FORM 501-GIT
General Instructions

New Jersey has uncoupled from many provisions of IRC Section 199. For tax years beginning after December 31, 2004, the New Jersey Domestic Production Activities Deduction is based on domestic production gross receipts derived exclusively from a lease, rental, sale, exchange or other disposition of qualified production property which was manufactured or produced, as defined under NJSA 54A:5-15, by the taxpayer in whole or in significant part within the United States.

The New Jersey deduction is not allowed for:

- Qualified production property grown or extracted by the taxpayer
- Films, electricity, natural gas, potable water, computer software or sound recordings produced by the taxpayer
- Construction activities
- Engineering or architectural services

Form 501-GIT must be used to calculate the New Jersey Domestic Production Activities Deduction allowable for gross income tax purposes. The allowable deduction will be taken into consideration in determining the net distributive share of partnership income; net pro rata share of S corporation income; net profits from business; net gains or income from disposition of property; and net gains or income from rents, reportable on a NJ-1040, NJ-1040NR or NJ-1041.

Income from Partnerships and S corporations: A separate Form 501-GIT must be prepared by each partnership or S corporation with a New Jersey filing requirement. The resulting New Jersey deduction will be taken into account by the partnership or S corporation in calculating the income reported on the partner's or the shareholder's Schedule NJK-I. If the partnership or S corporation does not file a New Jersey return, the partner or shareholder will calculate their New Jersey deduction on a Form 501-GIT using information which must be provided by the entity. The resulting New Jersey deduction will be taken into account by the partner or shareholder in preparing their Worksheet A, Bulletin GIT-9P or Worksheet B, Bulletin GIT-9S.

Net profits from business; rental and lease income; net gains from disposition of property: A separate Form 501-GIT must be prepared to calculate the New Jersey Domestic Production Activities Deduction for each sole proprietorship, rental, lease, disposition of property or other activity which meets the New Jersey criteria. The resulting deduction will be taken into consideration in determining the net profits from business, net gains or income from rents, and net gains or net income from disposition of property reportable on Form NJ-1040, NJ-1040NR or NJ-1041.
