

IS IT LEGAL? HOW TO IDENTIFY A LEGAL CANNABIS PRODUCT

Safe use should be a priority when we use cannabis and cannabis products.

For our own safety and for the safety of children, other adults, and even our pets, it's important to be able to identify safe and legal products.

Buying your cannabis and cannabis products from a legal, licensed dispensary is the first step to ensuring you are being safe.

Legally purchased products are tested for potency and nasty contaminants like heavy metals, and are tracked "from seed to sale" – at every point of cultivation and processing until it reaches the consumer.

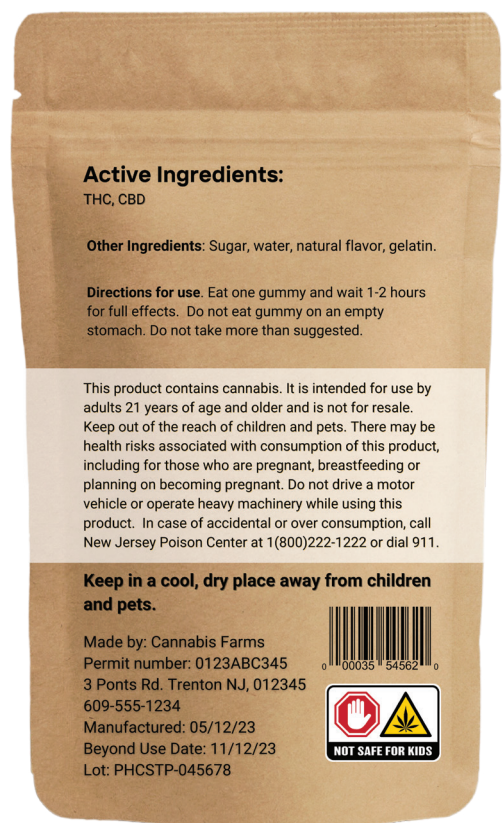

Legal products are also required to be in packaging that is child resistant and resealable. Most accidental ingestion in children is preventable and the result of unsafe storage.

Find a Legal Dispensary

YOUR PACKAGE SHOULD HAVE INFORMATION ABOUT THE FOLLOWING:

EXAMPLE:

MANUFACTURER

- Business name
- Permit/license number
- Contact information

PRODUCT

- Name
- Product type
- Active & inactive ingredients
