide for expandability with software, hardware and modular components.

The system must be upgradeable if at some future date the NJL decides to use the system as its primary number source for all games and directly distribute the animated drawings from the system.

The system must be constructed in a modular fashion with easily replaceable components.

#### **3.6 Secure Environment:**

The System must be designed to operate in a physically secure environment.

The System must be designed to operate in a standard commercial office environment, using standard 110V AC electrical power.

The contractor must ensure that the levels of physical, software, operational and access security described in this RFP are consistently met or exceeded, in order to ensure the integrity of the System and maintain a high level of public confidence in the integrity of the Lottery. These security measures will cover both the hardware and software of the System.

### **3.7 Testing Requirements**

The contractor must successfully complete its own internal quality assurance testing on the system before delivery to the lottery. The lottery must receive a detailed description of the contractor's quality assurance testing procedures before system delivery.

The contractor must give the lottery a copy of the results of all system tests.

The system must demonstrably comply with the lottery operations and security procedures stated in this RFP.

### **3.8 System certification requirements**

The system must successfully achieve certification by an independent third party, contracted and paid for by the Lottery, to ensure the following:

- The system generates winning numbers (or values) that are appropriate for the range of each draw game;
- The method of generating winning numbers is consistently unbiased and unpredictable;
- The system is secured and cannot be altered or tampered with.
- The third party contractor will be certified to provide algorithm analysis.
- The lottery may at any time throughout the term of the contract conduct additional acceptance tests of the system, as the lottery deems reasonably appropriate.
- The contractor shall provide to the lottery the necessary components and data to conduct independent third party certification. **The cost of certification will be the responsibility of the Lottery.**

### **3.9 Training Requirements**

The contractor must provide an on-site system-training program to ensure that lottery personnel are fully qualified to operate the system correctly and efficiently. The maintenance program shall include, at a minimum, the following:

- Software/application upgrades and support;
- Hardware problem support and replacement; and
- Hotline evaluation and support.

The contractor must provide all necessary software licenses necessary for the operation of the system. The application based pricing must be included in the cost of the system.

The purpose of such communication with a bidder, either through an oral presentation or a letter of clarification, is to provide an opportunity for the bidder to clarify or elaborate on its bid proposal. Original bid proposals submitted, however, cannot be supplemented, changed, or corrected in any way. No comments regarding other bid proposals are permitted. Bidders may not attend presentations made by their competitors.

It is within the Evaluation Committee's discretion whether to require a bidder to give an oral presentation or require a bidder to submit written responses to questions regarding its bid proposal. Action by the Evaluation Committee in this regard should not be construed to imply acceptance or rejection of a bid proposal.

The Purchase Bureau buyer will be the sole point of contact regarding any request for an oral presentation or clarification.

The Committee may not contact all bidders to negotiate and/or to submit a BAFO.

In response to the State's request for a BAFO, bidders may submit a revised price proposal that is equal to or lower in price than their original submission, but must continue to satisfy all mandatory requirements. Any revised price proposal that is higher in price than the original will be rejected as non-responsive and the original bid will be used for any further evaluation purposes.
